BTNX COVID-19 Rapid Test

YOUR TESTING KIT CONTAINS:
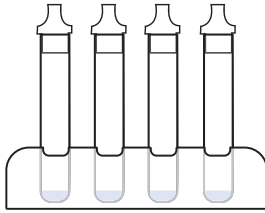

Nasal Swab **Test Tube** **Buffer Liquid** **Tube Stand** **Test Cartridge**

BEFORE YOU START

- Bring all testing materials to room temperature (18-30°C) before use.

- Wash your hands.
- Clean your work surface.
- Open the contents of your testing kit.

- Remove the test cartridge from the wrapper.
- Write your name on the cartridge if testing more than one person.

STEP 1

- Place the collection tube into the tube stand so it stands upright.
- Add entire contents of 1 single use testing buffer solution into the test tube.
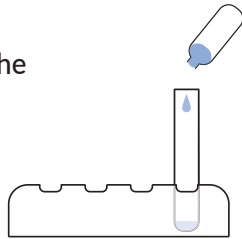

STEP 2

- Open your mouth.
- Without touching your teeth, rub the swab between your cheeks and lower gums on one side and then the other (at least 5 times on each side).
- Then, tilt your head back and use the same swab to rub the back of your throat 5 times back and forth (this may cause some people to gag; this is not harmful).

x5

x5
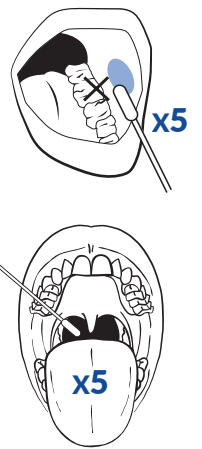

STEP 3

- Using the same swab, insert the swab into your nostril approximately 2 cm.
- Rub and rotate the swab 5 times around and repeat for the other nostril using the same swab.

x5   x5
① ②
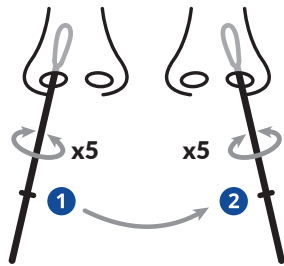

STEP 4

- Immerse swab tip into liquid in the test tube, swirling and stirring the swab for 10 seconds.
- Squeeze the swab 10-15 times by pinching the tube against the swab.
- Keep swab immersed in the liquid and let stand for 2 minutes in the tube stand.

10s
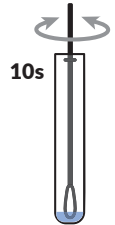

STEP 5

- Remove swab from test tube while squeezing out remaining liquid.
- Attach nozzle to the test tube and gently squeeze 3 drops into the round well of the test cartridge.
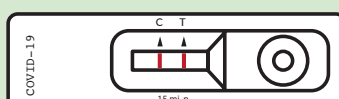

x3
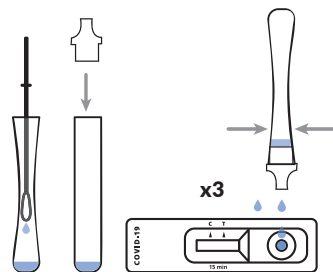

STEP 6

- Set a timer for 15 minutes. After 15 minutes, a coloured line will show in the result window.
- When finished, properly dispose of the testing supplies, sanitize your hands, and clean your testing space.

NEGATIVE RESULT
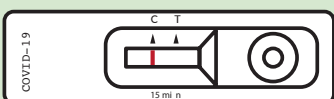

One line at the C mark. No line at the T mark. Continue your testing schedule.

POSITIVE RESULT

Two lines. One line at the C mark and one line at the T mark. Immediately self-isolate and visit the COVID-19 Referral and Assessment application to determine if you need a lab-based test and to report your positive result. Do not contact 811 unless you do not have internet access.

INVALID RESULT

If your test result does not match either the **Negative or Positive** examples, the test may not have worked. Re-test until you receive a positive or negative test result.
