Short title

1. These regulations may be cited as the *Cost of Consumer Credit Disclosure Regulations*.

APR - fixed credit

2. (1) For the purpose of paragraph 45(1)(b) of the Act, the cost of borrowing for a loan under a credit agreement, that is a fixed credit, is to be expressed as an annual rate on the principal, as follows:

$$\text{APR} = (C/(TxP)) \times 100$$

where

APR is the annual percentage rate cost of borrowing;

C is an amount that represents the total cost of credit;

P is the average principal outstanding over the term, being the sum of the principle outstanding during all calculation periods divided by the number of calculation periods in the term; and

T is the term of the loan in years.

(2) For the purpose of the APR calculation under subsection (1),

(a) the APR may be rounded off to the nearest eighth of a per cent;

(b) each instalment payment made on a loan shall be applied first to the accumulated cost of borrowing and then to the outstanding principal;

(c) a period of

(i) one month is 1/12 of a year,

(ii) one week is 1/52 of a year, and

(iii) one day is 1/365 of a year;

(d) if the annual interest rate underlying the calculation is variable over the period of the loan, it shall be set as the annual interest rate that applies on the day that the calculation is made;

- (e) if there are no instalment payments under a credit agreement, then the APR shall be calculated on the basis that the outstanding principal is to be repaid in one lump sum one year after the effective date of the disclosure statement; and
- (f) when a credit agreement is renewed, the outstanding balance immediately before renewal is regarded as an amount advanced to the borrower at the time of renewal, and advances and payments accounted for in that outstanding balance are otherwise disregarded.

APR - open credit

3. (1) For the purpose of paragraph 45(1)(b) of the Act, the cost of borrowing for a loan obtained under a credit agreement, that is an open credit, is to be expressed as an annual rate, as follows:

- (a) if the loan has a fixed annual interest rate, that annual interest rate; or
- (b) if the loan has a variable interest rate, the annual interest rate that applies on the date of the disclosure.

(2) For the purpose of paragraph 45(1)(z) of the Act an index rate is a rate that is made public at least weekly in a publication that has general circulation in the province.

APR - no cost of borrowing

4. The APR for a credit agreement is the annual interest rate if there is no cost of borrowing other than interest.

APR - leases

5. (1) For the purpose of paragraph 45(1)(b) of the Act, the APR for a lease is the amount determined by the following formula:

$$\text{APR} = 100 \times M \times i$$

where

M = the number of payment periods in a year;

i = the periodic interest rate such that

$$\text{PMT} = \left[\frac{\text{PV} - \text{FV} (1 + i)^{-N}}{1 - (1 + i)^{-(N-A)}} \right] \div i + A$$

where

PMT = the amount of each periodic payment;

PV = the capitalized amount;

FV = the amount of the assumed residual payment;

I = the periodic interest rate;

N = the number of payment periods in the lease; and

A = the number of period lease payments that are paid at or before the beginning of the term.

(2) For the purpose of calculating the APR and implicit finance charge applicable to a lease,

(a) an amount payable by the lessee in respect of a tax may be treated as a payment only if an amount in respect of the tax was treated as an advance in calculating the capitalized amount; and

(b) a charge payable by a lessee may be treated as an advance only if an equivalent charge would be payable by a cash customer.

(3) Where the payments due under the lease vary in amount or are payable in relation to payment periods that vary in length, the equation referred to in subsection (1) shall be modified as necessary to calculate the value of "i" in accordance with actuarial principles.

(4) Where a lease is for an indefinite term or is renewed automatically until one party takes steps to terminate it, the APR shall be calculated,

(a) in the case of a lease that allows the lessee to automatically acquire title to the leased goods after a specified period of time, on the assumption that the term of the lease is that period of time; or

(b) in any case, on the assumption that the term of the lease is one year.

(5) For the purpose of the definition “capitalized amount” in paragraph 45(1)(h) of the Act, the amount of a payment made by the lessee at or before the beginning of the term does not include:

(a) a refundable security deposit; or

(b) a periodic payment.

High ratio mortgage **6.** For the purpose of subparagraph 45(1)(s)(iii) of the Act, high ratio mortgage means a mortgage loan under which the amount advanced, together with the amount outstanding under another mortgage that ranks equally with or before the mortgage loan, exceeds 80% of the market value of the property.

Value given **7.** For the purpose of paragraph 45(4)(c) of the Act, money transferred or to be transferred from the borrower to a person other than the credit grantor with respect to a charge for services that the credit grantor requires the borrower to obtain or pay for with respect to the credit agreement, unless the charge is for title insurance provided by an insurer chosen by the borrower, constitutes value given or to be given by a borrower with respect to a credit agreement..

Exemptions from the act **8.** Part VII of the Act does not apply to the following:

(a) a sale of a service by a public utility as defined in the *Public Utilities Act*;

(b) a loan made by a life insurance company under a life insurance policy to the insured or his assignee solely on the security of the cash surrender value of the policy;

- (c) a loan made under the *Student Financial Assistance Act*, the *Canada Student Financial Assistance Act* (Canada) or the *Canada Student Loans Act* (Canada);
- (d) the payment of taxes under the *Municipalities Act, 1999*; and
- (e) overdraft protection on a deposit account.

Initial disclosure statement for a mortgage

9. (1) A credit grantor for a mortgage shall give an initial disclosure statement, in accordance with section **11**, to each person entitled to disclosure, at least 2 business days before the earlier of the following:

- (a) the day that the borrower first incurs an obligation to the credit grantor in relation to the mortgage; and
- (b) the day that the borrower first makes a payment to the credit grantor in relation to the mortgage.

(2) Notwithstanding subsection (1), a person entitled to disclosure may waive the 2-day period and, in that case, the credit grantor shall give the initial disclosure statement to the person before the first occurrence of an event described in paragraph (1)(a) or (b).

(3) A waiver referred to in subsection (2) shall be in writing and signed by the borrower.

Calculation of prepayment refund or credit

10. The portion of each non-interest finance charge that shall be refunded or credited to the borrower under section **52**(3) of the Act is determined by the equation:

$$C = \frac{U}{T} \times F$$

where

C = is the amount to be credited;

U = is the length of the unexpired portion of the term at the time of prepayment;

T = is the length of the period between the time the non-interest finance charge was imposed and the end of the term; and

F = is the amount of the non-interest finance charge.

Initial disclosure

credit
