Electrical Bulletin

Information for Electrical Contractors

Information contained in this bulletin does not negate the responsibility of Electrical Contractors, and others, to comply with the requirements of the Canadian Electrical Code, the *Public Safety Act*, the *Electrical Regulations* and the supply authority.

RE: Electrical Permit Applications – Private Sewage Disposal Approvals

Electrical permit applications for “cabin areas” or “Local Service Districts (LSDs)” and any areas with potential private sewage disposal issues will cause a delay in the processing of electrical permit applications.

Service NL will require verification that a Certificate of Approval (CofA) has been provided to a property owner as per the Provincial “*Sanitation Regulations* under the *Health and Community Services Act*”. If Service NL records verify that a CofA for a property is already in place then the electrical permit request will be processed immediately.

The *Electrical Regulations* under the *Public Safety Act* state “*the chief inspector may refuse to issue an electrical permit for, or authorize a connection to, a premises until the requirements of any other legislation relative to that premises have been satisfied*”.
