

Operating Area Name: Adeytown	Operating Area # CC02505
NFS Inventory Map #:	NTS Map #:

Description of Area:

This domestic area is located in Forest Management District 02 (FMD02). The domestic harvesting areas are located in close proximity to various communities and cabin areas throughout the District in order to accommodate the fuelwood/sawlog requirements of the general public.

Harvesting Activities:

Domestic activity will include sawlog and fuelwood harvesting by chainsaw with extraction by snowmobile or ATV primarily during the winter months. Harvesting of hardwoods and softwoods will be permitted in these areas for domestic use with the exception of any treated stands. Total volume permitted for domestic harvest within these areas is <16m³/permit maximum of green timber and deadwood/blowdown. Some small scale commercial harvesting (<50 m³/permit) may be permitted.

Proposed Softwood Volume (5 year): 3200 m³

Permits per year: 40

Silviculture Activities:

Reconnaissance surveys will be carried out on existing and new cutovers and regeneration stands to determine the need for planting. Generally, natural regeneration, following domestic wood harvesting is successful in producing a viable future forest. Harvest areas are periodically monitored to ensure regeneration is satisfactory. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and planting and /or gap planting.

Primary Forest Access Road Construction:

None

Proposed 5 year access road construction: None

Proposed 5 year stream crossings: None

Non timber Considerations and Mitigations:

Deadwood and Blowdowns: The cutting of deadwood and blowdown is permitted in areas outside designated domestic harvest blocks, but not within areas designated for no harvest activity; **Highway Buffer:** No domestic cutting permitted within **100 metres** of public highways, except for deadwood and blowdown; **Waterbodies:** A minimum **30 metre** buffer will be maintained on both sides of all rivers, brooks, ponds or other waterbodies that are shown on 1:50,000 Topographic Maps; **Scheduled Salmon Rivers: 100 metre** no cut buffers along all Scheduled Salmon Rivers; **Cottage Areas:** There will be no cutting within **100 metres** of a cabin development area and **20 metres** of a registered legal cabin. Domestic Cutting permits can be obtained to allow the cutting of timber on a valid "license to occupy"

by the license holder; **Trails:** There will be no cutting within **100 metres** of the T'Railway. There will be no cutting within **30 metres** of a recreational trail identified on a Domestic Map; **Raptor Nest:** No forestry activity is to occur within **800 metres** of a bald eagle or osprey nest during the nesting season (March 15 to July 31) and **200 metres** during the remainder of the year; **Protected Public Water Supply Areas:** Within protected water supplies, there will be no cutting within **150 metres** of the intake pond or stream and no cutting within **75 metres** of the main river channel. There will be no cutting within **50 metres** of all pond and streams flowing into the intake pond or stream.

Proposed 5 year stream crossings: None

Non timber Considerations and Mitigations:

Deadwood and Blowdowns: The cutting of deadwood and blowdown is permitted in areas outside designated domestic harvest blocks, but not within areas designated for no harvest activity; **Highway Buffer:** No domestic cutting permitted within **100 metres** of public highways, except for deadwood and blowdown; **Waterbodies:** A minimum **30 metre** buffer will be maintained on both sides of all rivers, brooks, ponds or other waterbodies that are shown on 1:50,000 Topographic Maps; **Scheduled Salmon Rivers:** **100 metre** no cut buffers along all Scheduled Salmon Rivers; **Cottage Areas:** There will be no cutting within **100 metres** of a cabin development area and **20 metres** of a registered legal cabin.

Domestic Cutting permits can be obtained to allow the cutting of timber on a valid "license to occupy" by the license holder; **Trails:** There will be no cutting within **100 metres** of the T'Railway. There will be no cutting within **30 metres** of a recreational trail identified on a Domestic Map; **Raptor Nest:** No forestry activity is to occur within **800 metres** of a bald eagle or osprey nest during the nesting season (March 15 to July 31) and **200 metres** during the remainder of the year; **Protected Public Water Supply Areas:** Within protected water supplies, there will be no cutting within **150 metres** of the intake pond or stream and no cutting within **75 metres** of the main river channel. There will be no cutting within **50 metres** of all pond and streams flowing into the intake pond or stream.

Operating Area Name: Charleston	Operating Area # CC02548
NFS Inventory Map #:	NTS Map #:

Description of Area:

This domestic area is located in Forest Management District 02 (FMD02). The domestic harvesting areas are located in close proximity to various communities and cabin areas throughout the District in order to accommodate the fuelwood/sawlog requirements of the general public.

Harvesting Activities:

Domestic activity will include sawlog and fuelwood harvesting by chainsaw with extraction by snowmobile or ATV primarily during the winter months. Harvesting of hardwoods and softwoods will be permitted in these areas for domestic use with the exception of any treated stands. Total volume permitted for domestic harvest within these areas is <16m³/permit maximum of green timber and deadwood/blowdown. Some small scale commercial harvesting (<50 m³/permit) may be permitted.

Proposed Softwood Volume (5 year): 1840 m³

Permits per year: 23

Silviculture Activities:

Reconnaissance surveys will be carried out on existing and new cutovers and regeneration stands to determine the need for planting. Generally, natural regeneration, following domestic wood harvesting is successful in producing a viable future forest. Harvest areas are periodically monitored to ensure regeneration is satisfactory. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and planting and /or gap planting.

Primary Forest Access Road Construction:

None

Proposed 5 year access road construction: None

Proposed 5 year stream crossings: None

Non timber Considerations and Mitigations:

NFS Inventory Map #:	NTS Map #:

Description of Area:

This domestic area is located in Forest Management District 02 (FMD02). The domestic harvesting areas are located in close proximity to various communities and cabin areas throughout the District in order to accommodate the fuelwood/sawlog requirements of the general public.

Harvesting Activities:

Domestic activity will include sawlog and fuelwood harvesting by chainsaw with extraction by snowmobile or ATV primarily during the winter months. Harvesting of hardwoods and softwoods will be permitted in these areas for domestic use with the exception of any treated stands. Total volume permitted for domestic harvest within these areas is <16m³/permit maximum of green timber and deadwood/blowdown. Some small scale commercial harvesting (<50 m³/permit) may be permitted.

Proposed Softwood Volume (5 year): 3200 m³

Permits per year: 40

Silviculture Activities:

Reconnaissance surveys will be carried out on existing and new cutovers and regeneration stands to determine the need for planting. Generally, natural regeneration, following domestic wood harvesting is successful in producing a viable future forest. Harvest areas are periodically monitored to ensure regeneration is satisfactory. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and planting and /or gap planting.

Primary Forest Access Road Construction:

None

Proposed 5 year access road construction: None

Proposed 5 year stream crossings: None

Non timber Considerations and Mitigations:

Deadwood and Blowdowns: The cutting of deadwood and blowdown is permitted in areas outside designated domestic harvest blocks, but not within areas designated for no harvest activity; **Highway Buffer:** No domestic cutting permitted within **100 metres** of public highways, except for deadwood and blowdown; **Waterbodies:** A minimum **30 metre** buffer will be maintained on both sides of all rivers, brooks, ponds or other waterbodies that are shown on 1:50,000 Topographic Maps; **Scheduled Salmon Rivers: 100 metre** no cut buffers along all Scheduled Salmon Rivers; **Cottage Areas:** There will be no cutting within **100 metres** of a cabin development area and **20 metres** of a registered legal cabin. Domestic Cutting permits can be obtained to allow the cutting of timber on a valid "license to occupy"

by the license holder; **Trails:** There will be no cutting within **100 metres** of the T'Railway. There will be no cutting within **30 metres** of a recreational trail identified on a Domestic Map; **Raptor Nest:** No forestry activity is to occur within **800 metres** of a bald eagle or osprey nest during the nesting season (March 15 to July 31) and **200 metres** during the remainder of the year; **Protected Public Water Supply Areas:** Within protected water supplies, there will be no cutting within **150 metres** of the intake pond or stream and no cutting within **75 metres** of the main river channel. There will be no cutting within **50 metres** of all pond and streams flowing into the intake pond or stream.

Proposed 5 year stream crossings: None

Non timber Considerations and Mitigations:

Deadwood and Blowdowns: The cutting of deadwood and blowdown is permitted in areas outside designated domestic harvest blocks, but not within areas designated for no harvest activity; **Highway Buffer:** No domestic cutting permitted within **100 metres** of public highways, except for deadwood and blowdown; **Waterbodies:** A minimum **30 metre** buffer will be maintained on both sides of all rivers, brooks, ponds or other waterbodies that are shown on 1:50,000 Topographic Maps; **Scheduled Salmon Rivers: 100 metre** no cut buffers along all Scheduled Salmon Rivers; **Cottage Areas:** There will be no cutting within **100 metres** of a cabin development area and **20 metres** of a registered legal cabin. Domestic Cutting permits can be obtained to allow the cutting of timber on a valid "license to occupy"

by the license holder; **Trails:** There will be no cutting within **100 metres** of the T'Railway. There will be no cutting within **30 metres** of a recreational trail identified on a Domestic Map; **Raptor Nest:** No forestry activity is to occur within **800 metres** of a bald eagle or osprey nest during the nesting season (March 15 to July 31) and **200 metres** during the remainder of the year; **Protected Public Water Supply Areas:** Within protected water supplies, there will be no cutting within **150 metres** of the intake pond or stream and no cutting within **75 metres** of the main river channel. There will be no cutting within **50 metres** of all pond and streams flowing into the intake pond or stream.

Operating Area Name: Lethbridge Access Road	Operating Area # CC02518
NFS Inventory Map #:	NTS Map #:

Description of Area:

This domestic area is located in Forest Management District 02 (FMD02). The domestic harvesting areas are located in close proximity to various communities and cabin areas throughout the District in order to accommodate the fuelwood/sawlog requirements of the general public.

Harvesting Activities:

Domestic activity will include sawlog and fuelwood harvesting by chainsaw with extraction by snowmobile or ATV primarily during the winter months. Harvesting of hardwoods and softwoods will be permitted in these areas for domestic use with the exception of any treated stands. Total volume permitted for domestic harvest within these areas is <16m³/permit maximum of green timber and deadwood/blowdown. Some small scale commercial harvesting (<50 m³/permit) may be permitted.

Proposed Softwood Volume (5 year): 560 m³

Permits per year: 7

Silviculture Activities:

Reconnaissance surveys will be carried out on existing and new cutovers and regeneration stands to determine the need for planting. Generally, natural regeneration, following domestic wood harvesting is successful in producing a viable future forest. Harvest areas are periodically monitored to ensure regeneration is satisfactory. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and planting and /or gap planting.

Primary Forest Access Road Construction:

None

Proposed 5 year access road construction: None

Proposed 5 year stream crossings: None

Non timber Considerations and Mitigations:

NFS Inventory Map #:	NTS Map #:

Description of Area:

This domestic area is located in Forest Management District 02 (FMD02). The domestic harvesting areas are located in close proximity to various communities and cabin areas throughout the District in order to accommodate the fuelwood/sawlog requirements of the general public.

Harvesting Activities:

Domestic activity will include sawlog and fuelwood harvesting by chainsaw with extraction by snowmobile or ATV primarily during the winter months. Harvesting of hardwoods and softwoods will be permitted in these areas for domestic use with the exception of any treated stands. Total volume permitted for domestic harvest within these areas is <16m³/permit maximum of green timber and deadwood/blowdown. Some small scale commercial harvesting (<50 m³/permit) may be permitted.

Proposed Softwood Volume (5 year): 1680 m³

Permits per year: 21

Silviculture Activities:

Reconnaissance surveys will be carried out on existing and new cutovers and regeneration stands to determine the need for planting. Generally, natural regeneration, following domestic wood harvesting is successful in producing a viable future forest. Harvest areas are periodically monitored to ensure regeneration is satisfactory. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and planting and /or gap planting.

Primary Forest Access Road Construction:

None

Proposed 5 year access road construction: None

Proposed 5 year stream crossings: None

Non timber Considerations and Mitigations:

Deadwood and Blowdowns: The cutting of deadwood and blowdown is permitted in areas outside designated domestic harvest blocks, but not within areas designated for no harvest activity; **Highway Buffer:** No domestic cutting permitted within **100 metres** of public highways, except for deadwood and blowdown; **Waterbodies:** A minimum **30 metre** buffer will be maintained on both sides of all rivers, brooks, ponds or other waterbodies that are shown on 1:50,000 Topographic Maps; **Scheduled Salmon Rivers: 100 metre** no cut buffers along all Scheduled Salmon Rivers; **Cottage Areas:** There will be no cutting within **100 metres** of a cabin development area and **20 metres** of a registered legal cabin. Domestic Cutting permits can be obtained to allow the cutting of timber on a valid "license to occupy"

by the license holder; **Trails:** There will be no cutting within **100 metres** of the T'Railway. There will be no cutting within **30 metres** of a recreational trail identified on a Domestic Map; **Raptor Nest:** No forestry activity is to occur within **800 metres** of a bald eagle or osprey nest during the nesting season (March 15 to July 31) and **200 metres** during the remainder of the year; **Protected Public Water Supply Areas:** Within protected water supplies, there will be no cutting within **150 metres** of the intake pond or stream and no cutting within **75 metres** of the main river channel. There will be no cutting within **50 metres** of all pond and streams flowing into the intake pond or stream.

Proposed 5 year stream crossings: None

Non timber Considerations and Mitigations:

Deadwood and Blowdowns: The cutting of deadwood and blowdown is permitted in areas outside designated domestic harvest blocks, but not within areas designated for no harvest activity; **Highway Buffer:** No domestic cutting permitted within **100 metres** of public highways, except for deadwood and blowdown; **Waterbodies:** A minimum **30 metre** buffer will be maintained on both sides of all rivers, brooks, ponds or other waterbodies that are shown on 1:50,000 Topographic Maps; **Scheduled Salmon Rivers:** **100 metre** no cut buffers along all Scheduled Salmon Rivers; **Cottage Areas:** There will be no cutting within **100 metres** of a cabin development area and **20 metres** of a registered legal cabin.

Domestic Cutting permits can be obtained to allow the cutting of timber on a valid "license to occupy" by the license holder; **Trails:** There will be no cutting within **100 metres** of the T'Railway. There will be no cutting within **30 metres** of a recreational trail identified on a Domestic Map; **Raptor Nest:** No forestry activity is to occur within **800 metres** of a bald eagle or osprey nest during the nesting season (March 15 to July 31) and **200 metres** during the remainder of the year; **Protected Public Water Supply Areas:** Within protected water supplies, there will be no cutting within **150 metres** of the intake pond or stream and no cutting within **75 metres** of the main river channel. There will be no cutting within **50 metres** of all pond and streams flowing into the intake pond or stream.

Operating Area Name: Stock Cove	Operating Area # CC02564
NFS Inventory Map #:	NTS Map #:

Description of Area:

This domestic area is located in Forest Management District 02 (FMD02). The domestic harvesting areas are located in close proximity to various communities and cabin areas throughout the District in order to accommodate the fuelwood/sawlog requirements of the general public.

Harvesting Activities:

Domestic activity will include sawlog and fuelwood harvesting by chainsaw with extraction by snowmobile or ATV primarily during the winter months. Harvesting of hardwoods and softwoods will be permitted in these areas for domestic use with the exception of any treated stands. Total volume permitted for domestic harvest within these areas is <16m³/permit maximum of green timber and deadwood/blowdown. Some small scale commercial harvesting (<50 m³/permit) may be permitted.

Proposed Softwood Volume (5 year): 1360 m³

Permits per year: 17

Silviculture Activities:

Reconnaissance surveys will be carried out on existing and new cutovers and regeneration stands to determine the need for planting. Generally, natural regeneration, following domestic wood harvesting is successful in producing a viable future forest. Harvest areas are periodically monitored to ensure regeneration is satisfactory. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and planting and /or gap planting.

Primary Forest Access Road Construction:

None

Proposed 5 year access road construction: None

Proposed 5 year stream crossings: None

Non timber Considerations and Mitigations:

NFS Inventory Map #:	NTS Map #:

Description of Area:

This domestic area is located in Forest Management District 02 (FMD02). The domestic harvesting areas are located in close proximity to various communities and cabin areas throughout the District in order to accommodate the fuelwood/sawlog requirements of the general public.

Harvesting Activities:

Domestic activity will include sawlog and fuelwood harvesting by chainsaw with extraction by snowmobile or ATV primarily during the winter months. Harvesting of hardwoods and softwoods will be permitted in these areas for domestic use with the exception of any treated stands. Total volume permitted for domestic harvest within these areas is <16m³/permit maximum of green timber and deadwood/blowdown. Some small scale commercial harvesting (<50 m³/permit) may be permitted.

Proposed Softwood Volume (5 year): 3200 m³

Permits per year: 40

Silviculture Activities:

Reconnaissance surveys will be carried out on existing and new cutovers and regeneration stands to determine the need for planting. Generally, natural regeneration, following domestic wood harvesting is successful in producing a viable future forest. Harvest areas are periodically monitored to ensure regeneration is satisfactory. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and planting and /or gap planting.

Primary Forest Access Road Construction:

None

Proposed 5 year access road construction: None

Proposed 5 year stream crossings: None

Non timber Considerations and Mitigations:

Deadwood and Blowdowns: The cutting of deadwood and blowdown is permitted in areas outside designated domestic harvest blocks, but not within areas designated for no harvest activity; **Highway Buffer:** No domestic cutting permitted within **100 metres** of public highways, except for deadwood and blowdown; **Waterbodies:** A minimum **30 metre** buffer will be maintained on both sides of all rivers, brooks, ponds or other waterbodies that are shown on 1:50,000 Topographic Maps; **Scheduled Salmon Rivers: 100 metre** no cut buffers along all Scheduled Salmon Rivers; **Cottage Areas:** There will be no cutting within **100 metres** of a cabin development area and **20 metres** of a registered legal cabin. Domestic Cutting permits can be obtained to allow the cutting of timber on a valid "license to occupy"

by the license holder; **Trails:** There will be no cutting within **100 metres** of the T'Railway. There will be no cutting within **30 metres** of a recreational trail identified on a Domestic Map; **Raptor Nest:** No forestry activity is to occur within **800 metres** of a bald eagle or osprey nest during the nesting season (March 15 to July 31) and **200 metres** during the remainder of the year; **Protected Public Water Supply Areas:** Within protected water supplies, there will be no cutting within **150 metres** of the intake pond or stream and no cutting within **75 metres** of the main river channel. There will be no cutting within **50 metres** of all pond and streams flowing into the intake pond or stream.
