Dear Peter Dolomount:

**RE: Flat Bay Quarry (the Project) Water Resource Management Plan**

On January 11, 2023, the Flat Bay Quarry Project was released from environmental assessment, subject to conditions. One condition requires the proponent, Turf Point Resources Ltd., to submit a Water Resources Management Plan (WMP) to be approved by the Water Resources Management Division prior to commencing any work related to the Project. The WMP was required to include a description of the following:

- measures that will be deployed, such as vegetative cover, filter strip, silt curtain or other sediment control measures, to ensure that onsite drainage, surface run-off and discharge, and/or dewatering water that leaves the site conforms to the requirements of the Environmental Control Water and Sewage Regulations, 2003; and
- the water control measures are to be deployed onsite for daily operations and high precipitation events.

On January 30, 2023, you submitted the WMP on behalf of Turf Point Resources Ltd. The WMP was reviewed by the Water Resources Management Division, was found to meet the information requirements and was approved on February 7, 2023. As a result of this approval, I am advising you that the above condition of release has been met.

Turf Point Resources Ltd. must abide by all commitments made in the WMP and in all environmental assessment submissions. Any significant change to the WMP or to the Project must be submitted to the department prior to construction to be reviewed for regulatory requirements, including environmental assessment.

If you have any questions about environmental assessment, please contact Joanne Sweeney, Director of the Environmental Assessment Division, at (709)729-0673 or email [joannesweeney@gov.nl.ca](mailto:joannesweeney@gov.nl.ca).

Sincerely,

A handwritten signature in blue ink, appearing to read "Bernard Davis", written over a horizontal line.
