Down By the Sea Resort

A completely wheelchair accessible resort built right on the ocean with an astounding *180 degree view, this resort offers some wonderful features including an indoor pool, hot tub, games room and a library/music room filled with Newfoundland books, music and instruments. A computer, internet and fax service are all available.

All rooms have a three piece bathroom, three have a jacuzzi tub. Each room has a private telephone, satellite television and DVD players - movies are available upon request.

Breakfast is included but is available at your leisure, you're on vacation so we have no desire to make you rise any earlier than you wish. We have a professional cook in residence available to offer meals upon request. In fact, we'll even set up a romantic candlelit dinner in our sunroom overlooking the ocean just for you.

Some of the wonderful things you can see and do in the area includes boat tours, hiking, mountain biking, diving, sport fishing, golf, bird watching, berry picking, museums and much more! You can see the site of the Truxton/Pollux disaster with a telescope from the deck of the house and watch the boats go by if you want to just relax around the resort. No matter what your mood is and what the weather is doing, we have something for everyone.

We will have souvenirs available at the resort, all made right here on the Burin Peninsula and will also serve as a an art gallery with paintings supplied by local artists, everything will also be made available on the internet through the resort's website.

Please note that I've spent four years planning every detail of this resort, much of it based on personal

traveling experience. I can offer special personal attention with a resort this size at a reasonable price. My goal is to present as much Newfoundland tradition and culture as I can in a tasteful way while providing much needed accessible accommodations here on the Peninsula.
