Department of Environment
Government of Newfoundland & Labrador
P.O. Box 8700,
St. John's, Newfoundland.
A1B 4J6

Attention: Honorable Kevin Aylward
Minister of Environment

Dear Minister Aylward:

Subject: Revision to the Environmental Registration for the Proposed Installation of a Service Line Crossing, Hampden River, White Bay, as required under Section 28, Environmental Assessment Regulations.

After much consideration, Newfoundland & Labrador Hydro ("*Hydro*") has revised its plans to install a service line across Hampden River, a Scheduled Atlantic Salmon river in White Bay on the Great Northern Peninsula. The change in route is being made to stay within the existing road corridor and across the road bridge. By making this change, new easements will not be required nor approval under the Navigable Water Protection Act. Overall, this revised routing will result in less potential for environmental impacts during construction and operation of the distribution line and will enable Hydro to respond to the request by the Town of Hampden in a more timely manner.

Please find enclosed forty (40) copies of the drawing and map showing the proposed reroute of this distribution line. The drawing and map attached replaces the drawing and map in the original registration. We apologize for any inconvenience this revision may have caused. If you have any questions, please do not hesitate to call the undersigned.

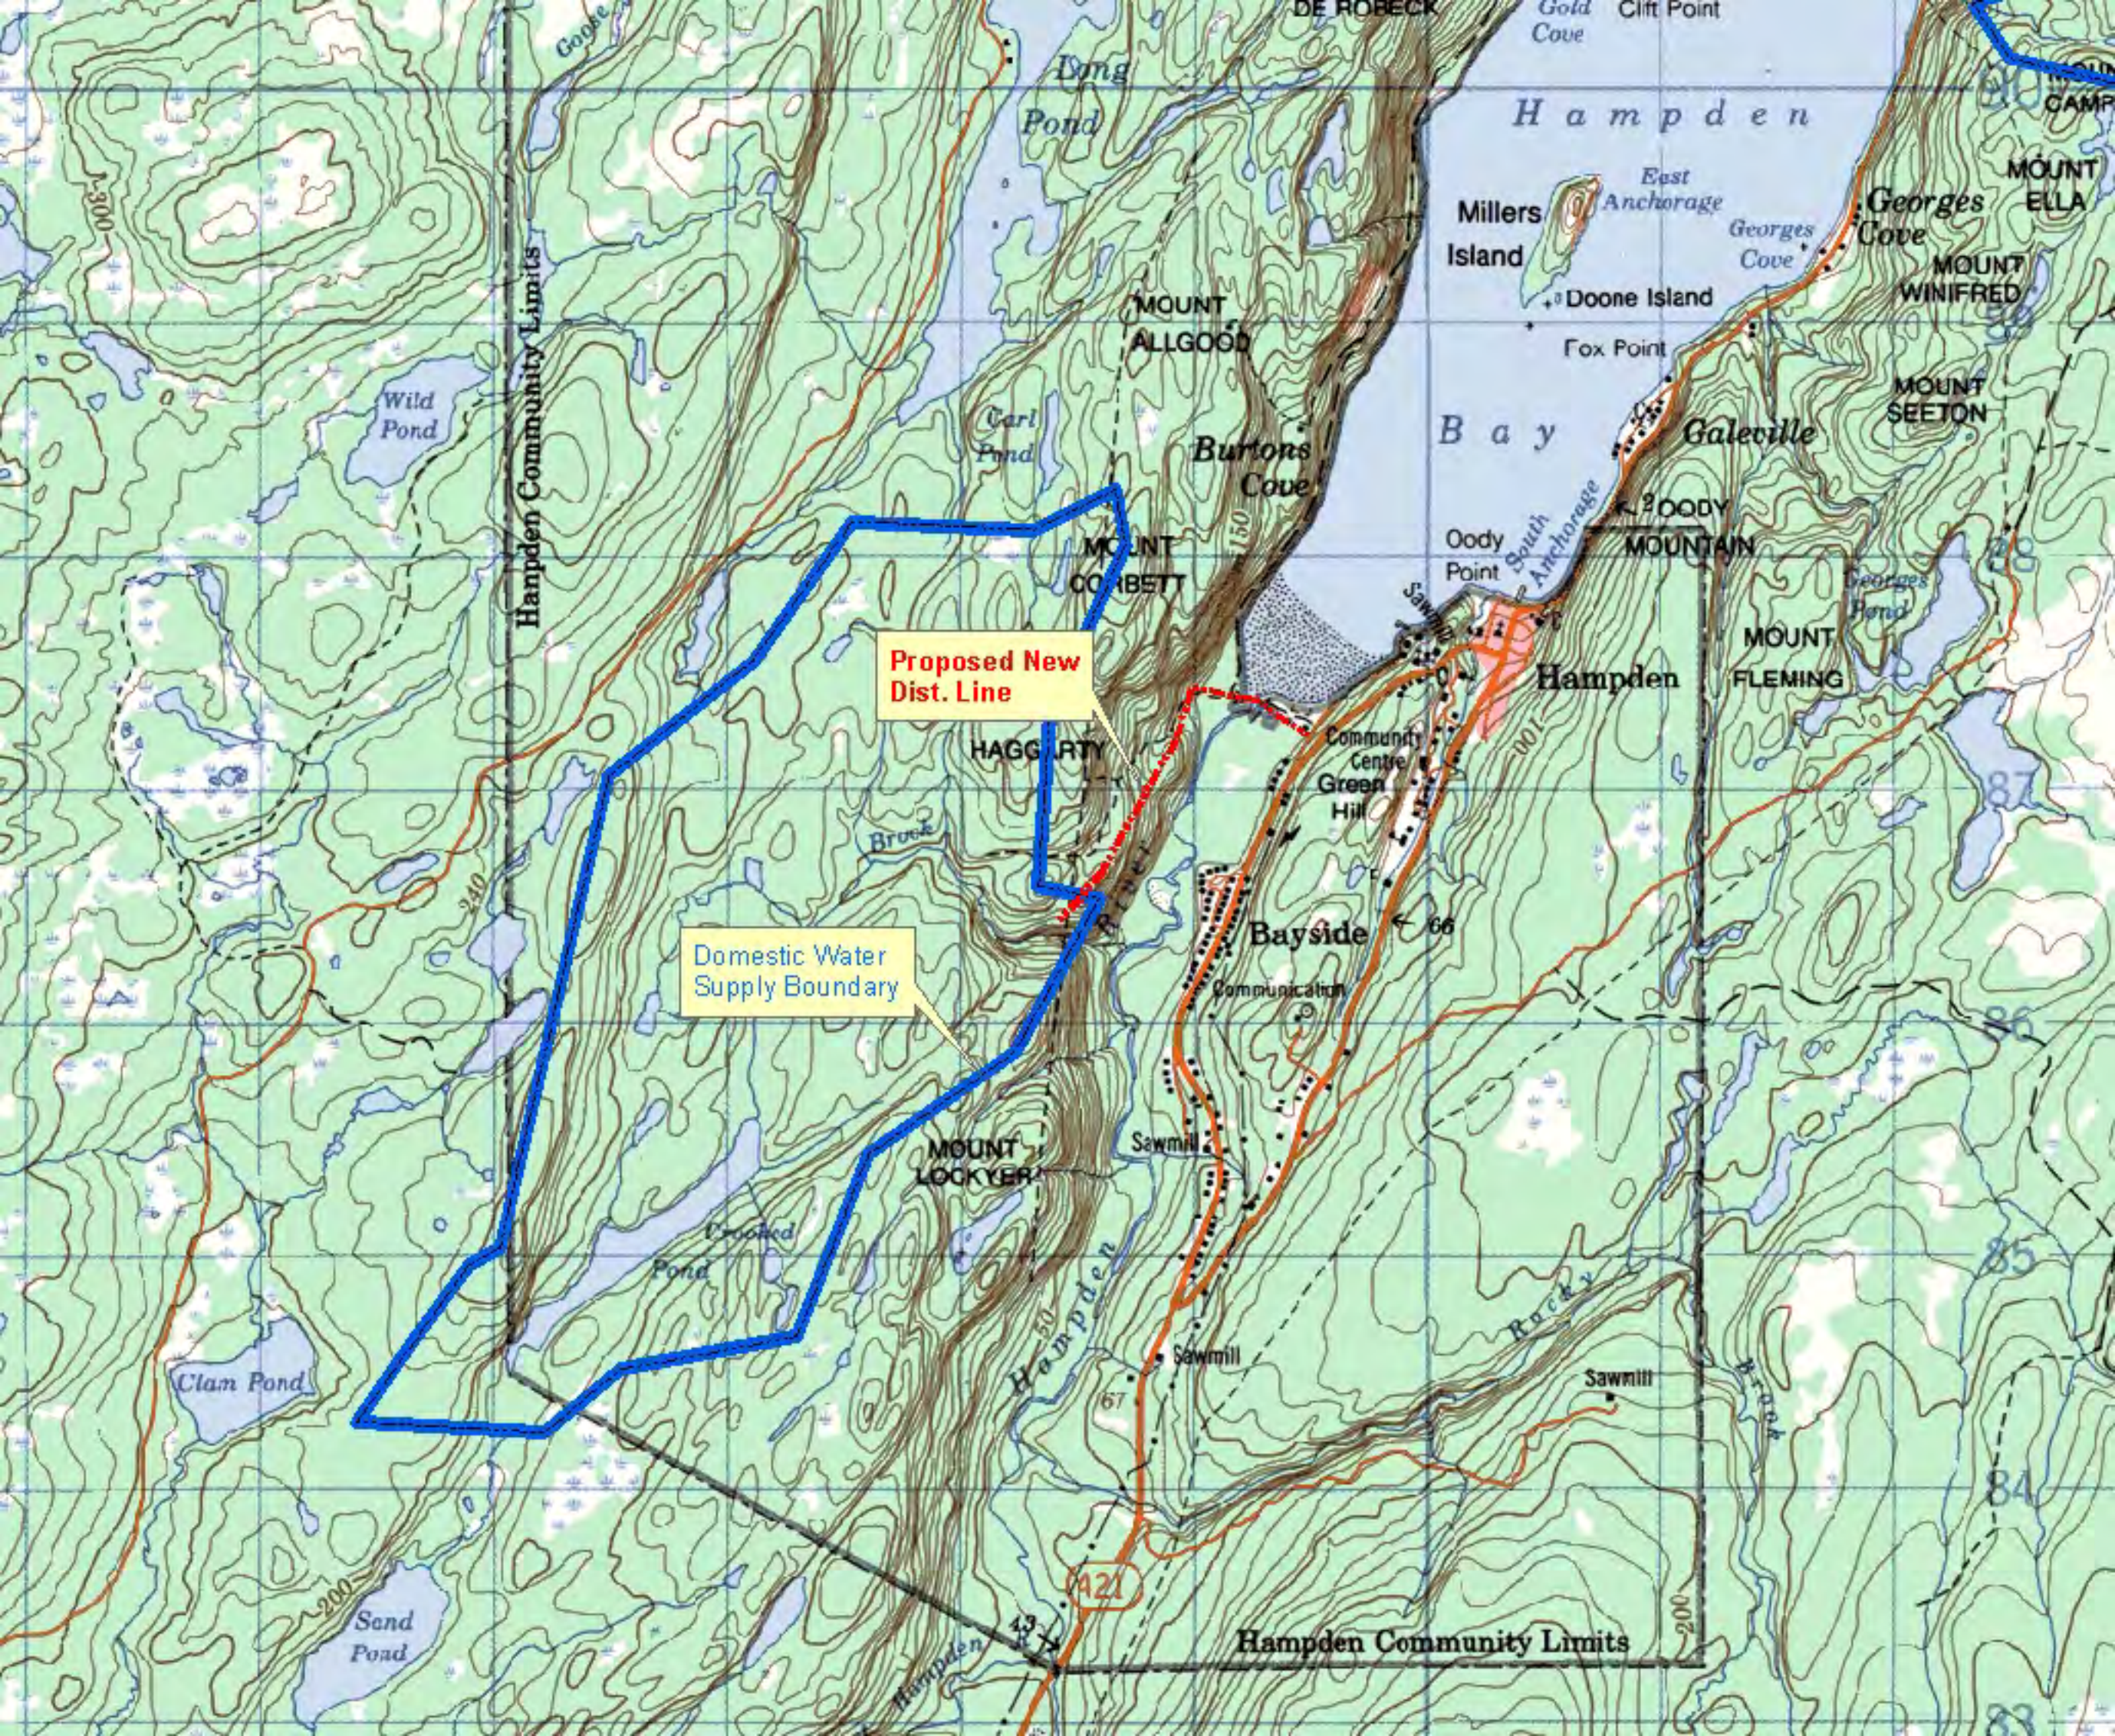

Yours truly,

A handwritten signature in black ink, appearing to read "W. Wells", written over a horizontal line.

William E. Wells

President and Chief Executive Officer
