

With the ever growing concern with the global environment Pels.ws has been working very closely with specialists in this field who in turn have approved this product which offers you the customer a long-term durable manure system, with high capacity but minimal maintenance.

Automatic Manure System

A fully automated manure system from Pels.ws will work for you 365 days if you want it to, it can be programmed to start early in the morning and stop late in the evening, it's entirely up to you, this system will create for a better working environment for not only your staff by keeping smells to an absolute minimum, but can increase the well-being of your mink by keeping down possible flea infestation.
