**Harvest System Description**

Season	Mechanical		Manual		Total Volume (m3)
	System	Volume (m3)	System	Volume (m3)	
Summer/Fall	SW3	66 - 100,000			66 - 100,000
Winter/Spring					

**Rationale for Amendments/Comments**  
 (Operating Area being replaced (if applicable)):

This proposed amendment consist of harvesting a Pre-Commercial Thinning area in the Mill Pond area that is located in Forest Management District 11.

The purpose of this harvest is to conduct operational trials in PCT stands to evaluate volume / hectare of PCT areas, Stand Condition (ie: butt rott, etc.), & harvester productivity

Other stands inside the proposed boundary will be assessed for merchantability, and if deemed merchantable, will be scheduled for harvest upon approval from DNR.
