THE UNDERTAKING:

7.) Nature of Undertaking

The nature of this undertaking is to supply, install, inspect and maintain protective coatings, insulation & internal linings, as well as other specialty products, to North Atlantic Refinery, Petro-Canada, Husky Energy, Exxon Mobil and other offshore businesses in the local area & NL.

8.) Purpose, Rationale, Need for the undertaking:

The main purpose for the undertaking is to create a larger business in the town of Come By Chance to provide local employment & services to the area, and provide needed services to businesses, such as North Atlantic Refining.

Products will be of an industrial type designed for each business's specifications. Consisting of special equipment for applications, giving long life to each asset used in they're businesses.

DESCRIPTION OF THE UNDERTAKING

1.) Geographical Location

The business will be located in the commercial area near the CBC Refinery and South of the TCH. **(SEE ATTACHED MAP.)**

2.) Physical Features

The land will have to be cleared & a lay down area around the building cleared also. **(SEE ATTACHED MAP.)**

3.) Construction

A prefab metal building 60' X 120' will be constructed. **(Attached picture of purposed building style)**

4.) Operation- Description

The business will supply, install, inspect & maintain various types of coatings, insulation & internal linings and other specialized products and services used in the commercial & industrial environments.

5.) Occupations

8 people plus, for shop environment and 8 people plus for field applications and inspections.
Currently there are 3-8 employees.

6.) Project-Related Documents

See Attached Documents

7.) Approval of the undertaking:

The town of Come By Chance has agreed to issue a building permit once all other approvals have been given from provincial departments.

8.) Schedule:

I hope to start construction summer of 2008 & have the business ready for the construction phase of the new refinery, LNG at Whiffen Head, and North Atlantic Refinery.

Please understand the land dimensions applied for are largely laydown and safe access areas for boom truck, forklift, etc....

FUNDING:

All funding for this project will be grants or other government monies.

Date: FEB. 29th/2008
