

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-N-1	
NFS Inventory Map #: 264-23		NTS Map #: 13F9	
Description of Area:	The 19-N-1 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (172 ha) block of spruce and fir.		
Harvesting Activity:	The area has never been commercially harvested and it will be harvested by commercial permit for saw logs, energy wood and fuel wood. There may be a combination of summer and winter harvesting and extraction. It is estimated that up to 22,353 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~9.5 km		
Non Timber Considerations And Mitigations:	This area is not visible from the TLH or the community of North West River. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-N-2	
NFS Inventory Map #: 264-23, 264-33		NTS Map #: 13F9	
Description of Area:	The 19-N-2 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (368 ha) block of spruce and fir.		
Harvesting Activity:	The area has never been commercially harvested and it will be harvested by commercial permit for saw logs, energy wood and fuel wood. There may be a combination of summer and winter harvesting and extraction. It is estimated that up to 44,795 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~12.0 km		
Non Timber Considerations And Mitigations:	This area is not visible from the TLH or the community of North West River. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-N-3	
NFS Inventory Map #: 264-33, 264-32		NTS Map #: 13F9	
Description of Area:	The 19-N-3 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (359 ha) block of spruce and fir.		
Harvesting Activity:	The area has never been commercially harvested and it will be harvested by commercial permit for saw logs, energy wood and fuel wood. There may be a combination of summer and winter harvesting and extraction. It is estimated that up to 51,320 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~15.0 km		
Non Timber Considerations And Mitigations:	This area is not visible from the TLH or the community of North West River. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-N-4	
NFS Inventory Map #: 263-32, 263-22		NTS Map #: 13F10	
Description of Area:	The 19-N-4 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (281 ha) block of spruce and fir.		
Harvesting Activity:	The area has never been commercially harvested and it will be harvested by commercial permit for saw logs, energy wood and fuel wood. There may be a combination of summer and winter harvesting and extraction. It is estimated that up to 34,581 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~3.0 km		
Non Timber Considerations And Mitigations:	This area is not visible from the TLH and is located off one of the main forest resource roads.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-N-5	
NFS Inventory Map #: 263-32, 263-31		NTS Map #: 13F10	
Description of Area:	The 19-N-5 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (352 ha) block of spruce and fir.		
Harvesting Activity:	The area has never been commercially harvested and it will be harvested by commercial permit for saw logs, energy wood and fuel wood. There may be a combination of summer and winter harvesting and extraction. It is estimated that up to 51,179 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area is not visible from the TLH and is located off one of the main forest resource roads.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-N-6	
NFS Inventory Map #: 263-13, 263-12 287-43		NTS Map #: 13F10	
Description of Area:	The 19-N-6 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (315 ha) block of spruce and fir.		
Harvesting Activity:	The area has been commercially harvested in the past and it will be harvested by commercial permit for saw logs, energy wood and fuel wood. There may be a combination of summer and winter harvesting and extraction. It is estimated that up to 45,399 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~5.5 km		
Non Timber Considerations And Mitigations:	This area is not visible from the TLH and is located off one of the main forest resource roads.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-N-8	
NFS Inventory Map #: 287-43		NTS Map #: 13F7	
Description of Area:	The 19-N-8 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (313 ha) block of spruce and fir.		
Harvesting Activity:	The area has been commercially harvested in the past and it will be harvested by commercial permit for saw logs, energy wood and fuel wood. There may be a combination of summer and winter harvesting and extraction. It is estimated that up to 44,848 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area is not visible from the TLH and is located off one of the main forest resource roads.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-N-9	
NFS Inventory Map #: 287-43, 287-44		NTS Map #: 13F7	
287-33			
Description of Area:	The 19-N-9 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (246 ha) block of spruce and fir.		
Harvesting Activity:	The area has been commercially harvested in the past and it will be harvested by commercial permit for saw logs, energy wood and fuel wood. There may be a combination of summer and winter harvesting and extraction. It is estimated that up to 39,797 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area is not visible from the TLH and is located off one of the main forest resource roads.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-N-10	
NFS Inventory Map #: 287-23, 287-13 287-12		NTS Map #: 13F7	
Description of Area:	The 19-N-10 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (199 ha) block of spruce and fir.		
Harvesting Activity:	The area has been commercially harvested in the past and it will be harvested by commercial permit for saw logs, energy wood and fuel wood. There may be a combination of summer and winter harvesting and extraction. It is estimated that up to 26,253 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area is not visible from the TLH and is located off one of the main forest resource roads.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-N-13	
NFS Inventory Map #: 287-12		NTS Map #: 13F7	
Description of Area:	The 19-N-13 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (427 ha) block of spruce and fir.		
Harvesting Activity:	The area has been commercially harvested in the past and it will be harvested by commercial permit for saw logs, energy wood and fuel wood. There may be a combination of summer and winter harvesting and extraction. It is estimated that up to 55,133 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area is not visible from the TLH and is located off one of the main forest resource roads.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-N-14	
NFS Inventory Map #: 287-12, 287-11		NTS Map #: 13F7	
287-22, 287-21			
Description of Area:	The 19-N-14 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (467 ha) block of spruce and fir.		
Harvesting Activity:	The area has been commercially harvested in the past and it will be harvested by commercial permit for saw logs, energy wood and fuel wood. There may be a combination of summer and winter harvesting and extraction. It is estimated that up to 56,557 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area is not visible from the TLH and is located off one of the main forest resource roads.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-1	
NFS Inventory Map #: 312-44		NTS Map #: 13F2	
Description of Area:	The 19-S-1 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (249 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 33,543 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.5 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-2	
NFS Inventory Map #: 312-44		NTS Map #: 13F2	
Description of Area:	The 19-S-1 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (312 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 44,362 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-3	
NFS Inventory Map #: 312-44		NTS Map #: 13F2	
Description of Area:	The 19-S-3 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (82 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 10,953 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-6	
NFS Inventory Map #: 312-44		NTS Map #: 13F2	
Description of Area:	The 19-S-6 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (221 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 32,126 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-4	
NFS Inventory Map #: 312-44		NTS Map #: 13F2	
Description of Area:	The 19-S-4 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (117 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 17,042 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-5	
NFS Inventory Map #: 312-44		NTS Map #: 13F2	
Description of Area:	The 19-S-5 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (221 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 36,902 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-6	
NFS Inventory Map #: 312-44		NTS Map #: 13F2	
Description of Area:	The 19-S-6 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (221 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 32,126 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-7	
NFS Inventory Map #: 312-44		NTS Map #: 13F2	
Description of Area:	The 19-S-7 commercial cutting block is located within the High boreal forest eco-region. This is a moderately sized (284 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 42,825 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-8	
NFS Inventory Map #: 312-24		NTS Map #: 13F2	
Description of Area:	The 19-S-8 commercial cutting block is located within both the High boreal forest and Low subarctic eco-regions. This is a moderately sized (180 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 20,501 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-9	
NFS Inventory Map #: 312-24		NTS Map #: 13F2	
Description of Area:	The 19-S-9 commercial cutting block is located within both the High boreal forest and Low subarctic eco-regions. This is a moderately sized (138 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 17,942 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~2.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-10	
NFS Inventory Map #: 312-24		NTS Map #: 13F2	
Description of Area:	The 19-S-10 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (311 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 41,435 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~3.5 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-11	
NFS Inventory Map #: 312-24, 312-14		NTS Map #: 13F2	
Description of Area:	The 19-S-11 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (159 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 25,623 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-12	
NFS Inventory Map #: 312-24, 312-14		NTS Map #: 13F2	
Description of Area:	The 19-S-12 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (164 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 21,300 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~2.5 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-13	
NFS Inventory Map #: 312-14		NTS Map #: 13F2	
Description of Area:	The 19-S-13 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (233 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 29,329 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~5.0km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-14	
NFS Inventory Map #: 313-11		NTS Map #: 13C16	
Description of Area:	The 19-S-14 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (132 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 20,254 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.5 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-15	
NFS Inventory Map #: 313-11, 337-41		NTS Map #: 13C16	
Description of Area:	The 19-S-15 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (289 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 36,082 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~2.5 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-16	
NFS Inventory Map #: 337-41		NTS Map #: 13C16	
Description of Area:	The 19-S-16 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (288 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 34,047 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~4.5 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-17	
NFS Inventory Map #: 337-41, 337-42		NTS Map #: 13C16	
Description of Area:	The 19-S-17 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (346 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 41,756 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~8.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-18	
NFS Inventory Map #: 337-32, 337-42		NTS Map #: 13C16	
Description of Area:	The 19-S-18 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (332 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 41,142 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~9.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-19	
NFS Inventory Map #: 337-41, 337-32 337-31		NTS Map #: 13C16	
Description of Area:	The 19-S-19 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (115 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 18,268 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~10.5 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-20	
NFS Inventory Map #: 337-31		NTS Map #: 13C16	
Description of Area:	The 19-S-20 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (75 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 13,469 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~11.5 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-21	
NFS Inventory Map #: 337-42, 337-32		NTS Map #: 13C16	
Description of Area:	The 19-S-21 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (145 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 15,452 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~2.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-22	
NFS Inventory Map #: 337-42, 337-32		NTS Map #: 13C16	
Description of Area:	The 19-S-22 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (126 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 15,041 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-23	
NFS Inventory Map #: 337-32		NTS Map #: 13C16	
Description of Area:	The 19-S-23 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (135 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 17,792 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~3.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-24	
NFS Inventory Map #: 337-33		NTS Map #: 13C16	
Description of Area:	The 19-S-24 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (114 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 13,776 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-25	
NFS Inventory Map #: 337-33, 337-43		NTS Map #: 13C16	
Description of Area:	The 19-S-25 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (302 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 33,285 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~3.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-26	
NFS Inventory Map #: 337-33, 337-43		NTS Map #: 13C16	
Description of Area:	The 19-S-26 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (209 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 24,218 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~4.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-27	
NFS Inventory Map #: 337-33, 337-43		NTS Map #: 13C16	
Description of Area:	The 19-S-27 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (177 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 19,827 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~6.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-28	
NFS Inventory Map #: 313-12, 337-42		NTS Map #: 13C16	
Description of Area:	The 19-S-28 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (182 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 24,492 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.		

Operating Areas Description Sheet

Operating Area: Goose Bay, NL		Operating Area Number: 19-S-30	
NFS Inventory Map #: 313-12, 337-42		NTS Map #: 13C16	
Description of Area:	The 19-S-30 commercial cutting block is located within the Low subarctic eco-region. This is a moderately sized (58 ha) block of spruce and fir. It may be marginally visible from the TLH, however should have little impact on the aesthetics of this area.		
Harvesting Activity:	The area has had previous sporadic harvesting and it will be harvested by commercial permit for sawlogs, energywood and fuelwood. There will be a combination of summer and winter harvesting and extraction. It is estimated that approximately 8,948 m³ of softwood will be harvested out of this area between 2013 and 2017.		
Silviculture Activity:	Regeneration surveys will be conducted to determine level of natural regeneration 3-5 years after harvesting. A possible silviculture prescription of planting and/or gap planting of black spruce seedlings may be applied.		
Primary Forest Access Road Construction:	~1.0 km		
Non Timber Considerations And Mitigations:	This area maybe visible from certain points along the TLH. To try and help mitigate the negative visual effect of harvesting, the Department will implement guidelines as described in detail in the forest management plan.
