Project SJN-00215494-A0

Edinburgh Group Limited  
36 Cabot Avenue  
St. John's, Newfoundland and Labrador  
A1A 1B7

Attention: Mr. Albert Williams, P.Eng.

Dear Sirs:

**RE: Proposed Cottage Lot Development - Ocean Pond Property  
Engineering Report  
Newfoundland and Labrador**

The following information provides data obtained during the period January 9, 2015, to April 24, 2015, as per the requirements of the Guidelines for Assessment of Unserviced Sub-divisions, Government of Newfoundland and Labrador Department of Environment and Conservation.

The proposed development, identified as the Proposed Cottage Lot Development - Ocean Pond Property, is located on the south side of the Trans-Canada Highway (TCH), approximately 10.5 km east of Whitbourne, Newfoundland and Labrador. The site is located approximately 7.2 km southwest from the TCH – Ocean Pond access road intersection. Access is via an existing gravel road through the cottage-developed area of Ocean Pond. Ocean Pond has been developed historically as summer cottages. The development proposes 106 cottage lots (Lot 1 to Lot 37 and Lot 43 to Lot 111), approximately 4542 m<sup>2</sup> in size, over approximately 48.6 hectares (excluding road right-of-ways) of presently-wooded land. Note that Lot 38 to Lot 42 are not being developed due to existing water/bog conditions.

#### **A. Site Location**

Access to the Ocean Pond Property is via an existing gravel road through the cottage developed area of Ocean Pond. The site is currently tree-covered with a low-lying wet bog area located at several locations throughout the proposed development. The

development footprint is approximately 48.6 hectares in size. The proposed development will consist of approximately 3400 m of access roads. A rough grade access road was constructed in 2014, along with necessary ditching and drainage culverts, to gain site access in completing the required engineering monitoring program.

## B. Test Pit Program/Piezometer Installation

A test pit program was completed at the site during the period January 9, 2015 to January 20, 2015, and comprised mechanical excavation of 38 test pits using a CAT 336E excavator, operated by *Contour Atlantic Ltd.* of St. John's, Newfoundland and Labrador. Test pits were located in the field by **exp**, in discussion with the Department of Environment and Conservation, and the Government Services Centre, and are located at Lot 3, Lot 6, Lot 10, Lot 12, Lot 13, Lot 14, Lot 17, Lot 19, Lot 22, Lot 25, Lot 28, Lot 31, Lot 37, Lot 44, Lot 46, Lot 49, Lot 51, Lot 53, Lot 56, Lot 59, Lot 62, Lot 65, Lot 67, Lot 69, Lot 72, Lot 74, Lot 80, Lot 82, Lot 85, Lot 88, Lot 91, Lot 93, Lot 95, Lot 98, Lot 101, Lot 103, Lot 106, and Lot 109. Refer to *Figure 1: Test Pit and Well Location Plan* for details.

Conditions encountered in test pits are summarized as follows:

- An Organic layer ranging from 0.3 m to 2.1 m thick (average: 0.8 m) was encountered at the surface at all test pit locations.
- A dense dark grey Till horizon was encountered beneath the Organic layer at all test pit locations, at depths ranging from 0.3 m to 2.1 m, extending to depths ranging from 2.0 m to 6.8 m below the existing ground surface. The composition of the Till is variable, however, may be generally described as a silty gravelly Sand, to a Sand to a Sand and Gravel, with traces to some silt, and occasional cobbles and boulders. Test pits TP02 to TP15, TP18, TP19, and TP21 to TP40 were terminated in the Till horizon, at depths ranging from 2.0 m to 6.8 m below the existing ground surface.

Particle size analysis was completed on 16 representative samples of the Till deposit, with the following results:

Gravel:	22.4 percent to 48.4 percent	(average: 34.5 percent)
Sand:	55.0 percent to 36.0 percent	(average: 46.8 percent)
Silt:	9.2 percent to 25.5 percent	(average: 18.7 percent).

The natural moisture content of the Till samples tested ranged from 5.6 percent to 11.5 percent (average: 8.7 percent).

Based on observation of excavator performance, the Till is classified as dense in terms of relative density.

- Probable Bedrock was encountered beneath the Till horizon in test pits TP01, TP16, TP17, and TP20, at depths ranging from 2.6 m to 4.8 m below the existing ground surface. Based on published geology for the area, Bedrock is reported to consist of thickly-bedded, light grey sandstone, locally thinly-bedded, greenish-grey to red sandstone, siltstone tuff and conglomerate, Gilbert head Formation, Signal Hill Group (Geology of the Avalon Peninsula, Newfoundland, Map 88-01).
- Groundwater, at time of excavation, was encountered in test pits TP01, TP04, TP06 to TP08, TP11, TP14, TP16, TP21, TP21, TP23, TP28, TP30, TP32, TP33, TP35, and TP40, at depths ranging from 1.2 m to 5.2 m below the existing ground surface. *Table A1: Water Table Monitoring – Proposed Cottage Lot Development – Ocean Pond Property* in the Appendix, provides depth-to-groundwater measurements for the February-April 2015 program. It is noted that the water table may generally be expected to fluctuate seasonally and in response to extended heavy rainfall events.

Note that PVC piezometers were installed at test pit locations for groundwater monitoring. Details of conditions encountered in the test pits are presented on Test Pit Records, attached.

### **C. Groundwater Monitoring program**

A groundwater monitoring program was completed during the period February 9, 2015 to April 24, 2015. Depth to the groundwater level was measured, in general, on a weekly basis at each test pit location.

Details of the groundwater monitoring program, including dates, times, and depth to groundwater measurements at test pit locations measured, are presented in the table, *Table A1: Water Table Monitoring – Proposed Cottage Lot Development - Ocean Pond Property*, attached. Also attached, Daily Observation Data from Environment Canada for the period February 2015 to April 2015.

Summarized range of depth to groundwater from the ground surface, at monitored test pit locations, as follows:

TP01 (depth: 4.0 m)	Depth to groundwater range: 1.37 m to 2.18 m
TP02 (depth: 3.4 m)	Depth to groundwater range: not-encountered
TP03 (depth: 4.0 m)	Depth to groundwater range: 3.33 m to 3.51 m
TP04 (depth: 2.7 m)	Depth to groundwater range: 0.26 m to 0.46 m
TP05 (depth: 3.9 m)	Depth to groundwater range: 2.79 m to 3.65 m
TP06 (depth: 4.0 m)	Depth to groundwater range: 1.40 m to 3.66 m
TP07 (depth: 2.6 m)	Depth to groundwater range: 1.37 m to 2.0 m
TP08 (depth: 2.0 m)	Depth to groundwater range: 0.85 m to 1.54 m
TP09 (depth: 4.3 m)	Depth to groundwater range: 3.60 m to 3.64 m
TP10	Test pit not excavated.
TP11 (depth: 2.7 m)	Depth to groundwater range: 0.48 m to not-encountered (1 occasion)
TP12 (depth: 5.6 m)	Depth to groundwater range: 5.3 m to 5.55 m
TP13	Test pit not excavated.
TP14 (depth: 5.8 m)	Depth to groundwater range: 4.30 m to 4.77 m
TP15 (depth: 5.8 m)	Depth to groundwater range: 5.53 m to 5.86 m
TP16 (depth: 2.6 m)	Depth to groundwater range: 0.33 m to 0.60 m
TP17 (depth: 4.8 m)	Depth to groundwater range: not-encountered
TP18 (depth: 4.2 m)	Depth to groundwater range: 3.06 m to 3.10 m
TP19 (depth: 2.1 m)	Depth to groundwater range: 0.34 m to 0.48 m
TP20 (depth: 2.7 m)	Depth to groundwater range: 2.0 m to not-encountered) (7 occasions)
TP21 (depth: 2.7 m)	Depth to groundwater range: surface to 1.01 m
TP22 (depth: 4.0 m)	Depth to groundwater range: 2.56 m to 3.34 m
TP23 (depth: 5.0 m)	Depth to groundwater range: 4.58 m to 5.09 m
TP24 (depth: 3.9 m)	Depth to groundwater range: 3.13 m to 3.71 m
TP25 (depth: 3.6 m)	Depth to groundwater range: 3.41 m to not-encountered (7 occasions)
TP26 (depth: 3.9 m)	Depth to groundwater range: 3.66 m to 3.74 m
TP27 (depth: 3.3 m)	Depth to groundwater range: 2.98 m to not-encountered (10 occasions)
TP28 (depth: 2.0 m)	Depth to groundwater range: 0.37 m to 0.42 m
TP29 (depth: 3.8 m)	Depth to groundwater range: 3.57 m to not-encountered (10 occasions)
TP30 (depth: 2.0 m)	Depth to groundwater range: 1.38 m to 1.58 m
TP31 (depth: 3.6 m)	Depth to groundwater range: 3.59 m to not-encountered (8 occasions)
TP32 (depth: 2.4 m)	Depth to groundwater range: surface to 0.76 m
TP33 (depth: 2.6 m)	Depth to groundwater range: 3.68 m to 0.80 m
TP34 (depth: 4.5 m)	Depth to groundwater range: 3.89 m to 4.65 m
TP35 (depth: 6.7 m)	Depth to groundwater range: 3.64 m to 4.77 m

TP36 (depth: 4.2 m)	Depth to groundwater range: not-encountered
TP37 (depth: 2.7 m)	Depth to groundwater range: 1.44 m to 3.50 m
TP38 (depth: 2.4 m)	Depth to groundwater range: 2.60 m to 2.80 m
TP39 (depth: 2.4 m)	Depth to groundwater range: 1.30 m to 2.37 m
TP40 (depth: 2.0 m)	Depth to groundwater range: 0.39 m to 0.56 m.

#### **D. Site Soils/Percolation**

Percolation testing was completed at 12 test pit locations, as follows: TP05, TP06, TP09, TP16, TP20, TP21, TP22, TP25, TP29, TP30, TP36, and TP39, resulting in T-values (percolation rate) of 46, 28, 5, 15, 60, 53, 15, 3, 5, 36, and 28, respectively. The range of T- values, 3 to 60, meets the range of percolation rates specified in *Private Sewage Disposal and Water Supply Standards* as an acceptable soil for disposal fields. It is noted that, in the final design process for septic systems, percolation testing will be required by individuals purchasing building lots to confirm T-values for the individual building lot and septic location.

#### **E. Groundwater Supply (potable water)**

A Level 1 and a Level 2 Groundwater Assessment Study have been completed for this development, and provide details of the surrounding groundwater usage. The area, in general, is serviced mostly by individual dug wells (there may be drilled wells in the area). It is expected this development will be serviced by dug wells. Details are provided under separate cover.

#### **F. Proposed Development and Recommendations**

The details of centre-line grades for roadways and lot elevations have yet to be determined and, therefore, the final requirement (location/elevation) for septic field design may vary from lot to lot. Current existing centre-line elevations have been evaluated as part of this submission.

Based on the depths to groundwater encountered and monitored, and the soil conditions (T-value), the site is acceptable for private sewage disposal systems. It is apparent that the depth to groundwater for building lots on site will vary. Many lots within the development will allow for the installation of a standard in-situ septic tank and disposal field design per the specifications provided in the Department of Government Services *Private Sewage Disposal, and Water Supply Standards*

document. Note also, in some situations (depending on final design grades/site T-values), lot grading, and/or groundwater depth, may require a backfill material to bring the lot to grade, and there may be a requirement to install engineered fill system design for sewage disposal, per the specifications per the *Private Sewage Disposal, and Water Supply Standards* document.

It is noted that individuals purchasing building lots in the development will be required to provide a sewage disposal system design to the Department of Government Services for review and approval, as prepared by an GSC approved designer. The design must meet specifications as provided in the *Private Sewage Disposal, and Water Supply Standards* document. Site/Lot conditions will dictate the appropriate design requirement.

We trust this submission meets your current requirements. Should you have any questions or require clarification on any aspect, please contact our office.

Yours very truly,

exp Services Inc.

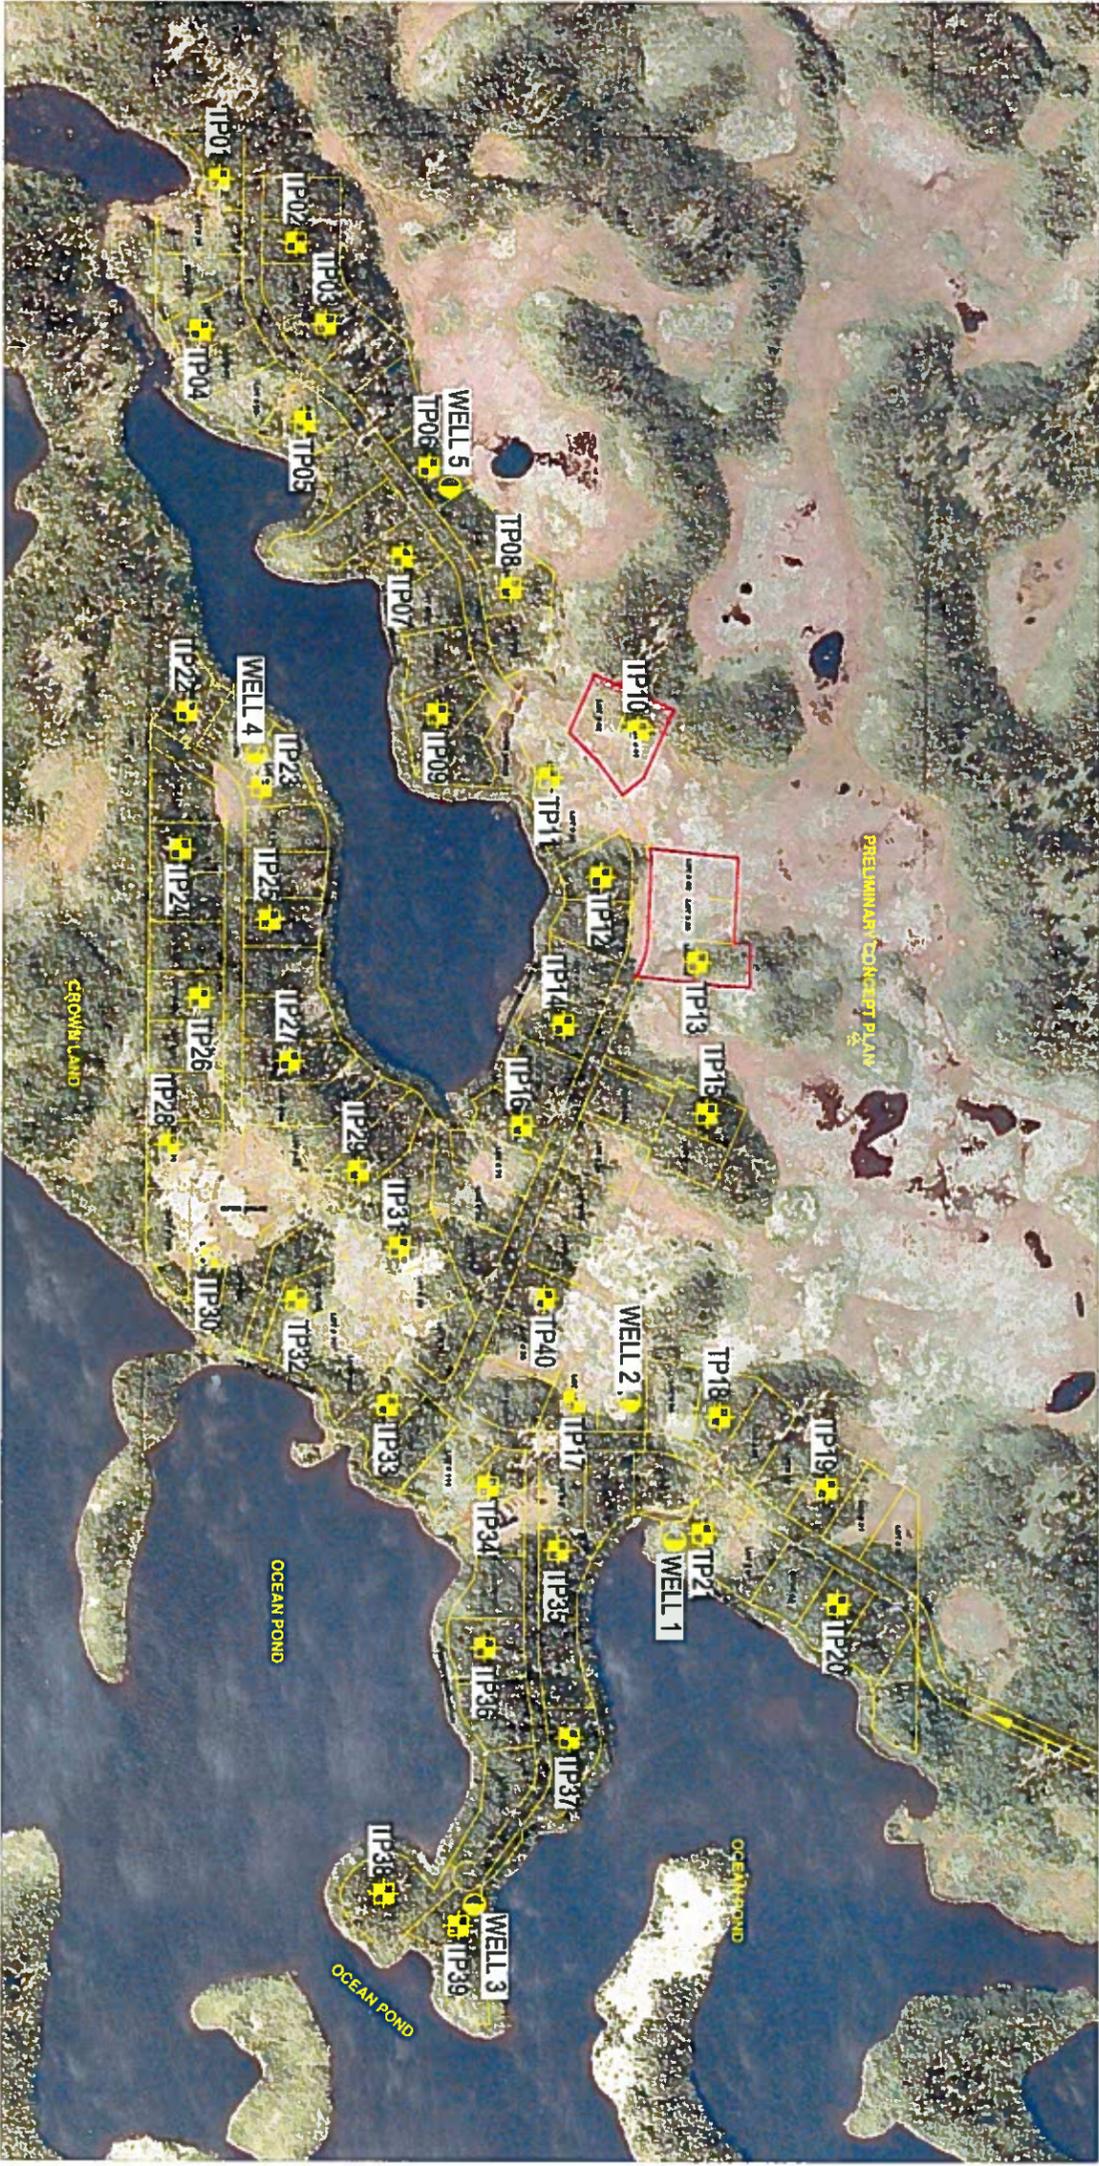

William G. Melendy, M.A.Sc., P.Eng.  
Group Manager,  
Geotechnical/Environmental Engineering

**NOTES**

- Groundwater encountered on five occasions, otherwise, not encountered in test pit during monitoring program.
- Groundwater encountered on two occasions, otherwise, not encountered in test pit during monitoring program.
- Groundwater encountered on four occasions, otherwise, not encountered in test pit during monitoring program.
- Groundwater not encountered in test pit during the monitoring program. Depth to bottom of test pit from surface shown.
- Test pit elevation below existing road grade in meters.
