

Operating Area Name: Bad Pond (B-4C)	Operating Area #: CC01003
	NTS Map #: 1N/6-1N/3

Description of Area:

This area of crown land is located to the north of the town of Mount Carmel and is accessed from the Salmonier Line through the Deer Park Vineland Road Local Service District. It is located to the Northwest of Quirks Ridge around Bad Pond, Johns Pond, and Big Pond. The terrain varies from flat to rolling terrain. The area is located in the Avalon Forest Ecoregion.

Harvesting Activities:

Commercial activity will include sawlog and fuelwood harvesting using mechanical harvester with extraction by forwarder. A small domestic harvest and/or gathering permit may be issued post-harvest.

Area is predominantly blowdown.

Commercial softwood volume available for harvest: 3,560.80 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

2.47 km of class D road will need to be constructed.

Decommissioning will take place post-harvest and silviculture

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Work closely with the Deer Park Vineland Road Local Service District to ensure proper signage on road network to ensure safety is top priority during operations.

Operating Area Name: Barrets Pond (K-14C)	Operating Area #: CC01028
	NTS Map #: 1N/ 5

Description of Area:

This area of crown land is located west of the community of Whitbourne. It is South of Peak Pond, East of Little Gut Pond, and West of Barretts Pond. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 3,999.47 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None – 1.5 km of class D constructed in 2011.

Road will be decommissioned when harvest and silviculture completed

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Beaver Pond (I-12C)	Operating Area #: CC01036
	NTS Map #: 1N/ 11

Description of Area:

This area of crown land is located east of the community of Hopeall. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 10,792.75 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Beaver Pond (K-3C)	Operating Area #: CC01033
	NTS Map #: 1N/ 5

Description of Area:

This area of crown land is located west of the community of Whitbourne. It is East of Beaver Pond and accessed off the TCH to the North. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 11,695.09 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Big Round Pond (I-5C)	Operating Area #: CC01040
	NTS Map #: 1N/ 11

Description of Area:

This area of crown land is located southeast of the community of Hearts Delight. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 10,140.22 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Black Duck Gully (A-5C)	Operating Area #: CC01004
	NTS Map #: 1N/6

Description of Area:

This area of crown land is located to north of the TCH and east of Veteran's Memorial Highway. It is accessed from the TCH. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 8,636.62 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

1.19 km of class D road will need to be constructed.

Decommissioning will take place post-harvest and silviculture

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Blaketown (K-5C)	Operating Area #: CC01031
	NTS Map #: 1N/ 5

Description of Area:

This area of crown land is located west of the community of Blaketown and Whitbourne and Northeast of Peak Pond. It is accessed off the TCH to the North. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 2,212.51 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Brimstone Pond (I-2C)	Operating Area #: CC01049
	NTS Map #: 1N/ 14

Description of Area:

This area of crown land is located East of the community of Hearts Desire and Northeast of Pierces and Brimstone Pond. The area is accessed from the Hanging Hill Forest Access Road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 1,228.38 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Country Pond (D-1C)	Operating Area #: CC01019
	NTS Map #: 1N/ 7

Description of Area:

This area of crown land is located west of the communities of Bay bulls and Witless Bay. It is accessed off the Southern Shore highway on the Gully Pond Forest Access Road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 3,825.19 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None.

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Duff's Straight (F-3C)	Operating Area #: CC01024
	NTS Map #: 1N/ 6

Description of Area:

This area of crown land is located east of Holyrood Bay and west of Butter Pot Provincial Park. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 4,764.50 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Foxtrap Pasture (F-2C)	Operating Area #: CC01053
	NTS Map #: 1N/ 6

Description of Area:

This area of crown land is located east of the community of Seal cove and east of the TCH. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 6,504.36 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Goulds Brook (J_2C)	Operating Area #: CC01005
	NTS Map #: 1N/6

Description of Area:

This area of crown land is located to north of the TCH and south of Makinsons. It is accessed from the TCH. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 3,456.97 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Gull Pond (I-8C)	Operating Area #: CC01039
	NTS Map #: 1N/ 11

Description of Area:

This area of crown land is located southeast of the community of Whiteway. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 4,031.76 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Healeys Pond (A-1C)	Operating Area #: CC01027
	NTS Map #: 1N/5

Description of Area:

This area of crown land is located to the west of the community of Whitbourne. Access is from the Placentia Junction road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 1,109.76 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Hearts Delight Brook (I-14C)	Operating Area #: CC01046
	NTS Map #: 1N/14

Description of Area:

This area of crown land is located to the east of Hearts Delight on the Baie De Verde Peninsula. It is accessed off the Hanging Hill forest access road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 1,012.28 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Henders (B-1C)	Operating Area #: CC01010
	NTS Map #: 1N/3 – 1N/6

Description of Area:

This area of crown land is located to the west of the Deer Park Vineland Road Local Service District. It is accessed off the Salmonier Line road using the Henders road network. It encompasses a large area of previously managed secondary cycle forests. The area is located in the Avalon Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Stands were pre-commercially and commercially thinned in the 1970's-1980's.

Commercial softwood volume available for harvest: 38,813.28 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Trials will also be conducted using broad cast seeding of hardwood species, white/yellow birch.

Primary Forest Access Road Construction:

2.15 km of class D road. Road will be decommissioned upon completion of harvesting and silviculture activities.

Area already contains older road network which will be utilized where possible or re-constructed on an as needed basis.

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Work closely with the Deer Park Vineland Road Local Service District to ensure proper signage on road network to ensure safety is top priority during operations.

Special attention to recreational users from the Deer Park area to ensure no conflict from harvesting operations.

Operating Area Name: Island Pond Gully (J-1C)	Operating Area #: CC01041
	NTS Map #: 1N/ 11

Description of Area:

This area of crown land is located east of the community of Whiteway and west of Harbour Grace. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 3,559.62 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Island Pond Ridge (I-7C)	Operating Area #: CC01008
	NTS Map #: 1N/11

Description of Area:

This area of crown land is located on the East of the community of Dildo. It is near Island Pond and to the Northwest of Big Gull pond. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 4,890.37 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Keough's Gully (B-5C)	Operating Area #: CC01013
	NTS Map #: 1N/6

Description of Area:

This area of crown land is located to the East of Whitbourne and West of Salmonier line. It is located in the Central Avalon and accessed on the Fox Marsh Forest Access Road to the South of the TCH. The area is located in the Avalon Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 2,007.18 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Kings Pond (I-10C)	Operating Area #: CC01045
	NTS Map #: 1N/ 11

Description of Area:

This area of crown land is located east of the community of Cavendish. It is accessed off Country Road onto Soper's Forest Access Road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 4235.09 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Little Ridge (K-2C)	Operating Area #: CC01026
	NTS Map #: 1N/ 5

Description of Area:

This area of crown land is located west of the community of Old Shop and east of the community of Chapel Arm. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 1,702.32 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Long Harbour (K-7C)	Operating Area #: CC01034
	NTS Map #: 1N/ 5

Description of Area:

This area of crown land is located northeast of the community of Community of Long Harbour. It is accessed of the Long Harbour road to the east. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 18,775.86 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Munn Block South (A-3C)	Operating Area #: CC01006
	NTS Map #: 1N/6

Description of Area:

This area of crown land is located to south of the TCH and east of Whitbourne. It is accessed from the TCH. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 2,091.18 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Murphys Pond (E-2C)	Operating Area #: CC01052
	NTS Map #: 1N/7

Description of Area:

This area of crown land is located to the west of the town of the Goulds and South of the City of Mount Pearl and St. John's. It is accessed from powers road/ northern pond road. It is located near Murphys Pond, Big Northern Pond and to the Southeast of Cochrane Pond. The terrain is relatively flat. The area is located in the Maritime Barrens Ecoregion.

Harvesting Activities:

Commercial activity will include manual harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 761.29 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Mushroom Gully (B-3C)	Operating Area #: CC01015
	NTS Map #: 1N/6

Description of Area:

This area of crown land is located to the East of Whitbourne and West of Salmonier line. It is located in the Central Avalon and accessed on the Fox Marsh Forest Access Road to the South of the TCH. The area is located in the Avalon Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 115.23 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Neils Pond (B-2C)	Operating Area #: CC01014
	NTS Map #: 1N/6

Description of Area:

This area of crown land is located to the East of Whitbourne and West of Salmonier line. It is located in the Central Avalon and accessed on the Fox Marsh Forest Access Road to the South of the TCH. The area is located in the Avalon Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 888.91 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Nine Mile Road (B-7C)	Operating Area #: CC01011
	NTS Map #: 1N/4

Description of Area:

This area of crown land is located to the north east of Harricott. The area is located in the Avalon Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical or manual harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 284.22 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Nord Pond (A-4C)	Operating Area #: CC01012
	NTS Map #: 1N/6

Description of Area:

This area of crown land is located to north of the TCH and west of Salmonier. It is accessed from Avondale Access Road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 5,733.07 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Northern Pond (E-3C)	Operating Area #: CC01022
	NTS Map #: 1N/7

Description of Area:

This area of crown land is located to the west of the town of the Goulds and South of the City of Mount Pearl and St. John's. It is accessed from Powers Road/Northern Pond Road. It is located near south of Cochrane Pond. The area is located in the Maritime Barrens Ecoregion.

Harvesting Activities:

Commercial activity will include manual harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 3,419.87 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Old Witless Bay Line (D-2C)	Operating Area #: CC01018
	NTS Map #: 1N/7

Description of Area:

This area of crown land is located off the Witless Bay Line Road. It is between Country Pond to the west and Gull Pond to the East. Access is off the Witless Bay Line to the south. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 14,802.23 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

Total of 0.97 km of class D road construction.

Road will be decommissioned upon completion of harvesting and silviculture activities.

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Paddy's Pond (F-4C)	Operating Area #: CC01021
	NTS Map #: 1N/ 7

Description of Area:

This area of crown land is located south of the community of Paradise, north of Paddy's Pond and east of the TCH. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 10,226.95m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Peak Pond (K-6C)	Operating Area #: CC01050
	NTS Map #: 1N/5

Description of Area:

This area of crown land is located to the west of the town of Whitbourne and is accessed from TCH. It is located to the East of Peak Pond and North of Jones Pond and South of the TCH. The terrain varies from flat to rolling terrain. The area is located in the Maritime Barrens Ecoregion.

Harvesting Activities:

Commercial activity will include sawlog and fuelwood harvesting using manual or mechanical harvester with extraction by forwarder.

Commercial softwood volume available for harvest: 1,550.35 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Petty Harbour Long Pond (E-1C)	Operating Area #: CC01023
	NTS Map #: 1N/ 7

Description of Area:

This area of crown land is located East of the community of Goulds. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 5,055.13 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Pierces Pond A (I-1C)	Operating Area #: CC01047
	NTS Map #: 1N/14

Description of Area:

This area of crown land is located to the East of Hearts Desire and south of Pierces Pond. Access is on the hanging hill forest access road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 835.26 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Pierces Pond (I-13C)	Operating Area #: CC01048
	NTS Map #: 1N/14

Description of Area:

This area of crown land is located to the East of Hearts Desire and north of Pierces Pond. Access is on the hanging hill forest access road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 1,331.81 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Pitchers Pond (I-15C)	Operating Area #: CC01043
NFS Inventory Map #:	NTS Map #: 1N/11

Description of Area:

This area of crown land is located north-east of Whiteway and is accessed from the TCH (Route 1). It is located to the north of Pitchers Pond and south of Camel's Back Pond. The terrain varies from rugged to rolling terrain. The area is located on the Bay De Verde Peninsula and part of the Northeastern Barrens Sub-region of the Maritime Barrens Ecoregion.

Harvesting Activities:

Commercial activity will include sawlog and fuelwood harvesting using chainsaws and/or mechanical harvesters with extraction by forwarder.

Proposed 5 year commercial softwood harvest: 786.24 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on existing and new cutovers and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None.

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Rantem Cove (K-1C)	Operating Area #: CC01025
	NTS Map #: 1N/12

Description of Area:

This area of crown land is located on the Isthmus of the Avalon near Rantem Cove and Little Southern Harbour. It is accessed to the East of the TCH. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 3,758.34 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Rod and Gun Club (F-6C)	Operating Area #: CC01001
	NTS Map #: 1N/ 6

Description of Area:

This area of crown land is located south of the St. John's Rod and Gun Club. Access is on the clubs access road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 1,666.86 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None.

Non Timber Considerations and Mitigations:

Will work closely with the Rod and Gun Club to ensure minimal impacts on their operations and ensure existing road remains in the same condition post-harvest.

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Snows Pond (J-3C)	Operating Area #: CC01007
	NTS Map #: 1N/ 6

Description of Area:

This area of crown land is located off Veterans Memorial Highway just north of the TCH. It is accessed on the Penny's Pit Forest Access Road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 955.24 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

Total of 1.80 km of class D road construction.

Road will be decommissioned upon completion of harvesting and silviculture activities

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Spread Eagle Brook (K-4C)	Operating Area #: CC01032
	NTS Map #: 1N/ 5

Description of Area:

This area of crown land is located west of the community of Whitbourne. It is East of Beaver Pond and north of Peak Pond. It is accessed off the TCH to the North. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 363.02 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Spread Eagle (K-8C)	Operating Area #: CC01030
	NTS Map #: 1N/ 6

Description of Area:

This area of crown land is located West of the community of Whitbourne. It is West of Spread Eagle Peak and East of Second Island Pond. It is accessed off the TCH on the Spread Eagle Forest Access Road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 18,858.50 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

2.73 km of class D road will need to be constructed.

Decommissioning will take place post-harvest and silviculture

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Spread Eagle Peak (K-12C)	Operating Area #: CC01029
	NTS Map #: 1N/ 5

Description of Area:

This area of crown land is located West of the community of Whitbourne. It is South of Peak Pond and North of Little gut Pond. It is accessed off the TCH on the Spread Eagle Forest Access Road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 1,118.07 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Suttons Pond (I-11C)	Operating Area #: CC01035
	NTS Map #: 1N/ 11

Description of Area:

This area of crown land is located east of the community of Dildo and Hopeall. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 11,510.60 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

0.99 km of class D road will need to be constructed.

Decommissioning will take place post-harvest and silviculture

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Tilt Hill Gully (I-4C)	Operating Area #: CC01044
	NTS Map #: 1N/ 11

Description of Area:

This area of crown land is located east of the community of Cavendish. It is accessed off Country Road from Heart's Delight. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 4,087.36 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Tors Cove (D-4C)	Operating Area #: CC01016
	NTS Map #: 1N/ 7

Description of Area:

This area of crown land is located west of the community of Tor's Cove. It is accessed off the Southern Shore highway. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 6,922.33 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Tower Road (A-2C)	Operating Area #: CC01002
	NTS Map #: 1N/6

Description of Area:

This area of crown land is located to the west of the Deer Park Vineland Road Local Service District. It is accessed off the Salmonier Line road using the Henders/ tower road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual and mechanical harvesting of sawlogs and fuelwood with extraction by forwarder.

Pre-commercially thinned stand, second cycle forest with very high amount of mortality resulting in a predominantly salvage harvest.

Commercial softwood volume available for harvest: 28,791.41 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Trials will also be conducted using broad cast seeding of hardwood species, white/yellow birch.

Primary Forest Access Road Construction:

2.13 km of class D road will need to be constructed.

Decommissioning will take place post-harvest and silviculture

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Work closely with the Deer Park Vineland Road Local Service District to ensure proper signage on road network to ensure safety is top priority during operations.

Special attention to recreational users from the Deer Park area to ensure no conflict from harvesting operations.

Operating Area Name: White Hill Pond (I-6C)	Operating Area #: CC01038
	NTS Map #: 1N/ 11

Description of Area:

This area of crown land is located east of the communities of Dildo, Hopeall and Greens Harbour. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 8,122.63 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: White Hills Pond (I-9C)	Operating Area #: CC01037
	NTS Map #: 1N/11

Description of Area:

This area of crown land is located to the east Greens Harbour on the Baie De Verde Peninsula. It is accessed off Route 80. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual harvesting of sawlogs and fuelwood with extraction by forwarder.

Commercial softwood volume available for harvest: 1,511.19 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Witless Bay Country Pond (D-3C)	Operating Area #: CC01017
	NTS Map #: 1N/ 7

Description of Area:

This area of crown land is located west of the community of Witless Bay. Access is on the Gully Pond Forest Access Road. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 11,374.31 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

1.71 km of class D road construction planned for 2014.

Decommissioning planned post-harvest and silviculture.

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Wych Hazel Pond (F-1C)	Operating Area #: CC01020
	NTS Map #: 1N/ 7

Description of Area:

This area of crown land is located south of the community of Manuels and Conception Bay and North of Wych Hazel Pond. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 2,636.67m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood

Operating Area Name: Yellow Marsh (I-3C)	Operating Area #: CC014042
	NTS Map #: 1N/ 14

Description of Area:

This area of crown land is located Southeast of the community of Hearts Delight. The area is located in the Maritime Forest Ecoregion.

Harvesting Activities:

Commercial activity will include manual or mechanical harvesting of sawlogs and fuelwood with extraction by forwarder or ATV.

Commercial softwood volume available for harvest: 749.24 m³

Silviculture Activities:

Reconnaissance surveys will be carried out on areas harvested and regenerating stands to determine the need for planting and/or thinning. Suitable cutovers that are not satisfactorily regenerated will be candidates for site preparation and/or planting and/or gap planting and suitable regenerating stands will be candidates for thinning.

Primary Forest Access Road Construction:

None

Non Timber Considerations and Mitigations:

All activities will be carried out under strict monitoring ensuring operations are compliant with Environmental Protection Guidelines.

Pre-harvest plans will be conducted to identify any wildlife / non timber considerations

Rare Lichen surveys will be completed pre-harvest

No harvesting of hardwood
