

# Mines Branch response EA 1976 Northeast Aggregate Ltd. Bauline Line quarry

\* area measurements are approximate

light blue (cyan) outlined area = extraction portion of proposed quarry area

yellow outlined area = stockpile and laydown portion of proposed quarry area

pink outlined area = provisional outline of treed expanse required to be preserved in order to substantially reduce visibility from the Bauline Line. Outline of area may be modified by Mines once quarry operations approach the provisional boundary and it can be more precisely determined what treed areas need to be preserved to screen quarry operations from view.

green outlined area = outline of treed expanse required to be preserved in order that the Town of Torbay's required buffer distance with respect to the nearby wetland stewardship zone is observed and to address public concerns about the potential impact of the quarry on the wetland stewardship zone.
