APPENDIX H

Summary of Hydrometric Monitoring Stations and Monitoring
Results

Hydrometric Monitoring Station S1 Summary

Station ID	S1	Instruments Serial #	Levellogger 2012735, Barologger 2012828
Location	Gilling River near Astray Lake inlet; near proposed road crossing	Various Measurements	Temperature, Water Level, Atmospheric Pressure
Installation Date	24-Aug-12	Spot Measurements	Water Quality, Flow
Coordinates	651828.883 E 6059334.877 N	Main Channel:	Clean Winding
Access	Helicopter	Channel Bottom:	Cobblers, Boulders
Landing Point	651790 E 6059278 N	Flood Plain:	Medium to dense bush
Drainage Area	102 km ²	Comments	This station is located near the proposed road crossing and provide baseline flow and water quality data. This station will also continue to provide data during construction and operation of the road. Data downloaded on October 3, 2012 and on July 8, 2013.
Period of Record	August 24th, 2012 - July 8, 2013		
Active	Year Round

Hydrometric Monitoring Station S2 Summary

Station ID	S2	Instruments Serial #	Levellogger 2012733
Location	Unnamed Creek 1 discharge to Petitsikapau Lake, near proposed road crossing	Various Measurements	Temperature, Water Level
Installation Date	24-Aug-12	Spot Measurements	Water Quality, Flow
Coordinates	656166.885 E 6076159.921 N	Main Channel:	Clean, straight
Access	Helicopter	Channel Bottom:	Boulders, rocky
Landing Point	656122 E 6076296 N	Flood Plain:	Medium bush, short grass
Drainage Area	3.27 km ²	Comments	This station is located near proposed road crossing and provide baseline flow and water quality data. This station will also continue to provide data during construction and operation of the road. Data downloaded on October 3, 2012. Unable to download on July 8, 2013 due to connection error.
Period of Record	August 24th, 2012 - October 3rd 2012		
Active	Year Round

Hydrometric Monitoring Station S3 Summary

Station ID	S3	Instruments Serial #	Levellogger 2012744
Location	Unnamed Creek 2 discharges to Petitsikapau Lake, located west of Tailing Management Facility	Various Measurements	Temperature, Water Level
Installation Date	24-Aug-12	Spot Measurements	Water Quality, Flow
Coordinates	656365.256 E 6079417.511 N	Main Channel:	Clean, Winding
Access	Helicopter	Channel Bottom:	Some weeds, cobbles, boulder
Landing Point	654934 E 6079185 N	Flood Plain:	Medium bush, short grass
Drainage Area	5.06 km ²	Comments	This station is located southwest of tailings management facility and modular beneficiation plant and provide baseline flow and water quality data. This station will also continue to provide data during construction, operation and decommissioning of tailings management facility and beneficiation plants. Station S3 was vandalized around September 22, 2012 (Bear). During the October 3, 2012 field visit, the station was stabilized. Data downloaded on October 3, 2012 and July 8, 2013.
Period of Record	August 24th, 2012 - July 8, 2013		
Active	Year Round

Hydrometric Monitoring Station S4 Summary

Station ID	S4	Instruments Serial #	Levellogger 2012706, Barologger 2012830
Location	Unnamed Creek 3- outlet of Joyce Lake; 2 km southeast of Joyce Lake outlet	Various Measurements	Temperature, Water Level, Atmospheric Pressure
Installation Date	23-Aug-12	Spot Measurements	Water Quality, Flow
Coordinates	660544.742 E 6084123.33 N	Main Channel:	Clean, Winding
Access	Helicopter	Channel Bottom:	Soft, Fine materials, weeds, debris
Landing Point	660643 E 6084048 N	Flood Plain:	Medium to dense bush, short grass
Drainage Area	3.03 km ²	Comments	This station is located at outlet of Joyce Lake and provide baseline flow and water quality data. This station will also continue to provide data during construction, operation and decommissioning open pits around the Joyce Lake. Data downloaded on October 2, 2012 and on July 7, 2013.
Period of Record	August 23rd, 2012 to July 7, 2013		
Active	Year Round

Monitored Water Level and Flow at Station S4

Hydrometric Monitoring Station L1 Summary

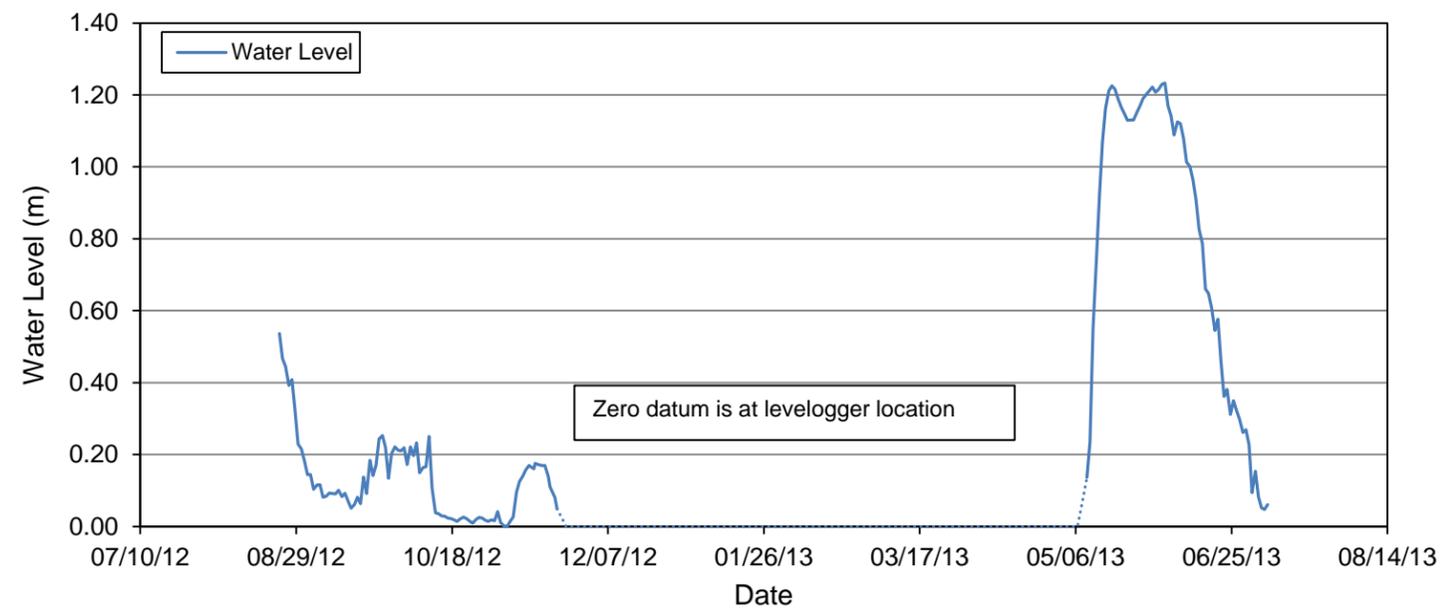

Station ID	L1	Instruments Serial #	Levellogger 2012738
Location	Northwest corner of Petitskapau Lake	Various Measurements	Temperature, Water Level
Installation Date	23-Aug-12	Spot Measurements	Water Quality
Coordinates	658147.151 E 6077322.216 N	Lake Bottom and Surrounding area	Lake bottom filled with boulders, not much vegetation around
Access	Helicopter		
Landing Point	658128 E 6077312 N	Comments	This station located in Petitskapau Lake which will receive potentially discharge from tailings management facility. This station will provide baseline water level and water quality data and will continue to provide data during the construction, operation and decommissioning tailings management facility. Station experienced minor vandalism. ABS pipe bended over slightly from its original set up in August. Data downloaded on October 2, 2012 and July 7, 2013.
Drainage Area	km ²		
Period of Record	August 23rd, 2012 - July 7, 2013		
Active	Year Round		

Map: L1 location

Monitored Water Level at Station L1

Hydrometric Monitoring Station L2 Summary

Station ID	L2	Instruments Serial #	Levellogger 2012708
Location	Unnamed Lake connected to Iron Arm (by a channel); East of Low Grade Stockpile	Various Measurements	Temperature, Water Level
Installation Date	24-Aug-12	Spot Measurements	Water Quality
Coordinates	659177.457 E 6082195.966 N	Lake Bottom and Surrounding area	Surrounded by dense bush and trees, soft lake bottom with fine materials, heavy vegetation on the banks
Access	Helicopter		
Landing Point	658932 E 6082215 N		
Drainage Area	2.79 km ²	Comments	This station located in a small waterbody that will potentially receive discharge from low grade stock pile, this station will provide baseline water level and water quality data and will continue to provide data during construction, operation and rehabilitation of low grade stock pile. Data downloaded on October 2, 2012 and on July 7, 2013.
Period of Record	August 24th, 2012 - July 7, 2013		
Active	Year Round		

Map: L2 location

Monitored Water Level at Station L2

Hydrometric Monitoring Station L3 Summary

Station ID	L3	Instruments Serial #	Levellogger 2012701
Location	Joyce Lake, close to pit 2	Various Measurements	Temperature, Water Level
Installation Date	23-Aug-12	Spot Measurements	Water Quality
Coordinates	658970.92 E 6086062.868 N	Lake Bottom and Surrounding area	Surrounded by scattered bush, lake bottom with gravels and cobbles, vegetation on the banks
Access	Helicopter		
Landing Point	658943 E 6086096 N	Comments	This station located in Joyce Lake which will potentially affected by open pit. This station will provide baseline water level and water quality data and continue to provide data during the construction , operation and rehabilitation of open pit. Station L3 moved locations on June 6, 2013. Data downloaded on October 2, 2012 and on July 7, 2013
Drainage Area	1.82 km ²		
Period of Record	August 23rd, 2012 - July 7, 2013		
Active	Year Round

Monitored Water Level at Station L3

Hydrometric Monitoring Station L4 Summary

Station ID	L4	Instruments Serial #	Levellogger 2012740
Location	Attikamagen Lake , north of Settling Pond and Waste Rock Stockpile	Various Measurements	Temperature, Water Level
Installation Date	23-Aug-12	Spot Measurements	Water Quality
Coordinates	656837.409 E 6088835.361 N	Lake Bottom and Surrounding area	Surrounded by dense bush, lake bottom with cobbles and boulders, heavy vegetation on the bank
Access	Helicopter		
Landing Point	654835 E 6088824 N	Comments	This station located in Attikamagen Lake and will potentially receiving discharge from waste rock and stock pile. This station will provide baseline water level and water quality data and continue to provide data during the construction , operation and rehabilitation of waste rock and stock pile.Data downloaded on October 2, 2012. Unable to download on July 7, 2013 due to connection error.
Drainage Area	km ²		
Period of Record	August 23rd, 2012 - October 2nd, 2012		
Active	Year Round

Note:

1. CWQG- Canadian Water Quality Guidelines for the Protection of Aquatic Life
2. Color - The mean absorbance of filtered water samples at 456 nm shall not be significantly higher than the seasonally adjusted expected value for the system under consideration.
3. Strong Acid Dissoc. Cyanide (CN)- strong-acid dissociable cyanide
4. Total Cadmium CWQG limit is adjusted by the hardness of the sample, for more information, please go to http://st-ts.ccme.ca/?lang=en&factsheet=20#aql_fresh_concentration
5. Total Copper CWQG limit is adjusted by the hardness of the sample, a minimum CWQG of 2 µg/L regardless of water hardness, for more information please go to http://st-ts.ccme.ca/?lang=en&factsheet=71#aql_fresh_concentration
6. Total Lead CWQG limit is adjusted by the hardness of the sample, a minimum CWQG of 1 µg/L regardless of water hardness, for more information please go to http://st-ts.ccme.ca/?lang=en&factsheet=124#aql_fresh_concentration
7. Total Nickel CWQG limit is adjusted by the hardness of the sample, a minimum CWQG of 25 µg/L regardless of water hardness, for more information please go to http://st-ts.ccme.ca/?lang=en&factsheet=139#aql_fresh_concentration
8. NC- Not Calculated , due to the parameter used for calculation is under detection limit
9. Total Suspended Solids - for clear flow, maximum increase of 25 mg/L from background levels for any short -term exposure(24 hr period), maximum average of 5 mg/L from background levels for longer term exposures (e.g., inputs lasting between 24 hr and 30 days).
10. Turbidity - for clear flow, maximum increase of 8 NTUs from background levels for a short - term exposure (e.g., 24 hr period). Maximum average increase of 2 NTUs from background levels for a long term exposure (e.g., 30 days period)
11. Values in Italic Bold are adjusted to half values of the detection limit in the report for analytical purpose

Note:

1. CWQG- Canadian Water Quality Guidelines for the Protection of Aquatic Life
2. Color - The mean absorbance of filtered water samples at 456 nm shall not be significantly higher than the seasonally adjusted expected value for the system under consideration.
3. Strong Acid Dissoc. Cyanide (CN)- strong-acid dissociable cyanide
4. Total Cadmium CWQG limit is adjusted by the hardness of the sample, for more information, please go to http://st-ts.ccme.ca/?lang=en&factsheet=20#aql_fresh_concentration
5. Total Copper CWQG limit is adjusted by the hardness of the sample, a minimum CWQG of 2 µg/L regardless of water hardness, for more information please go to http://st-ts.ccme.ca/?lang=en&factsheet=71#aql_fresh_concentration
6. Total Lead CWQG limit is adjusted by the hardness of the sample, a minimum CWQG of 1 µg/L regardless of water hardness, for more information please go to http://st-ts.ccme.ca/?lang=en&factsheet=124#aql_fresh_concentration
7. Total Nickel CWQG limit is adjusted by the hardness of the sample, a minimum CWQG of 25 µg/L regardless of water hardness, for more information please go to http://st-ts.ccme.ca/?lang=en&factsheet=139#aql_fresh_concentration
8. NC- Not Calculated , due to the parameter used for calculation is under detection limit
9. Total Suspended Solids - for clear flow, maximum increase of 25 mg/L from background levels for any short -term exposure(24 hr period), maximum average of 5 mg/L from background levels for longer term exposures (e.g., inputs lasting between 24 hr and 30 days).
10. Turbidity - for clear flow, maximum increase of 8 NTUs from background levels for a short - term exposure (e.g., 24 hr period). Maximum average increase of 2 NTUs from background levels for a long term exposure (e.g., 30 days period)
11. Values in **Italic Bold** are adjusted to half values of the detection limit in the report for analytical purpose

Chlorine analysis conducted more than 24 hours after sample collection (all samples).

Microbiology: the Iron Arm sample temperature exceeded 12°C when received in laboratory.

Color: DUP analysis was conducted more than 48 hours after sample collection.

Note:

1. CWQG - Canadian Water Quality Guidelines for the Protection of Aquatic Life
2. Turbidity - for clear flow, maximum increase of 8 NTUs from background levels for a short - term exposure (e.g., 24 hr period). Maximum average increase of 2 NTUs from background levels for a long term exposure (e.g., 30 days period)
3. Total Suspended Solids - for clear flow, maximum increase of 25 mg/L from background levels for any short -term exposure(24 hr period), maximum average of 5 mg/L from background levels for longer term exposures (e.g., inputs lasting between 24 hr and 30 days).
4. Cadmium - hardness adjusted CWQG limits, for more information, please go to http://st-ts.ccme.ca/?lang=en&factsheet=20#aql_fresh_concentration
5. Copper - hardness adjusted CWQG limits, for more information, please go to http://st-ts.ccme.ca/?lang=en&factsheet=71#aql_fresh_concentration

<p>Gravel : >2mm Coarse sand : <2mm and >0.2mm Fine sand : <0.2mm and >0.06mm Silt : <0.06mm and >0.004mm Clay and colloids : <0.004mm</p> <p>Note: 1. Canadian Sediment Quality for the Protection of Aquatic Life 2. Interim Sediment Quality Guidelines 3. Probable Effect Level</p>									

Project Name: Joyce Lake Iron Ore Direct Shipping Project
Job No: 121511139.800.003
Subject: Surface Water In-situ Measurements
Instrument: YSI Sonde
Date: 31-Oct-14
Updated By: JA

Stations	Temperature	Conductivity	TDS	Salinity	DO%	DO	DO _{ch}	pH	pH _{mv}
	°C	µs/cm	g/L	SAL	%	mg/L
