

GOVERNMENT OF
NEWFOUNDLAND & LABRADOR
Department of Environment & Conservation

NOTIFICATION

Storage and Handling of Gasoline and Associated Products Regulations, 2003

The above noted regulation has been amended to require that **all*** petroleum storage tank systems which were constructed, installed, altered or operated prior to May 21, 2004 be registered by November 30, 2004. If such systems are not registered they are not permitted to be operated or filled after that date until the storage tank system is registered. The regulation also requires that new storage tank systems be registered prior to the construction, installation, alteration or operation of the system. Again, such systems are not permitted to be filled or operated unless they are registered. These requirements may be found in sections 13 and 18.1 of the regulation.

For further information please contact your local Government Service Centre or visit the following internet address: "www.gov.nl.ca/env/psm".

*These requirements are not for storage tanks which contain used oil or storage tanks which have a capacity of 2500 litres or less and contain heating oil.
