

Be Well Aware *Checklist*

- new wells are properly constructed and located a safe distance from contaminants
- existing wells are properly inspected, maintained, and upgraded as necessary
- potential contaminants are kept a safe distance from your well
- well water is regularly tested for bacteria, and is screened initially and periodically for other contaminants
- unused wells are properly plugged and sealed

Take care of your well and your groundwater – for the sake of your family, your neighbours, and future generations.

Well Aware

A guide to caring for your well and protecting your family's health.

by the Conservation Corps Newfoundland and Labrador in partnership with Green Communities Canada. Financial support provided by Environment Canada's Eco-Action Program and the Newfoundland and Labrador Department of Environment and Conservation.
