Water Resources Management Division

AMENDMENT TO PERMIT

Pursuant to the *Water Resources Act*, SNL 2002 cW-4.01, specifically Section(s) 49

Date: **SEPTEMBER 01, 2016**

File No: 550-01-03-07-079
Permit No: PRO7474-2014
Amendment No: **8**

Permit Holder: **Labrador-Island Link Corporation**
P.O. Box 12800
Hydro Place, 500 Columbus Drive
St. John's NL A1B 0C9

Attention: **Mr. Peter Madden**

Re: **Hawkes Bay - Torrent River PPWSA - Linear Development - Labrador Island Link Corporation**

The original Permit dated MAY 30, 2014 is amended as follows:

Installation of cofferdams instream at non-NTS watercourse AWCd-372d to facilitate construction of structure is permitted based on additional conditions in Appendix A attached.

All other terms and conditions of the original Permit will apply and failure to comply with the terms and conditions of this amendment and the original Permit will render this Permit null and void, place the Permit Holder and their agent(s) in violation of the *Water Resources Act* and make the Permit Holder responsible for taking any remedial measures as may be prescribed by this Department.

GOVERNMENT OF NEWFOUNDLAND AND LABRADOR
Department of Environment and Conservation

File No: 550-01-03-07-079
Permit No: PRO7474-2014
Amendment No: 8

APPENDIX A
Terms and Conditions for Amendment

1. Where pumping is used to bypass flow, cofferdams must be installed both above and below areas of construction. The Permit Holder must provide pumps with sufficient capacity to prevent washout of cofferdams.
2. Cofferdams must be properly designed and constructed of suitable materials to prevent leakage and to resist loss of any material as a result of erosion. Cofferdams must be removed upon completion of their intended function. All material must be removed carefully to prevent disturbance of the water body and to prevent water quality degradation.
3. Water pumped from excavations or work areas, or any runoff or effluent directed out of work sites, must have silt and turbidity removed by settling ponds, filtration, or other suitable treatment before discharging to a body of water. Effluent discharged into receiving waters must comply with the *Environmental Control Water and Sewage Regulations, 2003*.
4. Sediment and erosion control measures must be installed before starting work. All control measures must be inspected regularly and any necessary repairs made if damage is discovered.
5. Inspections of the cofferdam and streambed must be conducted after any significant precipitation event to ensure all sediment and erosion control measures are operating effectively.
6. Pictures must be submitted showing the project site prior to and after development.
