

**Attachment B**  
**Regulatory and Technical Advice from Government Departments/Divisions**

**EA #: 2427 – Jumper’s Brook Snowmobile Trail Re-Route (the Project)**  
**Newfoundland and Labrador Snowmobile Federation (the Proponent)**

---

During the environmental assessment of the Project, provincial and federal government departments and agencies offered the following advice on technical aspects as well as plans, permits, licences, approvals and/or other authorizations that are or may be required before your Project commences. This is not intended to be a comprehensive list, and you are responsible for consulting with federal and provincial government authorities regarding any additional authorizations that may be required by law.

**1 Department of Environment, Conservation and Climate Change - Climate Change Branch**

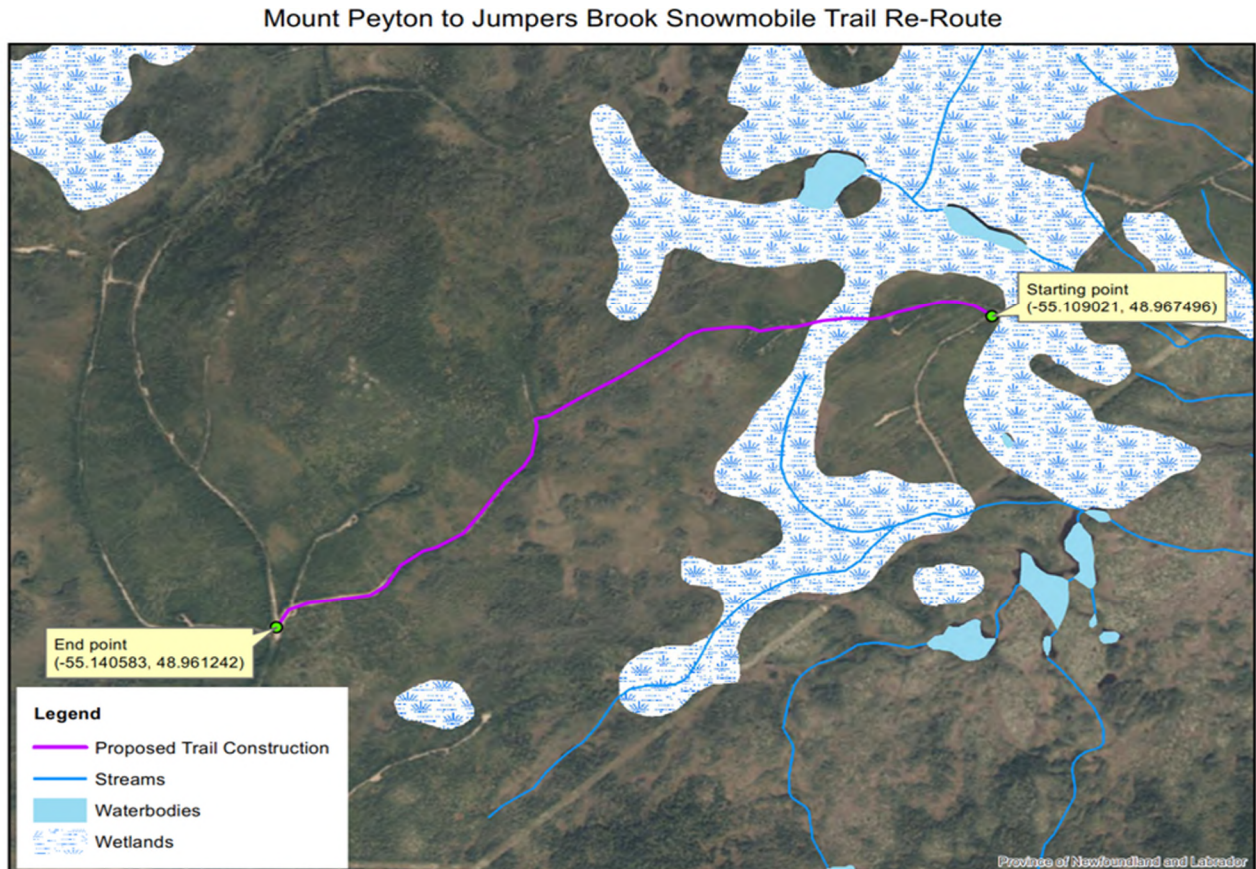

- 1.1 Proponent is advised that all heavy-duty equipment used in the construction and operating phase of this Project should be operated in a manner to maximize fuel efficiency, thereby reducing greenhouse gas emissions that could contribute to climate change. For further information, please contact Climate Change Branch at (709) 729-1485.

**2 Department of Environment, Conservation and Climate Change - Pollution Prevention Division**

- 2.1 Proponent is advised to ensure that wastes are disposed of at a waste disposal facility or facilities approved to accept the type and projected quantity of waste.
- 2.2 Proponent is advised that any proposed fuel cache will require approval by Government Services prior to installation.
- 2.3 Proponent is advised that the storage, handling, and disposal of used and or waste oil shall comply with the Used Oil and Used Glycol Control Regulations.
- 2.4 Proponent is advised that the purchase, transport, storage, possession and handling of pesticides shall comply with the Pesticides Control Regulations.
- 2.5 Proponent is advised that the use of pesticides requires that all label directions are followed including application method and rate, required buffer zones, buffers on scheduled salmon rivers, restricted entry intervals and pre-harvest intervals.
- 2.6 Proponent is advised that any use of halocarbons or other regulated substances in fire suppression, air conditioning or refrigeration systems associated with the proposed activity is subject to the Halocarbon Regulations.
- 2.7 Proponent is advised to consider developing a Contingency Plan specific to the proposed Project to enable a quick and effective response to a spill event. Any spill or leak of gasoline or associated product is to be reported immediately to the Environmental Emergencies Telephone line at 1-800-563-9089. For further information please contact the Pollution Prevention Division at (709) 729-5782.

### 3 Department of Environment, Conservation and Climate Change - Water Resources Management Division

- 3.1 Proponent is advised that according to the 1:50,000 National Topographic Map, the proposed trail route crosses a wetland at one location along its alignment.

- 3.1 Proponent shall apply for and obtain a permit under the **Water Resources Act**, 2002, specifically Section 48 for any work in or within fifteen (15) metres of a body of water (including wetlands) prior to construction.
- 3.2 Proponent shall apply for and obtain a Water Use Licence under the **Water Resources Act** for the use of water from any water source for any purpose prior to construction.
- 3.3 Proponent is advised that any effluent or runoff leaving the site will be required to conform to the requirements of the Environmental Control Water and Sewage Regulations, 2003. For further information, please contact the Water Resources Management Division at (709) 729- 2563.

#### 4 Department of Energy and Mines

- 4.1 Proponent is advised that quarry materials must be obtained from an approved source.
- 4.2 Proponent is advised that the proposed snowmobile trail is located in a region with a history of mineral exploration interest. Mineral exploration is a land use that may take place in the general area in the future and the trail may be used for mineral resource-related purposes. For further information, please contact the Mines Branch of the Department of Energy and Mines at (709) 729-5748.

#### 5 Department of Forestry, Agriculture and Lands

- 5.1 Proponent is advised to operate under the established legislation and regulations of the **Lands Act**. It is the Proponent's responsibility to identify Crown lands required for their undertaking.
- 5.2 Proponent is advised that there may be private land in the area not on record with the Crown Lands Office and that permission is required from the landowners prior to conducting any work planned on private lands.
- 5.3 Proponent is advised that the snowmobile trail construction on Crown land requires the Proponent to obtain the appropriate Crown title before work begins and follow all terms and conditions set forth in any approval letter or issued titles.
- 5.4 Proponent is advised to comply with the Cutting of Timber Regulations under the **Forestry Act**, which requires a Cutting Permit before any timber harvesting or removal. Royalties on wood harvested may be required as per the Timber Royalties Regulations under the **Forestry Act**. Additionally, during the forest fire season, an Operating Permit under Section 13 and a Permit to Burn on or within 300 metres of forest land under Section 3 of the Forest Fire Regulations are required.
- 5.5 Proponent is advised to operate under established legislation and regulations, such as the **Wild Life Act** and Wild Life Regulations, to avoid or minimize adverse impacts.
- 5.6 Proponent is advised that the **Wild Life Act** and the **Migratory Birds Convention Act** and associated regulations prohibit the disturbance or destruction of bird nests and eggs in Newfoundland and Labrador. For more information on avoiding harm to avifauna visit: <https://www.canada.ca/en/environment-climate-change/services/avoiding-harm-migratory-birds.html>
- 5.7 Proponent is advised that Species listed under the **Newfoundland and Labrador Endangered Species Act (NLSEA)** are known to exist in the area of the proposed Project. Section 16 (1) of the **NLESA** states, "A person shall not disturb, harass, injure, or kill an individual of a species designated as threatened, endangered, or extirpated".
- 5.8 Proponent is advised that several species are currently being assessed for designation and listing under the **NLSEA** and the federal **Species at Risk Act**

**(SARA).** The Proponent should be aware that if species that are designated and listed under endangered species legislation are found within the Project area, the **NLESA** and/or the federal **SARA** will apply. The Proponent may be required to develop mitigations, in consultation with the Wildlife Division, for the protection and recovery of the species.

- 5.9 Proponent is advised that Red Pine are listed as Threatened under the **NLESA** and are known to occur within the area. The Proponent shall ensure that any activities do not result in disturbance, injury, or direct loss of Red Pine or its residence.
- 5.10 Proponent is advised that the area is located within identified core habitat for Newfoundland caribou. Caribou on the Island are of conservation concern to the Wildlife Division. Any current or new footprint within this sensitive caribou area should be kept to a minimum. All unnecessary disturbance of the habitat should be avoided. The Proponent should maintain large, vegetated wetland buffers where possible since these areas provide important caribou habitat. For further information contact the Wildlife Division at [Wildlifereferrals@gov.nl.ca](mailto:Wildlifereferrals@gov.nl.ca) to discuss mitigations to minimize or avoid impacts to caribou.
- 5.11 Proponent is advised that no vegetation clearing is to occur within:
- 800 metres of a bald eagle or osprey nest during the nesting season (March 15 and July 31) and 200 metres during the remainder of the year.
  - 800 meters of a short-eared owl (ground) nest between May 15 to August 15.
  - 200 meters of any other raptor nests between March 15 and July 31.

The location of any raptor nest site shall be reported to the Wildlife Division via emailing [WildlifeReferrals@gov.nl.ca](mailto:WildlifeReferrals@gov.nl.ca). For further information, please contact Department of Forestry, Agriculture and Lands at (709) 637-2950.

## **6 Department of Government Services - Government Service Centre**

- 6.1 Proponent is advised that brush should be chopped/shredded and may be burnt on-site with the approval of the Department of Forestry, Agriculture and Lands or may be removed to an approved waste disposal site for proper disposal with the permission of the owner/operator of the waste disposal site. Tires and used or waste oil are not to be used to aid in the burning of brush.
- 6.2 Proponent is advised that all fuel storage tank systems, other than those connected to a heating appliance of capacity of 2,500 litres or less, require registration prior to installation. For further information, please contact Government Services - Government Service Centre at (709) 729-0248.

## **7 Department of Government Services – Occupational Health and Safety**

- 7.1 Proponent is advised to ensure that activities are conducted in compliance with the Occupational Health and Safety Act and related regulations. This includes the responsibility for ensuring that, should contractors be hired to perform work,

they also comply with the legislation. For further information, please contact the Occupational Health and Safety Division at (709) 729-7454.

## **8 Environment and Climate Change Canada**

8.1 Environment and Climate Change Canada recommend the Proponent to develop the following plans:

- A Management Plan that includes appropriate preventive measures to minimize the risk of impacts on migratory birds.
- An Oil Spill Prevention and Response Plan.
- A Contingency Plan that considers potential accidents and malfunctions that take into account site-specific conditions and sensitivities.

8.2 Proponent is advised to avoid nest destruction and to accommodate the breeding season of migratory birds by considering nesting locations between mid-April and Mid-August in this region for when and where operations occur. Environment and Climate Change Canada requests that species-at-risk sighting be reported to the Canadian Wildlife Service (CWS) at <http://www.accdc.com/en/contribute.html>. For further information, please contact Environment and Climate Change Canada at (709) 772-4313.

## **9 Fisheries and Oceans Canada**

9.1 Proponent is advised to refer to the Projects Near Water website for information about how to comply with the **Fisheries Act** as well as information on the Project review process when conducting work in or near water. The 'Projects New Water' website is located at <http://www.dfo-mpo.gc.ca/pnw-ppe/index-eng.html>. For further information, please contact the Fisheries Protection Program at (709) 772-4140.
