### Data Collection Methodology

The data is collected using the School Development Surveys completed by students (Gr. 3-12), families, instructional staff, and non-instructional staff.

**Response Rates:** Grades 3-6: 86%      Grades 7-12: 62%      Instructional Staff: 80%\*      Family: 27%^

\*The response rate for non-instructional staff is not available.  
^Families with more than one child in a school may complete the survey once for the oldest child in that school.

**What observations have you made about this data?**

**What questions do you have based on your observations?**

**Why is this information important?**
