## Chemistry 3202 <br> June 2014 Public Exam Outcome Report

This examination follows the specifications, conventions and standards set out in the:
Chemistry 3202 Provincial Exam Standards

| Units | $1-$ From Kinetics to Equilibrium <br> $2-$ Acids and Bases |
| :--- | :--- |
|  | 3 - Thermochemistry |
| 4 - Electrochemistry |  |

PART I: Selected Response-Total Value: 50\%

| Item | Curriculum Guide Page | Outcome | Cognitive Level | Outcome Description |
| :---: | :---: | :---: | :---: | :---: |
| 1 | $\begin{gathered} \text { (Unit 1) } \\ 28 \end{gathered}$ | ACC-1 | 1 | Identify $\mathrm{E}_{\mathrm{a} \text { (forward), }} \mathrm{E}_{\mathrm{a} \text { (reverse) }}$, and $\Delta \mathrm{H}$ from a PE diagram. |
| 2 | 28 | ACC-1 | 2 | Identify how $\mathrm{E}_{\mathrm{a} \text { (forward) }}, \mathrm{E}_{\mathrm{a} \text { (reverse) }}$, and $\Delta \mathrm{H}$ are related. |
| 3 | 30 | ACC-2 | 1 | Describe how a catalyst affects the rate of a chemical reaction. |
| 4 | 30 | ACC-2 | 2 | Identify factors that affect reaction rate. |
| 5 | 30 | ACC-2 | 2 | Identify factors that affect reaction rate. |
| 6 | 38 | 323-3 | 1 | State the criteria that applies to a system at equilibrium. |
| 7 | 40 | $\begin{aligned} & 323-4 \\ & 323-5 \end{aligned}$ | 2 | Determine the change imposed on an equilibrium system from a graphical representation. |
| 8 | 42 | $\begin{aligned} & 323-4 \\ & 323-5 \end{aligned}$ | 2 | Use LCP and the solubility table to predict a change in an equilibrium system when a stress is imposed. |
| 9 | 40 | $\begin{aligned} & 323-4 \\ & 323-5 \end{aligned}$ | 2 | Use LCP to predict an equilibrium shift when a stress is imposed on the equilibrium system. |
| 10 | 44 | 323-3 | 1 | Recognize that solids and liquids are not included in the equilibrium expression. |
| 11 | 44 | 323-3 | 3 | Use initial concentrations of species present and $\mathrm{K}_{\mathrm{eq}}$ to determine the changes that will occur in order for an equilibrium system to establish. |

| 12 | 44 | 323-3 | 2 | Calculate the equilibrium concentration of a chemical species given other concentrations and $\mathrm{K}_{\mathrm{eq}}$. |
| :---: | :---: | :---: | :---: | :---: |
| 13 | $\begin{gathered} \text { (Unit 2) } \\ 52 \end{gathered}$ | 214-1 | 1 | Use an operational acid/base definition to determine the pH of a substance. |
| 14 | 52 | 214-1 | 1 | Identify an operational definition of an acid or base. |
| 15 | 52 | 214-17 | 2 | Identify a strong/weak acid given solution characteristics. |
| 16 | 56 | 214-17 | 2 | Identify an amphoteric substance. |
| 17 | 54 | 320-1 | 1 | Identify an Arrhenius acid or base. |
| 18 | 62 | 320-4 | 3 | Determine the effect of changes on the self-ionization of water equilibrium. |
| 19 | 58 | 214-17 | 1 | Use the table of acid strength to identify strongest acid or base. |
| 20 | 66 | 320-4 | 2 | Convert between any two of $\left[\mathrm{H}_{3} \mathrm{O}^{+}\right],\left[\mathrm{OH}^{-}\right], \mathrm{pH}$, and pOH . |
| 21 | 62\&66 | 320-4 | 2 | Calculate $\left[\mathrm{H}_{3} \mathrm{O}^{+}\right],\left[\mathrm{OH}^{-}\right], \mathrm{pH}$, or pOH given the concentration of a strong monoprotic acid or a strong base. |
| 22 | 82 | 214-17 | 1 | Identify a Bronsted-Lowry acid or base. |
| 23 | 70 | 320-3 | 2 | Identify an expression as $\mathrm{K}_{\mathrm{a}}$ or $\mathrm{K}_{\mathrm{b}}$ for a given substance. |
| 24 | 76 | 320-6 | 1 | Identify laboratory equipment used for titrations. |
| 25 | 80 | 320-7 | 3 | Determine the colour of an indicator at different points on a titration curve. |
| 26 | 84 | 214-5 | 2 | Interpret from a titration curve the strength of the acid and base. |
| 27 | 74 | ACC-5 | 2 | Determine the effect on pH when acid and bases are combined. |
| 28 | 82 | 214-5 | 2 | Identify the reaction which occurs at the second equivalence point for a given acid and base. |
| 29 | $\begin{gathered} \hline \text { (Unit 3) } \\ 92 \end{gathered}$ | 308-2 | 1 | Define temperature. |
| 30 | 94 | 324-3 | 1 | Identify the features of open, closed and isolated systems. |
| 31 | 94 | 324-3 | 1 | Perform calculations involving specific heat capacity. |
| 32 | 94 | 324-3 | 2 | Perform calculations involving specific heat capacity. |
| 33 | 94 | 324-3 | 2 | Perform calculations involving specific heat capacity. |

| 34 | 98 | $324-3$ | 2 | Identify the enthalpy diagram for a given reaction. |
| :---: | :---: | :---: | :---: | :--- |
| 35 | 104 | $324-1$ | 3 | Determine the identity of a reactant using $\mathrm{q}=\mathrm{n} \Delta \mathrm{H}$ for a given reaction. |
| 36 | 104 | $324-1$ | 2 | Calculate the energy associated with a substance undergoing a phase change. |
| 37 | $92 / 100$ | $308-2$ <br> $324-3$ | 1 | Identify the energy changes that occur when substances undergo chemical changes <br> and phase changes. |
| 38 | 108 | $214-3$ | 2 | Identify the order of changes a substance undergoes during a temperature change. |
| 39 | 110 | $117-9$ | 1 | Compare the magnitude of the energy that is involved when physical, chemical and <br> nuclear changes occur. |
| 40 | 114 | $324-4$ | 2 | Using Hess's law, predict the heat of a reaction. |
| 41 | Unit 4$)$ <br> 124 | $322-1$ | 1 | Describe a process that occurs with oxidation and reduction. |
| 42 | 126 | $322-1$ | 2 | Identify the oxidizing agent and the reducing agent in a redox equation. |
| 43 | 124 | $322-1$ | 2 | Identify electron transfer in redox equations. |
| 44 | 126 | $322-3$ | 2 | Determine the oxidation number of an atom in an ion or molecule. |
| 45 | 134 | $322-4$ | 1 | Use electrochemical cell notation to represent an electrochemical cell. |
| 46 | 136 | $322-5$ <br> $322-6$ | 2 | Identify a spontaneous reaction as one that produces a positive cell potential. |
| 47 | 136 | $322-5$ <br> $322-6$ | 1 | Describe an electrolytic cell in terms of type of reaction and cell potential. |
| 48 | 138 | $322-5$ <br> $322-6$ | 3 | Complete a table of redox half-reactions from experimental results. |
| 49 | 144 | $322-8$ | 2 | Perform calculations related to $\mathrm{Q}=$ It and $\mathrm{Q}=\mathrm{nF}$. |
| 50 | 150 | $322-7$ | 1 | Identify a cell type. |

PART II: Constructed Response-Total Value: 50\%

| Item | Curriculum <br> Guide Page | Outcome | Cognitive <br> Level | Value | Outcome Description |
| :---: | :---: | :---: | :---: | :---: | :--- |
| 51 a | 28 | ACC-1 | 2 | 3 | Draw and label a potential energy diagram for a given reaction. |
| 51 b | 38 | $323-4$ <br> $323-5$ | 2 | 2 | Predict the change that will occur when a compound is added to an <br> established equilibrium and justify your answer. |
| 51 c | 32 | ACC-3 | 3 | 4 | i) Determine an elementary step of a reaction mechanism given 2 <br> elementary steps and net equation for the overall reaction. <br> ii) Identify how to increase rate of overall reaction. |
| 51 d | 46 | ACC-4 | 2 | 4 | Given the initial concentrations and equilibrium concentration of a <br> species which is allowed to reach equilibrium, calculate the value of <br> K eq. |
| 52 a (i) | 60 | $320-2$ | 2 | 2 | Predict the Bronsted-Lowry reaction that occurs when two solutions are <br> combined. |
| 52 a (ii) | 60 | $320-2$ | 2 | 1 | Predict whether reactants or products are favoured. |
| 52 b | 66 | $320-4$ | 2 | 3 | Perform dilution and pH calculations to determine the final volume. |
| 52 c | 70 | $320-3$ | 2 | 4 | Calculate pH given the initial concentration of a weak base. |
| 52 d | $76 / 78$ | $320-6$ | 3 | 4 | Use titration data to determine the identity of a group II metal in one <br> reactant. (science communication mark) |
| 53 a | 98 | $214-3$ | 2 | 5 | i) Draw a heating/cooling curve from given data. <br> ii) Calculate the total energy required to heat a substance through <br> temperature changes and phase change. |
| 53 b | 112 | ACC-8 | 2 | 2 | Calculate fuel value of a substance given calorimeter data. |
| 53 c | 114 | $324-4$ | 2 | 2 | Use standard molar enthalpies of formation to calculate heat of reaction <br> for a chemical change. |
| 53 d | 118 | $324-4$ | 3 | 4 | Use bond energies and enthalpy of reaction to calculate a missing bond <br> energy. |

| 54 a | 130 | $322-2$ | 2 | 3 | Balance a redox reaction under acidic conditions. |
| :---: | :---: | :---: | :---: | :---: | :--- |
| 54 b | $132 / 136$ | $322-4$ <br> $322-5$ <br> $322-6$ | 2 | 4 | i) Identify and label the parts of an electrochemical cell. <br> ii) Determine the overall cell potential. (science communication mark) |
| 54 c | $94 / 144$ | $322-8$ | 3 | 3 | Using Faraday's law, determine the time to make a metal given its <br> specific heat capacity and heat absorption during a temperature change. |
