LEGEND

Numbers refer to rocks units and are the same as those used in the map legend

Primary Features

- Geological boundaries (surface expression defined, approximate, assumed) .....
- Bedding (diagrammatic representation of first deformation folds) .....
- Intrusive contacts (veins emanate from intruding body) .....

Secondary Features

- Gneissic foliation .....
- Fabric related to first deformation of Baie d'Espoir Group (S<sub>1</sub>) .....
- Fabric related to second deformation of Baie d'Espoir Group (S<sub>2</sub>) .....
- Faults .....

One cross fault of minor significance has been omitted  
Horizontal and vertical scales 1:50,000
