

FALCONBRIDGE NICKEL MINES LIMITED

LOCATION 79 / 008 185' E of No 1 Base Line BEARING East HOLE NO. G.B. 111
 LOGGED BY L.G. Hudson ELEVATION _____ DIP -50° PROPERTY Gull Pond
Newfoundland.
 STARTED December 1, 1951 TESTS (CORRECTED)
 FINISHED December 9, 1951 Footage Angle Etched Corrected Angle
 CASING Casing pulled.
 CORE SIZE _____

FROM	TO	DESCRIPTION
0.0	11.0	Overburden: small boulders and gravel.
11.0	54.0	Very fine-grained, light grey, sheared rhyolite tuff with some sericite developed, occasional quartz fracture-fillings and specks of pyrite.
54.0	78.2	Fine grained, medium grey, metamorphosed sediments and minor intercalated rhyolite with quartz and feldspar phenocrysts; developed biotite and chlorite and some epidote.
78.2	107.3	Similar to 11.0 - 54.0.
107.3	122.0	Fine-grained, medium, green-grey, trap dyke.
122.0	138.0	120.7 - 122.0 - bands of red jasper. Very fine-grained, light grey, sheared and crenulated rhyolite tuff with sericite developed, quartz and feldspar phenocrysts and very fine bands of jasper.
138.0	156.2	124.4 - 125.5 - jasper band. Fine grained, dark, green-black, siliceous andesite, with pronounced chlorite developed, epidote fracture-fillings and some quartz fracture-fillings.
156.2	160.8	Very fine-grained medium grey, sheared tuff.
160.8	175.0	Similar to 138.0 - 156.2 but with pronounced epidote developed and quartz fracture-fillings.
175.0	249.0	Very fine-grained light grey and white, sheared rhyolite with quartz phenocrysts numerous quartz fracture-fillings.
249.0	256.6	243.0 - 245.0 - some red jasper bands. Very fine-grained light grey sheared and crenulated rhyolite tuff with quartz phenocrysts.
256.6	258.0	Very fine-grained light grey and white rhyolite with minor euhedral pyrite.
258.0	268.4	Fine-grained, medium, green-grey, siliceous andesite tuff, with some chlorite developed and minor euhedral pyrite.
268.4	349.4	Very fine-grained, light to medium grey rhyolite tuff, and minor intercalated sediments with occasional quartz fracture-fillings and minor local euhedral pyrite.
349.4	358.5	Very fine-grained, light grey, sheared rhyolite with occasional quartz fracture-fillings and some minor local pyrite.
	358.5	END of hole.
