- 7 Ta, Granite porphyry; Tb, granite pegmatite dykes.
- 6 6a, Diorite; 6b, diorite-gabbro; 6c, gabbro; 6d, amphibolite.
- 5 5a, Anorthosite; 5b, anorthositic gabbro.
- 4 4a, Impure quartzite; 4b, crystalline limestone; 4c, white quartzite; 4d, iron formation.
- 3 Gneiss: orthogneiss and paragneiss.
- 2 Orthogneiss.
- 1 Paragneiss.

- Observed rock outcrop
- Bedding (direction of dip known, upper side of bed unknown) . . . . .
- Schistosity, gneissosity (inclined, vertical, dip unknown) . . . . .
- Foliation (inclined, vertical, dip unknown) . . . . .
- Lamination (plunge known, plunge unknown) . . . . .
- Drag-fold . . . . .
- Fault (approximate, assumed) . . . . .
- Glacial striae . . . . .
- Mineral prospect . . . . . IX

- Mineral Occurrences
- 1. Rectangle Lake (Kyanite)
  - 2. (Kyanite)
  - 3. Gibraltar Lake (Kyanite)

- Marsh or swamp . . . . .
- Esker . . . . .
- Triangulation station . . . . .
- Interprovincial boundary . . . . .

Geology by W. P. Boyko

Base map compiled from Topographic Survey of Canada maps

Approximate magnetic declination 25°10'W

Scale: 1 Inch to 1/2 Mile
