Errors or Omissions

This directory has been produced and processed from sources believed to be reliable and with permission from the listed business. No warranty is made regarding accuracy, adequacy, completeness, legality, reliability or usefulness of any information.

If a user finds any errors or omissions, or if a business would like to be included in future editions, we encourage you to contact Forest Engineering and Industry Services.

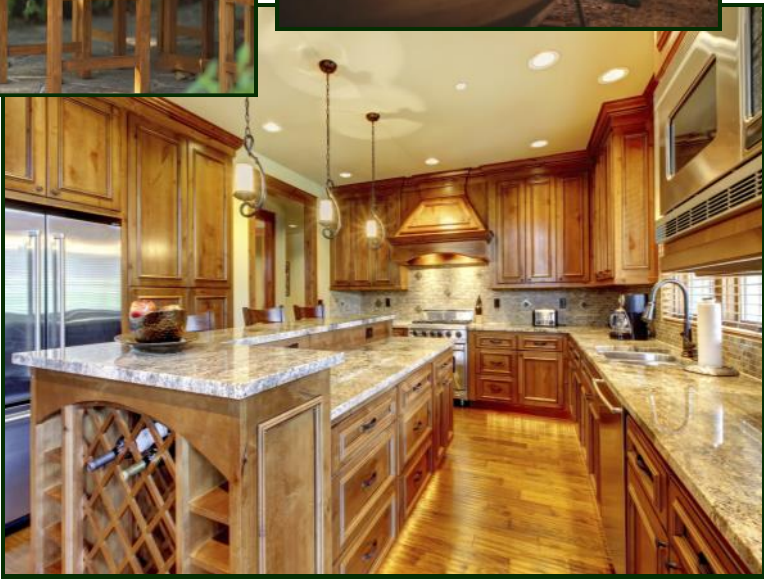

Preface

The Newfoundland and Labrador Forest Service has produced this Wood Products Business Directory to assist local businesses and to promote networking within the sector. It is anticipated that the listings will be used to help local businesses increase their buying and selling opportunities and develop business to business awareness as an attempt to increase production.

Included in the directory are manufacturers of wooden items such as art, crafts, cabinets, counter tops, doors, windows, flooring, decking, roof trusses, furniture, millwork, mouldings and trim, pallets, pellets, siding and staircases. Also included are small custom woodworking shops, sawmill operations, as well as harvesting and firewood businesses with an annual volume greater than 500 cubic meters.

The content of this directory is described to the best of our knowledge at the time of printing. Reasonable efforts have been made to ensure the accuracy of the data, but there is no guarantee that all business information is correct due to rapidly changing information.

Thank you to all participants for supplying information to be included in this directory.

Secondary wood manufacturing creates value, employment and quality products.
