Department of Health and Community Services
Government of Newfoundland and Labrador

Respiratory Weekly

Highlights

- ⇒ In weeks 11 and 12, there were three laboratory-confirmed cases of influenza, one hospitalization, no ICU admissions or deaths (Table 1).
- ⇒ As of March 25, 2023, there have been 913 laboratory-confirmed cases (909A, 4B), 226 hospitalizations, 28 ICU admissions and 20 deaths.
- ⇒ Cases have been reported in all health authorities (Figure 2).
- \Rightarrow Approximately 55% (503 of 913) were less than 45 years of age (Figure 3).
- ⇒ Sixteen confirmed influenza outbreaks have been reported so far this season (Figure 4).
- ⇒ Emergency room visits with influenza-like illness (ILI) increased and symptomatic HealthLine calls decreased from the previous week (Figures 5 and 6).
- ⇒ Other respiratory viruses circulating in weeks 11 and 12 include RSV, PIV, entero/rhinovirus, hMPV and adenovirus (Table 3).
- \Rightarrow At a national level, influenza activity remains low and stable at inter-seasonal levels.
- ⇒ Did you get it? Influenza vaccination remains one of the best methods to protect you and your family and prevent the spread of the virus!

Laboratory-Confirmed Cases

Table 1: Number of positive influenza cases in NL, by severity, week 11 & 12, 2022-2023 season

	Cases	Hospitalizations	ICU Admissions	Deaths
Week	3	1	0	0
Total	913	226	28	20

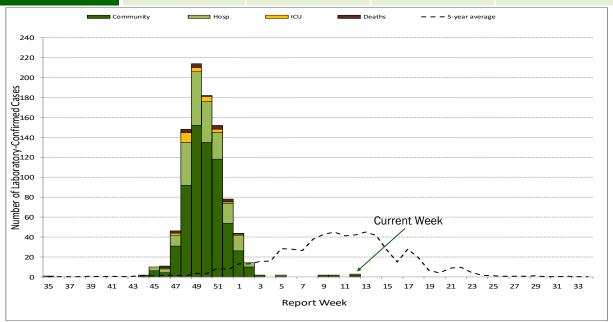

Figure 1: Number of cases, hospitalizations, ICU admissions and deaths, by week virus identified, 2022-2023

Disclaimer: Fluctuations in data occur with each report and can be attributed to continuous reporting.

Influenza by type, RHA

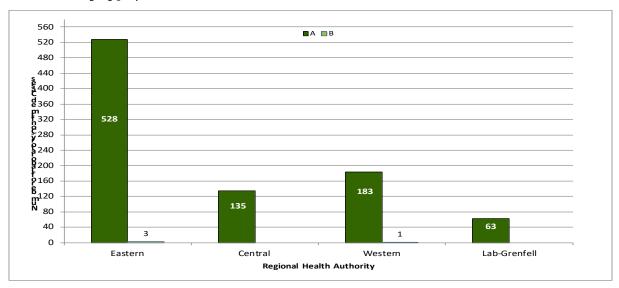

Figure 2: Total number of laboratory-confirmed influenza A and B, by Regional Health Authority, 2022-2023

Influenza by age group (n=913)

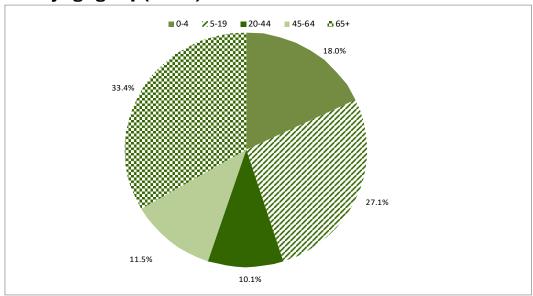

Figure 3: Percent of laboratory-confirmed influenza in NL, by age group, 2022-2023

Antiviral Resistance

Table 2: Cumulative antiviral resistance by influenza virus type and sub-type, Canada, 2022-2023

	Oseltamivir		Zanamivir			Amantadine			
	Tested	Resi	stant	Tested	Resi	stant	Tested	Resi	stant
	#	#	%	#	#	%	#	#	%
A (H3N2)	314	0	0	314	0	0	0	0	0
A (H1N1)	32	0	0	32	0	0	0	0	0
В	3	0	0	3	0	0	0	0	0
Total	349	0	0	349	0	0	0	0	0

Influenza and Other Respiratory Outbreaks

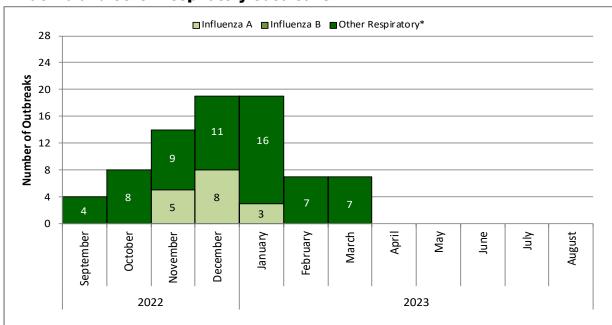

Figure 4: Number of influenza and other respiratory outbreaks, by month of onset, NL, 2022-2023

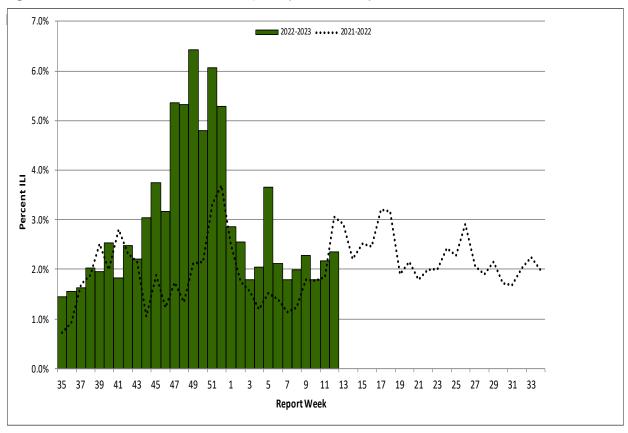

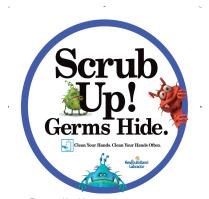

Figure 5: Percent of emergency department visits with ILI by report week, NL, 2022-2023

^{*}Excludes novel coronavirus 2019-nCoV

Other Respiratory Viruses

Table 3: Weekly and total number of positive respiratory virus specimens in NL, by type, 2022-2023 season

	Week 12	Total
R.S.V.	22	430
Parainfluenza virus 1	6	30
Parainfluenza virus 2	0	30
Parainfluenza virus 3	33	243
Adenovirus	7	198
Entero/Rhinovirus	36	792
hMPV	10	328
