

PERSONAL CARE HOME CONTACT LIST AND LICENSURE STATUS

Personal Care Homes are private, for profit residential settings providing care and accommodations primarily for seniors and adults requiring assistance with activities of daily living.

The regional health authorities complete a clinical assessment to determine an individual's care needs and suitability for a personal care home and rank care requirements on a scale of Level I, II, Enhanced Care, III, or IV. Personal care homes are licensed to provide Level I, II or Enhanced Care. Personal care homes are regularly monitored for compliance with the Provincial Personal Care Home Operational Standards and a licensing review is completed annually.

The licensure status of personal care homes will be updated quarterly.

Level I and II Care- care provided to individuals with low care needs, generally requiring some assistance with activities of daily living.

Enhanced Care- care provided to residents who have higher care needs but are medically stable and do not require continuous supervision or frequent intervention by professional nursing staff.

Licensed- the home is compliant with regulations and standards to the satisfaction of the regional health authority at the time of monitoring or inspection.

Interim License- an interim license may be issued when the license term has expired but information is not available to inform the licensing renewal process.

Conditional License- a conditional license may be issued when the home is not compliant with regulations and standards at the time of monitoring and inspection, however the non-compliance issues identified do not significantly affect resident safety or quality of care. Where non-compliance issues are identified, a home is provided a corrective action plan with timelines. The home must notify the monitoring or inspection body when corrective action has been completed and compliance is met.

Revoked License- in circumstances where personal care homes have significant and/or sustained non-compliance with the regulations and operational standards, and have not demonstrated, to the satisfaction of the regional health authority, actions to correct the identified issues, non-compliance protocols may be enacted which may result in revoking the license of a personal care home. Where a license has been revoked, this will be indicated on the Department's website for one reporting period.

Note: Licensure status may change within the reporting period, more up to date information on the licensure status is available from the regional health authority or the personal care home which is required to post the license within the home in a location visible to the public.
