

March 17, 2023 – Removal of Caribou Brook from Call for Bids Area

On December 14, 2022, the Crown Land Call for Bids for Wind Energy Projects was opened.

In developing the area for the Call for Bids, to support the protection of water supply areas and to ensure that Bids were submitted in areas where development was more likely to occur, all protected water supply areas were removed from the area included in the Call for Bids.

On March 15, 2023, the Caribou Brook Protected Water Supply Area was expanded under the Water Resources Act. Notice of this designation was published in the March 17, 2023 edition of the [Newfoundland and Labrador Gazette](#).

These newly protected water supply areas are now removed from the Call for Bids area.

The [Crown Land Call for Bids Mapping Tool](#) has been adjusted to remove these areas from the demonstration map and the associated data set available for download.
