

This airborne geophysical survey and the production of this map were funded by NRCan's Targeted Geoscience Initiative 3 (TGI3) and by the Geological Survey, Newfoundland and Labrador Department of Natural Resources. This map is a contribution to the TGI3 Program of the Earth Sciences Sector, Natural Resources Canada.

Ce levé géophysique aérien et la production de cette carte ont été financés par la phase 3 de l'Initiative géoscientifique ciblée (IGC-3) et le Geological Survey, Newfoundland and Labrador Department of Natural Resources. Cette carte contribue au programme IGC-3 du Secteur des sciences de la Terre, Ressources naturelles Canada.

FIRST VERTICAL DERIVATIVE OF THE MAGNETIC FIELD DÉRIVÉE PREMIÈRE VERTICALE DU CHAMP MAGNÉTIQUE

Authors: Coyle, M. and Ones
Data acquisition, compilation and map production
Goldak Airborne Surveys, Saskatoon, Saskatchewan
Contract and project management
the Geological Survey of Canada, Ottawa

LEVÉ AÉROMAGNÉTIQUE BAIE VERTE
KING'S POINT
NTS 12 H/09 AND PART OF 2 E/12 / SNRC 12 H/09 ET PARTIE DE 2 E/12
Newfoundland and Labrador / Terre-Neuve-et-Labrador

ation des données ainsi que la production des cartes furent
Goldak Airborne Surveys, Saskatoon, Saskatchewan.
on et la supervision du projet furent effectuées
mission géologique du Canada, Ottawa, Ontario.

A map of the Arctic region, centered on the North Pole. The map shows various ice-covered seas and landmasses. A dashed line outlines the study area, which is located in the Baffin Bay/Nordic Seas region, specifically around the northern coast of Greenland and the southern coast of Ellesmere Island. A red dot marks the exact location of the study site.
