REHABILITATION: CAPITAL READY MIX

Quarry in full production, nearing the end of its life-cycle. Rehabilitation required once resource has been depleted.

Progressive rehabilitation has commenced. A portion of the area has been backfilled and sloped. Some topsoil replaced and hydro-seeded.

Quarry site has been depleted and rehabilitation has begun. Stage 1 involves backfilling the quarried out area.

Site has been completely rehabilitated, sloped and hydro-seeded.

COURT UPDATE:

- Currently there are four cases awaiting trial.

- On November 23, 2007, Chard's Construction Limited was convicted under Section 22(1)(a) of the Quarry Materials Act, SNL1998 and fined \$2000.00 plus a 15% Victim Fine Surcharge. Fine to be paid within 30 days.
