

PREFACE

With this publication we are initiating a series of annual Reports of Activities. Most similar agencies in Canada have adopted this method for quickly communicating the progress and major results of projects in progress. We see it as at least a partial solution to a general communications problem made more difficult and important by the continued growth of the Mineral Development Division's activities.

Many of the projects reported on here were conducted under the Canada/Newfoundland Mineral Exploration and Evaluation Agreement, funded jointly by the Department of Regional Economic Expansion and the Department of Energy, Mines and Resources. Each project funded under this agreement is identified as such in the report.

J.M. Fleming,
Director,
Mineral Development Division.
