

# Buchans Minerals Corporation and Canadian Zinc Corporation

## Central Newfoundland VMS (Cu, Zn, Pb, Ag, Au) Projects

- Buchans Minerals and Canadian Zinc are working together advancing targets within a large combined land position measuring 725 km<sup>2</sup> in central Newfoundland near the past-producing (Teck) Duck Pond Cu-Zn-Pb mine and mill which recently closed in 2015 after producing 106,000 tonnes of copper and 220,000 tonnes of zinc
- The properties are located in a region of Canada with significant historical and geological importance where Asarco Mining Company mined and milled 16.2 million tonnes of ore having an average grade of 23% combined base metals between 1928 and 1984
- The current focus is on a metallurgical research study which is supported and significantly funded by the Newfoundland Government to assess the viability of mining selected deposits and processing material through a centrally located milling facility
- Buchans Minerals (subsidiary of Minco plc) and Canadian Zinc together hold eight VMS Deposits that are host to seven NI 43-101 compliant zinc-lead-copper-silver-gold resources
- All eight base metal deposits have potential for resource expansion through exploration drilling from surface
- Road access, excellent infrastructure nearby including power and skilled labour
- Canadian Zinc and Buchans Minerals are planning fall/winter exploration programs to expand their established deposits and further define underexplored priority VMS targets

# Buchans矿产公司 和 加拿大锌业公司

## 纽芬兰省中部的VMS（铜—锌—铅—银—金）项目组

- Buchans矿产公司和加拿大锌业公司一起共同合作推进双方位于纽芬兰省中部总占地面积达725平方公里的土地资产内的勘探目标。该土地资产毗邻泰克资源公司于2015年刚下线的Duck Pond铜—锌—铅矿山及选厂。开采年限内Duck Pond矿山共产106,000吨铜以及220,000吨锌。
- 座落在加拿大极具历史以及地质重要性的区域。该区域在1928年至1984年间共开采加工了1620万吨平均品位约23%基础金属当量的矿石。
- 目前旨在完成由纽芬兰省政府大力支持并资助的冶金研究以考查共享同一选厂加工挑选矿床所采矿石的可行性。
- Buchans矿产公司（Minco Plc的子公司）及加拿大锌业一起共同拥有8个VMS矿床，含有7个NI 43-101标准的锌—铅—铜—银—金资源量。
- 这8个基础金属矿床都具有通过地表钻探扩展资源量的潜力。
- 通道、出色的基建，包括电力以及技术工人。
- 加拿大锌业以及Buchans矿产公司正在规划今秋／冬季节的勘探活动以扩大现有矿床及定义优先的、尚未开发的VMS目标。
