

Canada Minerals Forum - Beijing, China

September 20, 2016

Who we are...

- Metalo Manufacturing Inc. (CSE:MMI) is a key part of the claimholder of a **Mineral Sands** (*below*) resource in Newfoundland and Labrador. More than US\$10 million in development efforts.
- The project has access to low cost power and is located adjacent to a sea port.

What we have...

Principle focus on the recovery and separation of valuable mineral sands

Minerals in the river and adjacent sand banks

- Our focus (with a Chinese minerals sands engineering firm) for 2016-17 is on the cost effective recovery of:
 - Garnet (abrasive for water jet cutting)
 - Feldspars (Chinese market for ceramics)
 - Silica Quartz (industrial glass and sand cast molds)
 - Zircon

What we seek in China...

Metalo is *seeking to Joint Venture with a Chinese* firm that is experienced in the separation and processing of mineral sands.

Alternatively, the partner may be a *user or established trader* in the following minerals in China.

Potential to expand into other minerals in resource rich NL area including Gold and Antimony
