**Company:** [Gold'n Futures Mineral Corp.](#)

**Project:** Brady (Reid Porphyry Zone) - **Gold**

**Status:** **Non-Producer**

**Stage:** Exploration, **Resource Estimate**, Feasibility, Development

**Contact:** Theo van der Linde (Director & interim CEO)  
604-687-2038

The Brady property is adjacent to the Huxter-Lane property and is host to the Reid Porphyry Zone, a bulk-tonnage intrusion-hosted gold deposit. In 2013, an updated [Inferred Resource](#) of 9,570,000 tonnes averaging 0.56 g/t Au for 173,000 ounces was released for the Brady deposit.

**Company:** [Matador Mining Limited](#)

**Project:** Cape Ray - **Gold**

**Status:** **Non-Producer**

**Stage:** Exploration, **Resource Estimate**, Feasibility, Development

**Contact:** [Keith Bowes](#) (Project Manager)

Matador acquired the mineral rights to the Cape Ray project in 2018. The Cape Ray Project covers four main deposits along a trend of approximately 14 km. These areas consist of the Central Zone (PW, 51, 04/41 and H deposits), Window Glass Hill, Big Pond and Isle Aux Mort.

Matador released a positive [Scoping Study](#) in 2020. Based on a 1.2 Mtpa (million tonnes per year) standalone mining and processing operation, the Scoping Study has demonstrated potentially strong financial metrics for the project. The preliminary economics indicate the project has positive financial metrics over an initial mine life of 7 years with capital payback during the first 1.75 years of the Project's life.

**Company:** [Mountain Lake Minerals Inc.](#)

**Project:** Glover Island - **Gold**

**Status:** **Non-Producer**

**Stage:** Exploration, **Resource Estimate**, Feasibility, Development

**Contact:** [Paul Smith](#) (President and CEO, Director)

Mountain Lake owns a 100% interest in the Glover Island Property. The Property hosts 16 mineral prospects along a >11 km strike length known as the Glover Island Trend. All but one of the prospects remain significantly underexplored, and 13 of those prospects include high-grade gold targets.

Mountain Lake completed its Phase 1 drilling program in early 2012 that culminated in a 43-101 mineral resource estimation for the Glover Island Project. A new [Resource Estimate](#) was released in 2017.

**Company:** [Magna Terra Minerals Inc.](https://magnaterraminerals.com)

**Project:** Great Northern (Rattling Brook) - **Gold**

**Status:** **Non-Producer**

**Stage:** Exploration, **Resource Estimate**, Feasibility, Development

**Contact:** [info@magnaterraminerals.com](mailto:info@magnaterraminerals.com)

The Rattling Brook Deposit, including the Apsy, Road and Beaver Dam zones, form part of the project formerly referred to as the Jacksons Arm Gold Project.

The updated [Mineral Resource Estimate](#) for the Rattling Brook Deposit is 5,460,000 tonnes at an average grade of 1.45 g/t gold for 255,000 contained ounces at a cut-off grade of 1.0 g/t gold in 3 mineralized zones (the Road, Apsy and Beaver Dam zones) with an effective date of January 23, 2019. The Road and Apsy zones are intrusion-hosted deposits with bulk tonnage potential. The Beaver Dam zone is a stratabound, sediment-hosted deposit.

**Company:** [Maritime Resources Corp.](#)

**Project:** Green Bay - **Gold**

**Status:** **Non-Producer, Former Producer**

**Status:** Exploration, Resource Estimate, **Feasibility**, Development

**Contact:** [Larry Pilgrim](#) (Project Manager NL)

Maritime holds a 100% interest in the Green Bay Property, including the former Hammerdown gold mine and Orion project plus the Whisker Valley exploration project, all located near the Baie Verte Mining District. Hammerdown was last operated by Richmond Mines between 2000-2004 producing 143,000 ounces of gold at an average mine grade of 15.7 g/t Au through a combination of narrow vein open pit and underground mining.

In early 2020, Maritime announced the results from a [Preliminary Economic Assessment \(PEA\)](#) completed on the Green Bay project. The PEA provides an updated Resource Estimate and a base case assessment of developing the project as a combined open pit and underground ramp-access mine with an on-site gold pre-concentration plant and mineral processing through the Nugget Pond mill gold circuit.

**Company:** [Great Atlantic Resources Corp.](#)

**Project:** Golden Promise (Jaclyn Zone) - **Gold**

**Status:** **Non-Producer**

**Stage:** Exploration, **Resource Estimate**, Feasibility, Development

**Contact:** [Christopher R. Anderson](#) (President, CEO and Director)  
[Kaye Wynn Consulting](#) (Investor Relations)

The property contains the Jaclyn zone, a composite mesothermal gold vein system. The zone is defined over a strike length of 800 m and to a depth of 275 m and remains open for expansion along strike and to depth.

The Jaclyn Main Zone is estimated to contain a pit-constrained [Inferred resource](#) of approximately 157,300 tonnes with an average capped gold grade of 11.4 g/t and an underground resource of 200,200 tonnes with an average capped grade of 7.5 g/t.

**Company:** [First Mining Gold Corp.](http://firstmininggold.com)

**Project:** Hope Brook - **Gold**

**Status:** **Non-Producer, Former Producer**

**Stage:** Exploration, **Resource Estimate**, Feasibility, Development

**Contact:** [info@firstmininggold.com](mailto:info@firstmininggold.com)

First Mining is exploring around the margins of the former Hope Brook Gold Mine, a high-sulphidation epithermal gold deposit which produced 752,163 ounces of gold plus a copper concentrate from an open pit between 1993 and 1997.

A high grade underground [Resource Estimate](#) for the project was published in January, 2015. This new resource, targeted for potential underground development, lists 5,500,000 tonnes grading 4.77 g/t Au containing 844,000 ounces gold in the indicated category and 836,000 tonnes at 4.11 g/t Au containing 110,000 ounces gold in the inferred category.

**Owner:** N/A

**Project:** Huxter Lane (Mosquito Hill) - **Gold**

**Status:** **Non-Producer**

**Stage:** Exploration, **Resource Estimate**, Feasibility, Development

**Contact:** N/A

The Mosquito Hill and nearby Brady deposits (see Brady Project Sheet) are large, intrusion-hosted deposits with bulk tonnage potential. The Mosquito Hill deposit contains an [Indicated Resource](#) of 11,180,000 tonnes averaging 0.546 g/t Au for 196,257 ounces, and an Inferred Resource of 38.76 million tonnes averaging 0.457 g/t Au for 569,496 ounces.

In late 2011, a 7 hole, 1553 m diamond-drill program expanded the mineralization to the southwest where the deposit remains open.

TSX: MOZ

**MARATHON GOLD CORP.**

TSX: Moz

**Company:** [Marathon Gold Corp.](#)

**Project:** Valentine Gold - **Gold**

**Status:** **Non-Producer**

**Stage:** Exploration, Resource Estimate, **Feasibility, Development**

**Contact:** [Matt Manson](#) (President and CEO)

The Project comprises a series of mineralized deposits along a 20-kilometre trend. An April 2020 [Pre-Feasibility Study](#) outlined an open pit mining and conventional milling operation over a twelve-year mine life with a 36% after-tax rate of return and an average gold production profile of 175,000 ounces of gold per year for the first 9 years. The Project has estimated Proven and Probable Mineral Reserves of 1.87 Moz (41.05 Mt at 1.41 g/t Au) and Total Measured and Indicated Mineral Resources (inclusive of the Mineral Reserves) of 3.09 Moz (54.9 Mt at 1.75 g/t Au). Additional Inferred Mineral Resources are 0.96 Moz (16.77 Mt at 1.78 g/t Au).

The company recently filed its [Environmental Impact Statement \(EIS\)](#), which is part of the of the Environmental Assessment (EA) process that commenced in April 2019. Marathon currently contemplates completion of the project's EA process in the second half of 2021, breaking ground for construction in early 2022, and a production start in the second half of 2023.

**Company:** [Magna Terra Minerals Inc.](http://magnaterraminerals.com)

**Project:** Viking Project (Thor Trend) - **Gold**

**Status:** **Non-Producer**

**Stage:** Exploration, **Resource Estimate**, Feasibility, Development

**Contact:** [info@magnaterraminerals.com](mailto:info@magnaterraminerals.com)

The Thor gold deposit is part of the Viking Project and contains an [Indicated Mineral Resource](#) of 937,000 tonnes at an average grade of 2.09 g/t Au for 63,000 ounces and an Inferred Mineral Resource of 350,000 tonnes at an average grade of 1.79 g/t Au for 20,000 ounces at a cut-off grade of 1.0 g/t. The Thor Deposit remains open for potential expansion along strike near surface and at depth.
