Company: [Century Global Commodities](#) / WISCO International

Project: Attikamagen (Joyce Lake) - Iron

Status: Non-producer

Stage: Exploration, **Resource estimate**, Feasibility, Development

Contact: [Sandy Chim](#) (Chairman, President and Chief Executive Officer)

The Attikamagen Project includes both DSO- and taconite-style iron prospects in separate target areas.

Joyce Lake DSO Iron Ore Project is Century's most advanced project. An updated [Resource Estimate](#) published in March 2014 reports 24.3 million tonnes of Measured and Indicated Mineral Resources at an average grade of 58.55% Fe plus an additional 0.84 million tonnes of inferred mineral resources at a cut-off grade of 50% Fe. In April 2015, Century published the Joyce Lake Project [Feasibility Study](#). An environmental impact study is also underway.

Company: [M3 Metals Corp.](#)

Project: Block 103 - Iron

Status: Non-producer

Stage: Exploration, **Resource estimate**, Feasibility, Development

Contact: info@m3metalscorp.com

M3 Metals Corp (formerly ML Gold Corp), has been exploring the Block 103 property since 2011 and has outlined two distinct zones of magnetite mineralization, the Greenbush Zone and the Northwest Zone. In February 2013, the company announced an [Inferred Resource](#) of 7.2 billion tonnes at 29.2% total iron (18.9% magnetic iron). This resource estimate is based on a cut-off grade of 12.5% magnetic iron.

The company released a [Preliminary Economic Assessment](#) in June 2013. Currently the Company is working to optimize the economics of the deposit which include focusing on a smaller higher grade portion of the deposit.

CSE: MMI

Company: [Metalo Manufacturing Inc.](#)

Project: Churchill River – Iron

Status: Non-producer

Stage: Exploration, **Resource estimate**, Feasibility, Development

Contact: [Francis MacKenzie](#) (President and Director)

Merchant Pig Iron is the focus of Metalo Manufacturing Inc.'s investment in the private company Grand River Ironsands Incorporated (GRI) – the major shareholder in North Atlantic Iron Corporation (NAIC).

Through MMI's shareholding in GRI, it controls a mineral sands resource near Happy Valley-Goose Bay, NL. The resource contains valuable minerals that are being further evaluated, including magnetite, hematite, titanomagnetite, zircon, garnets, feldspars, silica, quartz, rutile, leucoxene and ilmenite. Future efforts will focus on evaluating the economic potential of these minerals.

Company: [Triple Nine Resources Ltd.](#)

Project: Four Corners - **Iron, Vanadium, Titanium**

Status: **Non-producer**

Stage: **Exploration**, Resource estimate, Feasibility, Development

Contact: [Victor French](#) (VP Exploration & Director)

Triple Nine is a private Newfoundland based mineral resource company. The company has conducted geophysical surveys, sampling and [diamond drilling](#) on this newly discovered iron-titanium-vanadium prospect. The higher grade mineralization extends along a 2.5 km strike length and displays an average thickness of 100 m grading 27.25% Fe_2O_3 , 7.00% TiO_2 and 0.145% V_2O_5 . Positive results have also been obtained from preliminary metallurgical testing.

TSX.V: SIC

Company: [Sokoman Minerals Corp.](#)

Project: Iron Horse - **Iron**

Status: **Non-producer**

Stage: **Exploration**, Resource estimate, Feasibility, Development

Contact: [Tim Froude](#) (Director, President & CEO)

Sokoman Iron has conducted geophysical surveys, sampling and preliminary diamond drilling on this newly discovered iron prospect in the eastern part of the Labrador Trough iron ore district. Highlights of [2012 drilling](#) include an intersection of 354 meters grading 27.8% Fe.

CHAMPION IRON 

Company: [Champion Iron Limited](#)

Project: Kami - Iron

Status: Non-producer

Stage: Exploration, Resource estimate, **Feasibility**, Development

Contact: [Michael Marcotte](#) (VP Investor Relations)

The Kami Project was previously owned and explored by Alderon Iron Ore Corp. In September 2018, Alderon released an Updated [Feasibility Study](#) on the Kami property that demonstrated average annual production of 7.84 million tonnes and boasted Proven and Probable Mineral Reserves of 517.2 million tonnes. The project was released from Environmental Assessment in January 2014.

In 2020, Alderon defaulted on their repayment obligations on a \$14 million loan. Deloitte Restructuring Inc. was appointed by the Supreme Court of Newfoundland and Labrador as receiver of all the assets and property of the Kami Iron Ore project and Alderon. The receiver has entered into an Asset Purchase Agreement dated October 29, 2020, with two subsidiaries of Champion Iron Limited, for the acquisition of certain mining assets of the Kami Iron Ore Project and related contracts.

Project: Schefferville DSO - **Iron**

Status: **Producer**

Stage: Exploration, Resource estimate, Feasibility, **Development**

Contact: [John Kearney](#) (Chairman and CEO)

LIM holds 20 high-grade, direct shipping (DSO) iron ore deposits in the Schefferville area. The company started producing DSO from the James Mine in 2011. Through to the end of 2013, LIM sold approx. 3.6 million dry tonnes of iron ore in 23 cape-size shipments to the Chinese spot market. On March 31, 2013, the company had total [Mineral Resources](#) of 59.5 million tonnes at an average grade of 56.5% Fe in six of its deposits.

LIM has not undertaken mining operations since 2013, primarily due to volatile iron ore market conditions, but maintains its properties on a stand-by care and maintenance basis. LIM's current focus is on planning activities related to the development of its Houston Project and, subject to securing development financing, LIM is positioned to resume project development and production of direct shipping iron ore from the Houston deposits at the earliest opportunity.

Company: [New Millennium Iron Corp.](#)

Project: Taconite Project: LabMag (Howells River) - **Iron**

Status: **Non-Producer**

Stage: Exploration, **Resource estimate, Feasibility, Development**

Contact: info@nmliron.com

The LabMag Deposit (80% owned by Naskapi Nation of Kawawachikamach) occurs within the 210 km-long taconite belt (Millennium Iron Range) in Labrador and Quebec. The LabMag was the subject of a comprehensive feasibility study carried out by NML and Tata Steel under a heads-of-agreement (HOA) signed in March 2011. In October 2015, the companies announced a review process for the HOA. As the macro-economic situation poses challenges for development of the Taconite Project as conceived in the HOA, NML and Tata Steel are re-visiting the terms of the HOA.

LabMag contains a total of 3.9 billion tonnes of [Proven and Probable Reserves](#) at a grade of 29.7% Fe plus 0.39 billion tonnes of Measured and Indicated resources at an average grade of 29.7% Fe and 1.1 billion tonnes of Inferred resources at an average grade of 29.6% Fe.

Company: [New Millennium Iron Corp.](#)

Project: Taconite Project: Howells Lake-Howells River North - **Iron**

Status: **Non-producer**

Stage: Exploration, **Resource estimate**, Feasibility, Development

Contact: info@nmliron.com

The Howells Lake (100% owned) and Howells River North (80% owned by Naskapi Nation of Kawawachikamach) deposits occur within the 210 km-long taconite belt (Millennium Iron Range) in Labrador and Quebec. The deposits are northwest of the LabMag Deposit, a large resource that has undergone a feasibility study by Tata Steel and New Millennium.

In May 2013, the company reported [resource estimates](#) of 7.63 billion tonnes of Indicated Mineral Resources and an additional 3.31 billion tonnes of Inferred Mineral Resources..

Project: Taconite Project: Sheps Lake and Perault Lake - **Iron**

Status: **Non-producer**

Stage: Exploration, **Resource estimate**, Feasibility, Development

Contact: info@nmliron.com

The Sheps Lake (80% owned by Naskapi Nation of Kawawachikamach) and Perault Lake (100% owned), deposits occur within the 210 km-long taconite belt (Millennium Iron Range) in Labrador and Quebec. The deposits are just south of the LabMag Deposit, a large resource that has undergone a feasibility study by Tata Steel and New Millennium.

In February 2013, the company reported [resource estimates](#) of 3.58 billion tonnes of Indicated Mineral Resources and an additional 795 million tonnes of Inferred Mineral Resources.
