

Discover Bonavista

575-million-years before John Cabot

Available on App Store

Available on Google Play

Bonavista! A Geological Tour Through Time is a new app that takes you on a journey through the mists of the ancient past, exposing rocks that are more than a half-billion years old. Exploring the coastal geological heritage of this beautiful region will reveal how the geological history has shaped the land, and the land has shaped the people and culture.

This app was developed in support of the Discovery Aspiring Geopark, Inc.
