Explore The Opportunities

Eagle's Vision - Au-Zn-Pb-Cu

Map 1: Property Location

The **Eagle's Vision Cu-Pb-Zn-Au Property** consists of 14 claims located in north central Newfoundland, 13 km NW of Bishops Falls, 2 km from the New Bay Pond road (NTS 2E/4), (Map 1). The property is accessible from woods roads off Route 350.

Regional Geology:

The property lies within the Dunnage Zone and is underlain by the Early Silurian Charles Lake Volcanics.

Local Geology

The Charles Lake Volcanic belt comprises two intimately interlayered units in this region. Massive, quartz-feldspar porphyritic, commonly flow-layered, pink to purple ignimbrite, yellow rhyolite and felsic tuff locally associated with volcanic clast-rich conglomerate. These felsic rocks are interlayered with massive to locally highly sheared, epidotized, thick basalt flows. Interbedded grey sandstone and pillowed basalt occur rarely.

Map 2: Claims location and geology

Highlights

- ✓ New discovery of gold / base metals
- ✓ Little previous exploration in the area
- ✓ Assays (o/c) up to 9.5 g/t Au, 3.6% Zn, 0.58% Cu, 2.07% Pb.
- ✓ Good access

Mineralization and Previous Work

There are no known historic mineral occurrences from this area and very little exploration work has been carried out locally. A government lake sediment sample taken in Northern Arm Pond returned anomalous levels of fluorine (194 ppm), molybdenum (12 ppm), uranium (8.4 ppm) and Zn (101 ppm). Prospecting and rock sampling carried out in the past, proximal to the SE corner of the property, (LeRiche and Morneau, 1998) uncovered anomalous Au up to 12.9 g/t, Cu up to 0.19% and Zn up to 0.05%.

Recent prospecting by the present owners has led to the discovery of a new base metal / gold occurrence on the property. Rock samples from outcrop have returned up to **9.47 g/t Au, 3.63% Zn, 2.07% Pb, 0.58% Cu and elevated Mo (Table 1).**

Crisby-Whittle, L. V. J. (compiler) 2012: Bedrock geology dataset for the Island of Newfoundland. Newfoundland and Labrador Department of Natural Resources, Geological Survey, Open File NFLD/2616 version 7.0.

Sample #	Au ppb	As ppm	Mo ppm	Zn%	Cu%	Ag ppm	Pb%
1	9469	12	-	-	-	3.8	-
2	50	64	145	2.12	0.587	3.9	0.49
3	75	51	115	3.63	0.482	4.1	2.07
4	4864	5	7	-	-	-	-
