Licence No. 14-062

Minister of Environment
and Conservation

Pesticide Operator Licence - Terms and Conditions

City of St. John's (Public Works & Parks)

PESTICIDE OPERATOR LICENCE NO: 14-062

EFFECTIVE DATE: March 11, 2014

EXPIRY DATE: March 11, 2019

1. DEFINITIONS

- Buffer:** means a defined space within which treatment is excluded and which extends a set distance outward in all directions from the boundary of an area designated for protection.
- Human habitation:** means every structure in which a person or persons resides on either a part-time or full time basis.
- Lawn:** means a plot of grass that is maintained at a regular and approximately uniform height through periodic and regular mowing.
- Penstock:** means a pipeline leading from the intake to the turbines.
- Private property:** means land owned or leased by an individual, group of individuals or other legal entity such as a company or corporation, for which clear title has been granted, and for which a record exists either through the Registry of Deeds or Crown Lands.
- Right-of-Way (ROW):** means an easement, granted by the land owner that permits the construction and operation of a utility corridor for the purpose of transmitting electricity. The utility corridor may be of varying lengths and widths.
- Water body:** means any surface (high water mark) or subterranean source of fresh or salt water within the province, whether such course usually contains water or not, and includes coastal water within the jurisdiction of the province and includes water above the bed of the

sea that is within the jurisdiction of the province, any river, stream, brook, creek, wetland, water course, lake, pond, spring, lagoon, ravine, gully, canal and any other flowing or standing water and the land usually or at the time covered by any such body of water.

"water" means all water located in or derived from a body of water;
Water Resources Act

Well: means an artificial opening in the ground from which water is obtained or that is made for the purpose of exploring for or obtaining water.

2. LEGISLATION

- (1) For the purpose of this licence, all definitions and regulations as indicated in the *Environmental Protection Act SNL 2002 cE-14.2* and the *Pesticides Control Regulations, 2012* shall apply.
- (2) All applications shall be conducted in strict compliance with the label registered under the authority of the *Pest Control Products Act* (Canada).

3. PESTICIDE OPERATOR RESPONSIBILITY

- (1) The operator shall be limited to using only those pesticides (See Appendix A), applicators (See Appendix B) and vehicles (See Appendix C) as indicated on its pesticide operator licence application dated **October 14, 2011**. Any changes in the program outlined in the application must receive the written approval of the manager, Pesticides Control Section, prior to their implementation.
- (2) The operator shall review these terms and conditions with each applicator prior to the start of each season, and a copy of the terms and conditions shall be provided to each applicator.
- (3) A copy of the operator's licence and these terms and conditions shall be available at each site during the application of a pesticide.
- (4) The operator shall ensure that all applicators have their pesticide applicator licences in their possession while applying pesticides unless otherwise indicated by the Pesticides Control Section.
- (5) Upon completion of the pesticide program for the year the operator shall submit to the Pesticides Control Section:
 - (a) details regarding the type and quantity of each pesticide used, and
 - (b) the name of the vendor/s from whom the pesticide was purchased.

This information shall be submitted no later than **December 31** of each year. Licences for the following season will not be processed until this information is received.

- (6) The operator shall ensure that all application equipment is maintained in good working order to prevent damage to the environment and/ or injury to individuals working with or near the equipment.

4. VEHICLES

- (1) All vehicles used during the application of pesticides for landscape, structural or industrial vegetation management programs shall have the registered/ incorporated company name, or any other name under which this company trades, **as per this pesticide operator licence**, prominently displayed on the vehicle. The name shall be displayed on both the driver and passenger sides of vehicle.
- (2) Concentrated pesticides transported in a vehicle during spray operations shall be contained in a lock box, a secure area or compartment which must be locked while unattended.
 - (a) Pesticides shall not be transported in the passenger compartment of any vehicle.
- (3) A quantity of approved absorbent materials shall be on hand at all times in case of a spill. The vehicle shall also carry clean-up equipment including but not limited to, shovels, brooms, and bags/buckets.

5. SPILL REPORTING

- (1) All spills involving greater than 70 litres of mixed pesticide or the equivalent of unmixed formulation shall be reported immediately.
- (2) All spills involving mixed or unmixed pesticide into a water body or within 100 meters of a water body, well or area frequented by people shall be reported immediately.
- (3) Spills involving less than 70 litres of mixed pesticide or equivalent amount of unmixed formulation in areas not frequented by people, and remote from water bodies or wells shall be duly recorded by the operations supervisor. Records of all such incidents (spills) shall be kept on file by the operator. These records should include details such as date of spill, location, product and quantity, employee on site, and clean up procedure. These records should be submitted to the Pesticide Control Section with the annual summary.
- (4) Reporting of spill incidents shall be made to the Pesticides Control Section, St. John's (ph.1-800-563-6181) and to Environment Canada, St. John's (ph.709-772-2083).

6. CONTINGENCY PLAN

A copy of the operator's contingency plan shall be carried in all vehicles transporting liquid pesticide formulations and at the entrance of the operator's approved pesticide storage area.

The contingency plan shall include:

- Section 1 - Emergency Telephone Numbers
- Section 2 - Spill Reporting Instructions
- Section 3 - Emergency First Aid Procedures from Pesticide Labels
(as listed in Appendix A of this document)
- Section 4 - Pesticide Spill Procedure
- Section 5 - Spill Response Kit
- Section 6 - Protocol to Respond to Fires
- Section 7 - Protocol to Respond to Theft
- Section 8 - First Aid Procedures for Pesticide Poisoning
- Section 9 - Pesticide Labels or Material Safety Data Sheets (MSDS)
(as listed in Appendix A of this document)

7. STORAGE

- (1) All pesticide storage sites shall meet the requirements of Section 21 of the *Pesticides Control Regulations, 2012* which are as follows:
 - (a) A source of water in an area in or adjacent to the storage area;
 - (b) Approved safety equipment as required which is properly maintained, functional and available at all times for personnel handling and working with pesticides;
 - (c) Flooring which shall not contain a floor drain or catch basin which is directly or indirectly connected to a private or municipal sewage system or public water course;
 - (d) Flooring which shall be capable of being readily cleaned and decontaminated of pesticides stored within;
 - (e) Adequate ventilation by either natural or mechanical means so as to prevent the accumulation of toxic or flammable vapours;
 - (f) A "Danger Stored Pesticide" sign posted on all entrances which is printed in block letters 5 centimetres or more in height;
 - (g) Clean-up procedures consistent with the instructions of the minister or a person designated by the minister; and
 - (h) Other provisions which may be stipulated on the licence by the minister or person designated by the minister.
- (2) In addition to the above storage requirements, each pesticide storage site shall have prominently displayed on all entrances contact telephone numbers for:
 - (a) the operator and
 - (b) the Department of Environment and Conservation, Pesticides Control Section, and indicated accordingly.

- (3) All entrances to storage sites shall be locked when the owner or an employee of the owner is not present.
- (4) Pesticides shall be stored in their original container or a substitute container approved by the manufacturer. Substitute containers shall be labelled appropriately.

8. PROTECTIVE EQUIPMENT

The operator shall provide and ensure that all personnel involved in the mixing, loading, and application of pesticides wear appropriate protective equipment in accordance with the pesticide manufacturer's product label and/or material safety data sheet.

9. DISPOSAL

- (1) Empty pesticide containers which have been triple rinsed, cleaned and rendered unusable may be disposed of at an approved waste disposal site.
- (2) Contaminated material shall be disposed of in accordance with the manufacturer's directions and in consultation with the Pesticides Control Section.

10. WEATHER CONDITIONS

- (1) All exterior spraying activities, except foliar applications of insecticides to trees taller than three (3) meters, are permitted only when:
 - (a) wind speeds are between 2 and 15 km/h,
 - (b) air temperatures are below 25° C,
 - (c) the relative humidity is above 50%, and
 - (d) it is not raining nor is rain anticipated over the next 2 hour period.
- (2) Foliar applications of insecticides to trees taller than three (3) meters, are permitted only when:
 - (a) wind speeds are between 2 and 10 km/h,
 - (b) air temperatures are below 25° C,
 - (c) the relative humidity is above 50%, and
 - (d) it is not raining nor is rain anticipated over the next 2 hour period.
- (3) All exterior granular pesticide applications are permitted only when:
 - (a) air temperatures are below 25° C,
 - (b) the relative humidity is above 50%, and
 - (c) it is not raining nor is rain anticipated over the next 2 hour period.

- (4) Exceptions to weather conditions may be granted on a case by case basis. Contact the Pesticides Control Section for details.

11. PUBLIC NOTIFICATION

The operator shall ensure that public notification programs are carried out as per the applicable attachment to these terms and conditions.

12. BUFFER ZONES

The operator shall adhere to all buffer zones indicated in the applicable attachment.

13. ADDITIONAL STIPULATIONS

The operator shall adhere to all additional conditions stipulated in the applicable attachment.

14. REVOCATION

If an operator, its agent, employee or a licensed pesticide applicator under its control, fails to comply with the *Environmental Protection Act SNL 2002 cE-14.2*, the *Pesticides Control Regulations, 2012* or the stipulations attached to its operator licence, the Minister of Environment and Conservation may suspend, revoke, or cancel the subject licence and/or prosecute under the *Environmental Protection Act SNL 2002 cE-14.2*.

15. OFFENCE

An operator, his or her agent, employee or a licenced pesticide applicator under his or her control who does not comply with a term or condition of his or her licence or who contravenes the *Environmental Protection Act SNL 2002 cE-14.2* or the *Pesticides Control Regulations, 2012* is guilty of an offence.

16. The Department of Environment and Conservation reserves the right to amend the terms and conditions of this licence at any time.

**APPENDIX A
PESTICIDE LIST**

City of St. John's (Public Works & Parks)

PESTICIDE OPERATOR LICENCE NO: 14-062

These are the only pesticides that have been approved for storage and use except as noted below for this pesticide operator licence. The operator is not permitted to purchase, apply, store or otherwise handle pesticides not on this list.

If you require additional pesticides, please submit the form, "Request for Additional Pesticide(s)", to Fax # (709) 729-6969 or in writing to:

A1. RESTRICTION ON LAWN CARE PESTICIDES

As per Section 14 of the *Pesticides Control Regulations, 2012*:

- (1) A person shall not use a pesticide product that contains one or more of the following chemicals:
 - (a) carbaryl;
 - (b) 2,4-D (2,4-dichlorophenoxyacetic acid);
 - (c) mecoprop;
 - (d) dicamba; or
 - (e) MCPA (2-methyl-4-chlorophenoxyacetic acid)in, on, or over a lawn.
- (2) A person shall not sell, supply, or offer for sale a pesticide that contains one or more of the chemicals in paragraphs (1)(a)-(e) for use in, on or over a lawn.
- (3) Subsections (1) and (2) do not apply to a person who uses, possesses, sells or supplies a pesticide for
 - (a) a golf course;
 - (b) forestry activities; or
 - (c) agricultural activities.
- (4) Notwithstanding subsections (1) and (2) the minister may allow a pesticide product containing one or more of the chemicals in paragraphs (1)(a)-(e) to be applied to a sports turf or other highly managed turf areas.

A2. PUBLIC NOTIFICATION

- (1) The operator and/or his agent shall provide notice to all properties that are located within 15 meters of the proposed application site where the proposed application is to occur.
 - (a) The notification shall be:
 - (i) in writing, at least 24 hours prior to the pesticide application; or
 - (ii) verbally, at least 24 hours prior to the pesticide application and in writing immediately prior to the pesticide application.
 - (b) The notification shall include:

- (i) the trade name or product name of the pesticide,
 - (ii) the active ingredient(s) found within the pesticide,
 - (iii) the type of pest to be controlled,
 - (iv) the proposed date of application,
 - (v) the address of the property being treated,
 - (vi) the name and telephone number of the operator doing the application.
- (2) If the pesticide spray activity does not take place within 48 hours of the scheduled treatment, then the operator and/or his agent shall re-notify all properties in the same manner indicated above.
- (3) Subsections (1) and (2) do not apply to an operator and/or his agent who will apply a pesticide product that contains one or more of the following chemicals:
- (a) iron (present as FeHEDTA);
 - (b) acetic acid;
 - (c) *Phoma macrostoma*;
 - (d) pyrethrins; or
 - (e) fatty acids of soaps registered for control of lawn insect pests.

A3. SIGNAGE

- (1). For application of commercial or restricted class pesticides to turf, including but not limited to private, commercial and municipal properties, the following shall apply:
- (a) **LAWN CARE**
 - (i) The operator shall place a sign or signs on all properties that have had an exterior pesticide application.
 - (ii) The sign or signs should be placed in a manner that ensures the highest possible visibility.
 - (iii) The operator shall inform each client that the pesticide spray sign must remain in place for a period of not less than forty-eight (48) hours but not more than ten (10) days after which time the client shall remove the sign.
 - (iv) The sign shall meet the minimum requirements as illustrated in Appendix A.
 - (v) Paragraphs (1)(a)(i)-(iv) do not apply to an operator and/or his agent who applies a pesticide product that contains one or more of the following chemicals:
 - (I) iron (present as FeHEDTA);
 - (II) acetic acid;
 - (III) *Phoma macrostoma*;
 - (IV) pyrethrins; or
 - (V) fatty acids of soaps registered for control of lawn insect pests.

(b) GOLF COURSE:

- (i) The operator shall place signs in the Club-house facility and/or Pro-shop facility. Signs shall be placed in a manner that ensures the highest possible visibility.
- (ii) Signs shall be in place a minimum of 24 hours before the application of pesticides and a minimum of 48 hours after the application of a pesticide.
- (iii) The sign shall meet the minimum requirements as illustrated in Appendix B.

A4. BUFFER ZONES

- (1) Formulations containing the active ingredient metalaxyl shall not be applied within 50 meters of any water body.
- (2) Formulations containing the active ingredient quinterozone shall not be applied within 50 meters of any water body.
- (3) Instrata RTM Fungicide shall not be applied within 20 meters of any water body.

A5. MIXING AND LOADING

- (1) Operations involving the filling of spray tanks with water and the addition of pesticides to spray tanks may be undertaken subject to the following conditions:
 - (a) All pesticide mixing and loading activities shall be supervised at all times.
 - (b) Mixing and loading in the vicinity of water bodies shall be undertaken with equipment set up on flat, stable ground to mitigate the possibility of spills or leaks during fill events.
 - (c) Where water must be pumped directly into the spray tank, an antibackflow device shall be fitted onto the pump to prevent any material from the tank being diverted from the tank into or near the water body that is being used to fill the tank.
 - (d) Spill response materials sufficient to respond to an incident during mixing and loading operations shall be on site at all times.
 - (e) All mixing and loading sites shall be identified with GPS coordinates, and this information shall be provided to the Pesticides Control Section.

A6. APPLYING PESTICIDES AROUND PLAYGROUNDS / SPORTS FIELDS

- (1) Properties located within 15 meters of any playground or sports field cannot be treated with pesticides, except granular formulations, while the playground or sports field is occupied.
- (2) Subsection (1) does not apply to an operator and/or his agent who applies a pesticide product that contains one or more of the following chemicals:
 - (a) iron (present as FeHEDTA);
 - (b) acetic acid
 - (c) *Phoma macrostoma*;
 - (d) pyrethrins; or
 - (e) fatty acids of soaps registered for control of lawn insect pests.

A7. PESTICIDE APPLICATION TO BUILDINGS AND STRUCTURES

The operator and/or his agent shall not apply a pesticide to a building or structure for the control of structural pests.

ATTACHMENT B

PESTICIDE OPERATOR LICENCE

INDUSTRIAL VEGETATION

B1. Notification to Pesticides Control Section

- (1) The Pesticides Control Section shall be notified at least **one week** prior to the start of any program. This notification may be made by either fax to (709) 729-6969, or email: pesticidescontrol@gov.nl.ca .
 - (a) This notification shall include:
 - (i) Proposed areas to be treated during the next seven calendar day period.
 - (ii) Name of pesticide(s) to be used including *Pest Control Products Act* Registration Number (PCP Act Reg. #).
 - (iii) Method of application.
 - (iv) Contact information for site supervisor(s)
 - (b) Exceptions to the seven day advance notification may be granted on a case by case basis. Contact the Pesticides Control Section for details.
- (2) Once a program has begun weekly updates shall be provided to the Pesticides Control section. These updates shall include:
 - a) Areas treated in the previous 7 days
 - i. Name of pesticide(s) used including *Pest Control Products Act* Registration Number (PCP Act Reg. #)
 - ii. Amount(s) of pesticide(s) used on site.
 - b) Areas proposed for treatment in next 7 calendar day period

B2. Provision of maps

- (1) For pesticide operations involving treatments of transmission line, railway or road rights-of-way and silviculture areas, the operator shall provide to the Pesticides Control Section, maps of the proposed treatment area in an ArcGIS compatible format.
- (2) Proposed treatment and buffer areas should be accurately represented on these maps to the best of the operator's ability. This would include but is not limited to accounting for private property, wells, watershed areas and other potentially relevant landmarks.
- (3) The maps must be pre-approved by the Water Resources, Wildlife, Crown Lands and Parks and Natural Areas divisions before submission to the Pesticide Control Section.

- (4) The maps must be provided to the Pesticides Control Section for review not less than 30 days prior to the commencement of the proposed pesticide application.

B3. GPS mapping and data provision

- (1) An operator that undertakes a program of roadside vegetation management using pesticides shall be required to log all "boom on/boom off" locations where the pesticide had been applied with a GPS data collection unit.
- (2) The operator shall make arrangements to determine the most appropriate format for the provision of the data collection with the Pesticides Control Section prior to the commencement of the roadside vegetation management program.
- (3) The operator shall provide all GPS data to the Pesticides Control Section within 14 days of completion of the program.

B4. Accessibility

- (1) The operator shall ensure that all pesticide spray areas are accessible to Pesticides Control Section inspectors.
- (2) If the pesticide spray areas are in a remote area, it is the responsibility of the operator to ensure that the inspector can have reasonable access to the site at all appropriate times during a spray program.

B5. Maximum height of vegetation to be treated

In areas visible to the public, only vegetation that is 1 meter or less in height shall be treated with an herbicide.

B6. Notification to the public

- (1) For pesticide operations involving treatments of transmission/distribution lines, railway or road rights-of-way, earthen dyke and dam structures and silviculture areas, the public shall be advised of the purpose and scope of the project and of the issuance of this licence by means of a notice published in at least one (1) newspaper with circulation in the region(s) where the treatment area(s) have been proposed.

The newspaper notice will:

- (a) appear in any issue at least one week prior to commencing the program;
- (b) state the area that is proposed for treatment over the next 21 calendar days, at the end of which time another notice is to be placed until the program is completed;
- (c) state the proposed date(s) for treatment of the areas that are proposed for treatment over the next 21 days, at the end of which time another notice is to be placed until the program is completed;

- (d) list the name(s) of the pesticide(s) to be applied, and the *Pest Control Products Act* Registration Number for each pesticide;
 - (e) contain contact information (website address, toll-free information number or other) for individuals who wish to obtain additional information, and
 - (f) contain the telephone numbers of the pesticide operator's Operations Supervisor and the Pesticides Control Section, 1-800-563-6181, and be indicated accordingly.
 - (g) Contain an invitation for residents of treatment areas to contact the operator to advise of a well in the area
- (2) A copy of the published newspaper notice(s) and/or receipt(s) shall be electronically submitted, mailed or faxed to the Pesticides Control Section prior to commencement of the program.

B7. Notification to municipal governments

- (1) For industrial vegetation programs, excluding industrial treatment of secured substations or storage yards, the operator shall notify municipal governments whose boundaries meet or encompass the treatment and storage areas prior to commencement of the program.
- (2) The operator shall provide proof of said notification to Pesticides Control Section in advance of the commencement of the treatment.

This area has been treated with a

B8. Signage requirements

- (1) For industrial vegetation programs, excluding industrial treatment of secured substations or storage yards, the public shall be advised of local treatments by the posting of signs in the area. The signs shall be as follows;
- (2) For roadside vegetation management programs, the particulars of said posting are thus:
 - (a) Size of sign: minimum 11" x 17"; with information legible from the road
 - (b) Colour: White or yellow, so that the sign is visible when located in or near foliage;
 - (c) Type of material: Weather and water resistant;
 - (d) Height above ground: placed on a post no less than 1m above the ground and higher than surrounding vegetation
 - (e) Location of signage:
 - (i) on the upside of the ditch farthest from the road, close to the location of the treated area;
 - (ii) at the beginning and end of each treatment area on the side of the road where the treatment has been made,
 - (iii) where any road or trail passes through the treatment area, and

- (iv) at a set distance of one sign per 500 meters on the side of the road where the treatment has been made.
- (3) For transmission/distribution line vegetation management programs, the particulars of said posting are thus:
- (a) Size of sign: minimum 8 ½" x 11";
 - (b) Colour: White or yellow, so that the sign is visible when located in or near foliage;
 - (c) Type of material: Weather and water resistant; Height above ground: 1 – 2 meters above the ground;
 - (d) Location of signage: At all access points to transmission/distribution lines;
 - (e) Frequency of posting: 1 sign per every 5 structures along a linear treatment area.
- (4) For dyke/dam structure vegetation management programs, the particulars (location, colour, size of signs, etc.) of said posting are thus:
- (a) Size of sign: minimum 8 ½" x 11";
 - (b) Colour: White or yellow, so that the sign is visible when located in or near foliage;
 - (c) Type of material: Weather and water resistant;
 - (d) Height above ground: 0.5 – 1 meter above the ground;
 - (e) Location of signage: At the beginning of any and all access roads to the structure;
 - (f) Visibility of signage: All signs are to be visible to vehicular and pedestrian traffic that may access the structure being treated.

B9. Buffer zones – environmental consideration

(1) Dyke/dam structures:

- (a) Directed foliar applications are not permitted within 50 meters of the water body.
- (b) From the 50 meter mark up to the water body's edge, cut/stump or basal bark techniques using previously approved formulations with no-drip equipment, are the only permitted chemical control methods.

(2) Penstock Right-of-Way:

In the event that vegetation control is required around penstock rights-of-way the application shall be conducted as follows: only cut/stump or basal bark treatments of herbicides with the active ingredient triclopyr or glyphosate are permitted to be used, to the edge of a water body.

(3) Broadcast/foiar treatments for transmission/distribution line/railway/road rights-of-way:

- (a) Where the slope of the terrain is less than or equal to twenty (20) degrees, only herbicides containing glyphosate as the only active ingredient may be applied within 30 meters of any water body.
- (b) Where the slope of the terrain is greater than twenty (20) degrees, only herbicides containing glyphosate as the only active ingredient may be applied within 50 meters from any water body.
- (c) Glyphosate: Foliar herbicide applications shall not be permitted within a 15 meter buffer zone of a water body or within 50 meters of a well.
- (d) A well shall be protected using at least a 100 meter buffer zone when using any pesticide other than Glyphosate.

(4) Cut/stump or Basal bark treatments for transmission/distribution line/railway/road rights-of-way:

- (a) From the 30 meter or 50 meter mark, depending on the slope of the land (see stipulation B9.(3) to up to the water body's edge, cut/stump or basal bark techniques using previously approved formulations with no-drip equipment, shall be the only permitted chemical control methods.
- (b) A well shall be protected using at least a 100 meter buffer zone.

(5) Broadcast/foiar treatments for substations:

- (a) The herbicide formulation Calmix (PCP # 9342) shall not be applied within 15 meters of any water body.
- (b) All other soil sterilants shall not be applied within 30 meters of a water body.
- (c) Herbicide formulations containing glyphosate as the only active ingredient in the formulation are permitted to be applied to within 1 meter of the well inside a substation, unless a larger buffer is specified on the label.
- (d) For vegetation control in substation yards within 15 meters of a water body, herbicide formulations containing glyphosate as the only active ingredient are permitted to be used subject to the following conditions:
 - (i) A buffer zone of 2 meters must be maintained and the product may be applied only on the substation property up to the fence line.
 - (ii) Wind speeds cannot exceed 5 km/h at the time of application.
 - (iii) No other pesticide active ingredient may be used in this instance.

(6) Buffer zones – private property and human habitation

(a) Foliar applications of the following pesticide formulations shall not be applied within 50 meters of private property or human habitation (a residence, cabin or other form of human habitation):

- (i) Garlon 4 (PCP # 21053);
- (ii) Garlon Ultra (PCP#28434);
- (iii) Garlon RTU (PCP#29334);
- (iv) Tordon 101 (PCP# 9007); or
- (v) formulations containing the active ingredient glyphosate.

(b) In the event that vegetation control is required within the buffer zone for human habitation or private property, the following buffer zones shall apply:

(i) For vegetation control within 50 meters of private property (property containing only grasses and conifers):

(a) Pesticide formulations Garlon 4 (PCP# 21053), Garlon Ultra (PCP#28434), Garlon RTU (PCP#29334), Tordon 101 (PCP# 9007), or herbicides containing glyphosate as the only active ingredient may be applied;

(b) Only cut/stump or basal bark techniques are permitted to be used; and

(c) Chemical control shall not be permitted within 2 meters of the private land boundary.

(ii) For vegetation control within 50 meters of private property (property containing fruit or vegetable crops or any sensitive, broadleaved vegetation):

(a) Pesticide formulations Garlon 4 (PCP# 21053), Garlon Ultra (PCP#28434), Garlon RTU (PCP#29334) Tordon 101 (PCP# 9007), or herbicides containing glyphosate as the only active ingredient may be applied;

(b) Only cut/stump or basal bark techniques may be used; and

(c) Chemical control shall not be permitted within 10 meters of the private land boundary.

(c) In the event that vegetation control is required at a “substation” with a private property boundary within 50 meters of the substation boundary:

- (ii) Only herbicide formulations containing glyphosate as the only active ingredient are permitted to be used.
- (iii) Pesticide use is not permitted within 2 meters of the private property boundary.
- (iv) Wind speeds cannot exceed 5 km/h at the time of application.

B10. Exceptions to weather restrictions

For basal bark, cut/stump and R-Jet application techniques only, pesticide applications will be permitted at wind speeds up to 25km/h. Because of the variation in wind speeds on or near various structures, wind speeds are to be measured as close to the treatment area as possible.

B11. Mixing and loading operations

For all operations involving the filling of spray tanks with water, and the addition of pesticides to said tanks, the operation may be undertaken subject to the following conditions:

- (a) All pesticide mixing and loading activities must be supervised at all times.
- (b) Mixing and loading in the vicinity of water bodies shall be undertaken with equipment set up on flat, stable ground to mitigate the possibility of spills or leaks during fill events.
- (c) Where water must be pumped directly into the spray tank, an antibackflow device must be fitted onto the pump to prevent any material from the tank being diverted from the tank into or near the water body that is being used to fill the tank at all times.
- (d) Spill response materials sufficient to respond to an incident during mixing and loading operations must be on site.
- (e) All mixing and loading sites shall be identified with GPS coordinates, and this information shall be provided to the Pesticides Control Section.
 - (i) Mixing and loading sites for backpack sprayers, where there is secondary containment from the mixing operations being undertaken within a bermed or contained unit, are exempt from this requirement.

B12. Temporary storage of pesticides

When it is necessary to store pesticides on a temporary site and/or in remote locations the following shall apply:

- (a) A pesticide storage shall not be located within 100 meters of a water body.
- (b) A supply of water shall be available in or adjacent to the storage area.
- (c) Approved safety equipment shall be provided as specified on the labels/MSDS of pesticides being stored and shall be properly maintained, functional and available at all times for personnel handling and working with pesticides.
- (d) Pesticides shall be stored in such a manner that containment is provided.
- (e) A “ Danger-Stored Pesticide ” sign shall be posted at all entrances which is printed in block letters 5 centimetres or more in height.
- (f) Clean up procedures, material and equipment shall be available at all times to clean up spills or leakage.
- (g) Pesticide products shall be locked in a secure leak-proof container at all times.

B13. The Department of Environment and Conservation reserves the right to amend the attachments of the terms and conditions of this licence at any time.

ATTACHMENT C

PESTICIDE OPERATOR LICENCE

FORESTRY - INSECTICIDE PROGRAM

- C1.** (i) **For all ground pesticide operations** involving a total of 300 ha or more, dyking, security, storage and communication plans shall be provided and approved by the Pesticides Control Section in advance of any spray program for all locations where any pesticide is to be mixed or loaded.
- (ii) **For all aerial pesticide operations** dyking, security, storage and communication plans shall be provided and approved by the Pesticides Control Section in advance of any spray program for all locations where any pesticide is to be mixed or loaded.
- (iii) The operator will also be responsible for the development of contingency plans and associated call out notifications to the satisfaction of the Pesticides Control Section in advance of any spray program.
- C2.** For aerial control programs, the Pesticides Control Section shall be advised of the spray plan, block readiness, treatments carried out, etc. on a daily basis. To contact the Pesticides Control Section, please call **Eastern Office** - (709) 729-2565; FAX: (709) 729-6969; **Central Office** - (709) 256-1175 FAX: (709) 256-1095; **Western Office** - (709) 637-2528, FAX: (709) 637-2541.
- C3.** (i) Aerial spraying of pesticides is generally not permitted within Protected Water Supply Areas. The storage, mixing, loading and application of any pesticide within Protected Water Supply Areas requires a separate approval from the Water Resources Management Division of the Department of Environment and Conservation. The approval request shall provide detailed information on the type and duration of activity, location of activity (to be delineated on a 1:50 000 NFS topographical map), name of the pesticide along with its composition and toxicity data, application rate, application method, as well as any other information required.
- (ii) The operator assumes liability to provide an alternate source of water to the affected community or communities as a result of the source of water supply being contaminated due to the spray program.

PUBLIC/MUNICIPALITY NOTIFICATION PROGRAMS

- C4. (i) For pesticide operations involving treatments of **pesticides applied acrially**, the public shall be advised of the purpose and scope of the project and of the issuance of this licence by means of a notice published in at least one (1) newspaper with circulation in municipalities whose boundaries encompass treatment areas. The newspaper ad will appear in any issue at least one week prior to commencing the program. The ad will state all areas that are proposed for treatment during the program. The ad will also contain contact information (website address, toll free information number or other) for individuals who wish to obtain additional information; and the telephone numbers of the Operations Supervisor and the Pesticides Control Section, 1-800-563-6181, and indicated accordingly.

A copy of the newspaper ad and/or receipt shall be mailed or faxed to the Pesticides Control Section.

(ii) A toll-free information line shall be set up one week prior to commencement of the spray program, for the duration of the spray program, and will remain operational until September 30 of this year. The toll-free number will be advertised prior to the beginning of the spray program.

(iii) Daily notification through press releases shall be made by the licensed pesticide operator, for the duration of the spray program. Regular updates will be made regarding the status of the program. All updates will identify the toll-free information number.

- C5. (i) For aerial control programs, municipal governments whose boundaries encompass treatment and storage areas shall be notified prior to commencement of the programs. As per provisions of the *Urban and Rural Planning Act* and the *Municipalities Act*, any activity within a town boundary requires approval of the town council in question.

(ii) For all programs involving the aerial application of pesticides, the operator shall be required to submit the details of municipality information programs to the Department of Environment and Conservation. The details of said municipality information programs must be approved in advance by the Department of Environment and Conservation.

- C6.** For aerial control programs, the public shall be advised of local treatments by the posting of signs in the area. The sign shall be as follows:

<p>This area is to be treated with a federally registered pesticide</p> <p>_____</p> <p>Name of Formulation</p> <p>_____</p> <p>PCP Act Registration Number</p> <p>On</p> <p>_____</p> <p>Date of Application</p> <p>For more information contact:</p> <p>_____</p> <p>Company Name and Phone Number</p> <p>Or</p> <p>Department of Environment and Conservation</p> <p>1-800-563-6181</p>
--

The particulars (location, timing, size of sign, etc.) of said posting shall be set by the Pesticides Control Section prior to spray programs.

- C7.** The operator and/or his agent shall make every reasonable attempt to verbally notify adjacent owners, prior to the spray program, who, given the nature of the control operation, might be expected to benefit from said notification. In the event that this cannot be done, the operator shall post signs (as specified in C6.) along access road(s) leading to all dwellings located within the proposed spray area(s).
- C8.** In the event that formulations containing Btk are to be used, the brochure "Protecting the Forests with Btk" is to be distributed to all municipal councils with boundaries that may contain spray blocks. In addition, the brochure is to be made readily available to members of the general public. Additional distribution is encouraged but is done so at the pesticide operator's discretion.

BUFFER ZONES

- C9. For any pesticide application involving, either directly or indirectly, an aircraft of any sort, the operator shall maintain an **800 meters buffer zone around all occupied osprey and bald eagle nests** and a minimum aircraft height of 250 meters during the period May 1 to August 15.
- C10. *Bacillus thuringiensis kurstaki (Btk)*
If approved for aerial application in Protected Water Supply Areas, the operator shall provide the following widths of buffer zones, or any other buffer widths as specified by the Water Resources Management Division, along and around water bodies from the high water mark in a designated area:

<u>WATER BODY</u>	<u>WIDTH OF BUFFER ZONE</u>
Intake pond or lake	a minimum of 150 meters
River intake	a minimum of 150 meters for a distance of one (1) kilometer upstream and 100 meters downstream
Main river channel	a minimum of 75 meters
Major tributaries, lakes or ponds	a minimum of 50 meters
Other water bodies	a minimum of 30 meters

MIXING, RINSING AND LOADING

- C11. All pesticide mixing and rinsing sites shall be located a minimum of 50 meters from the nearest water body. Loading of equipment with water only prior to the addition of pesticide can be done up to 5 meters from a water body. Addition of pesticide to the water in the equipment shall be performed at least 50 meters from the nearest water body.
- C12. Where water must be pumped directly into the formulation tank, an antibackflow device must be fitted onto the pump and the siting should be that the formulating unit be at least 30 meters from the watercourse and that the pesticides not be opened for addition to the

formulation tank until the equipment has been filled with water and is out of the respective buffer zone.

C13. The Department of Environment and Conservation reserves the right to amend the attachments of the terms and conditions of this licence at any time.

Feb. 08, 2013

ATTACHMENT D

PESTICIDE OPERATOR LICENCE

FORESTRY - HERBICIDE PROGRAM

D1. NOTIFICATION TO PESTICIDES CONTROL SECTION

(1) For all ground pesticide operations involving a total of 300 ha or more information regarding:

- (a) Dyking;
- (b) Security;
- (c) Storage; and
- (d) Communication plans

shall be provided and approved by the Pesticides Control Section in advance of any spray program for all locations where any pesticide is to be mixed or loaded.

(2) For all aerial pesticide operations information regarding:

- (a) Dyking;
- (b) Security;
- (c) Storage; and
- (d) Communication plans

shall be provided and approved by the Pesticides Control Section in advance of any spray program for all locations where any pesticide is to be mixed or loaded.

(3) The operator will also be responsible for the:

- (a) Development of contingency plans; and
- (b) Associated call out notifications

to the satisfaction of the Pesticides Control Section in advance of any spray program.

- (4) For **aerial control programs**, the Pesticides Control Section shall be:
- (a) Contacted prior to the commencement of onsite applications; and
 - (b) Advised, on a daily basis during the program of the following:
 - (i) spray plan;
 - (ii) block readiness; and
 - (iii) treatments carried out, etc.

To contact the Pesticides Control Section, please call:

Eastern Office – (709) 729-2565 – FAX: (709) 729-6969;
Central Office – (709) 256-1175 – FAX: (709) 256-1095; or
Western Office – (709) 637-2528 – FAX: (709) 637-2541.
Email: pesticidescontrol@gov.nl.ca

- (c) For **forestry vegetation control programs**, proposed areas to be treated during the next seven calendar days shall be identified and submitted to the Pesticides Control Section, at least **one week** prior to the said seven day period. This notification may be made either by fax: 709-729-6969, or email: pesticidescontrol@gov.nl.ca .

Exceptions to the seven day advance notification may be granted on a case by case basis. Contact the Pesticides Control Section for details.

- (5) (a) Aerial spraying of pesticides is generally not permitted within Protected Water Supply Areas. The storage, mixing, loading and application of any pesticide within Protected Water Supply Areas requires a separate approval from the Water Resources Management Division of the Department of Environment and Conservation. The approval request shall provide detailed information on the type and duration of activity, location of activity (to be delineated on a 1:50 000 NFS topographical map), name of the pesticide along with its composition and toxicity data, application rate, application method, as well as any other information required.
- (b) The operator assumes liability to provide an alternate source of water to any affected community or communities affected as a result of their source of water supply being contaminated due to a spray program.

D2. AERIAL HERBICIDE PROGRAM

All commitments regarding safety precautions, buffer zones, public notifications, spill responses, monitoring (pre- and post-spray activities as deemed necessary by the Pesticides Control Section), and meteorological conditions at the time of a particular spray event will be adhered to as outlined in the approved "Operators Manual for Aerial Herbicide Spraying".

D3. PUBLIC/MUNICIPALITY NOTIFICATION PROGRAMS

(1) **For pesticide operations involving pesticides applied aerially or by ground, the public shall be advised of the purpose and scope of the project and of the issuance of this licence by means of a notice published in at least one (1) newspaper with circulation in municipalities that are located near or within the treatment areas.**

(a) The newspaper ad shall:

- (i) Appear in any issue at least one week prior to commencement of the program;
- (ii) State all areas that are proposed for treatment over the next 21 days;
- (iii) State the proposed date(s) for treatment of the areas that are proposed for treatment over the next 21 days;
- (iv) List the name(s) of the pesticide(s) to be applied, and the *Pest Control Products Act* Registration Number for this/these pesticide(s); and
- (v) Contain contact information (website address, toll free information number or other) for individuals who wish to obtain additional information; and the telephone numbers of the Operations Supervisor and the Pesticides Control Section, 1-800-563-6181, and indicated accordingly.

(b) A copy of the newspaper ad and/or receipt shall be mailed or faxed to the Pesticides Control Section.

(2) A toll-free information line shall be set up one week prior to commencement of the spray program, for the duration of the spray program, and will remain operational until September 30 of each year. The toll-free number will be advertised prior to the beginning of the spray program.

(3) Daily notification through press releases shall be made by the licensed pesticide operator, for the duration of the spray program. Regular updates will be made regarding the status of the program. All updates will identify the toll-free information number.

- (4) (a) Signs, with accompanying map, stating the intention to treat and the proposed treatment dates are to be posted at critical points along the treatment areas at least (1) week prior to the start of the program. The sign shall be as follows:

NOTICE

This area will be treated with a
federally registered pesticide

Name of Formulation

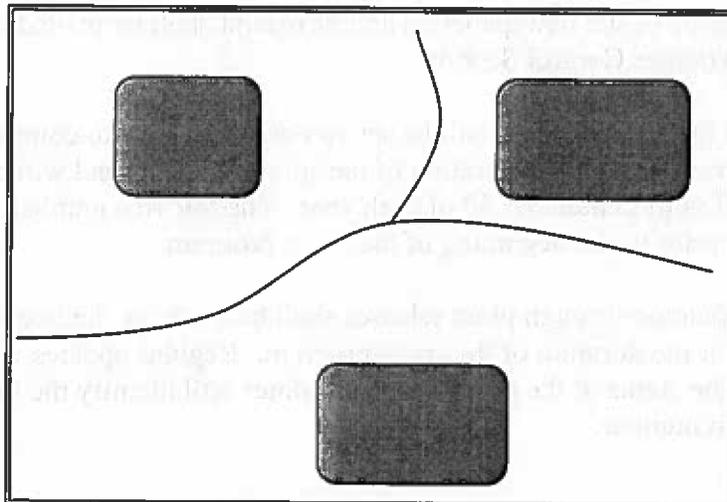

PCP Act Registration Number

Between

Proposed Date of Application

For more information contact:

Company Name and Phone Number
Or
Department of Environment and Conservation
1-800-563-6181

- (b) **For forestry vegetation management programs**, the particulars of said posting are thus:
- (i) Size of sign: minimum 24" x 24";
 - (ii) Colour: White sign with colored lettering, so that the sign is visible when located in or on foliage;
 - (iii) Type of material: Weather and water resistant;
 - (iv) Height above ground: Minimum of 1 meter and attached to a tree or placed on a post; and
 - (v) Location of signage: At the beginning and end of the proposed treatment area along any main access point (ie: any road or trail).
- (5) (a) For **aerial control programs**, municipal governments whose boundaries are located near or within the treatment and storage areas shall be notified prior to commencement of the programs.
- (b) For all programs involving the aerial application of pesticides, the operator shall be required to submit the details of municipality information programs to the Department of Environment and Conservation. The details of said municipality information programs must be approved in advance by the Department of Environment and Conservation
- (6) For aerial and ground-based control programs, the public shall be advised of local treatments by the posting of signs in the area with maps attached indicating the specific spray block. The sign shall be as follows:

This area has been treated with a
federally registered pesticide

Name of Formulation

PCP Act Registration Number

On

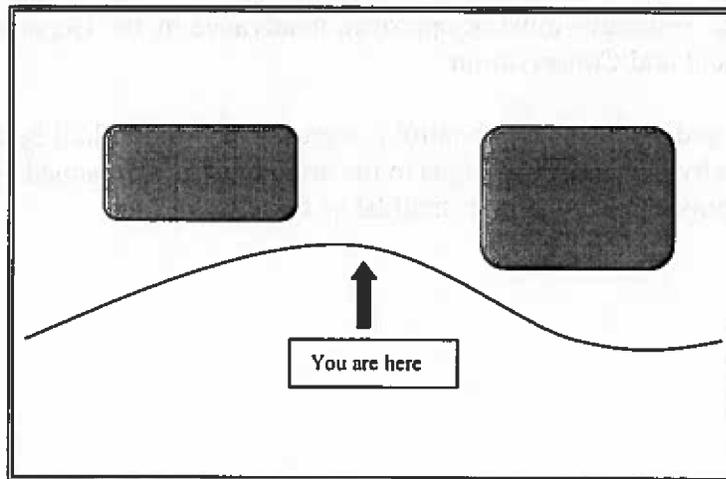

Date of Application

For more information contact:

Company Name and Phone Number

Or

Department of Environment and Conservation
1-800-563-6181

The particulars of said posting are:

- (a) Size of sign: minimum 24" x 24";
- (b) Colour: White sign with colored lettering, so that the sign is visible when located in or on foliage;
- (c) Type of material: Weather and water resistant;
- (d) Height above ground: Minimum of 1 meter and attached to a tree or placed on a post;
- (e) Location of signage: at each treated area;
- (f) Frequency of posting:
 - (i) at the beginning and end of each treatment area; and
 - (ii) where any road or trail passes through the treatment area.

- (7) The operator and/or his agent shall make every reasonable attempt to verbally notify adjacent owners, prior to the spray program, who, given the nature of the control operation, might be expected to benefit from said notification. In the event that this cannot be done, the operator shall post signs (as specified in D3 (6)) along access road(s) leading to all dwellings located within the proposed spray area(s).

D4. BUFFER ZONES

- (1) For any pesticide application involving, either directly or indirectly, an aircraft of any sort, the operator shall maintain an **800 meters buffer zone around all occupied osprey and bald eagle nests** and a minimum aircraft height of 250 meters during the period May 1 to August 15.
- (2) **Glyphosate herbicides**
When aerially applying herbicides containing the active ingredient glyphosate, all commitments regarding buffer zones shall be adhered to as outlined in the approved "Operator's Manual for Aerial Herbicide Spraying".

D5. MIXING, LOADING AND RINSING

For all operations involving the filling of spray tanks with water, and the addition of pesticides to said tanks, the operation may be undertaken subject to the following conditions:

- (a) All pesticide mixing and loading activities must be supervised at all times.
- (b) Mixing and loading in the vicinity of water bodies shall be undertaken with equipment set up on flat, stable ground to mitigate the possibility of spills or leaks during fill events.
- (c) Where water must be pumped directly into the spray tank, an antbackflow device must be fitted onto the pump to prevent any material from the tank being diverted from the tank into or near the water body that is being used to fill the tank.
- (d) Spill response materials sufficient to respond to an incident during mixing and loading operations must be on site.
- (e) All mixing and loading sites shall be identified with GPS coordinates, and this information shall be provided to the Pesticides Control Section; and
- (f) Buffers shall be maintained according to label.

D6. TEMPORARY STORAGE OF PESTICIDES

When it is necessary to store pesticides on a temporary site and/or in remote locations the following shall apply:

- (a) A pesticide storage shall not be located within 100 meters of a water body;
- (b) A supply of water shall be available in or adjacent to the storage area;
- (c) Approved safety equipment shall be provided as specified on the labels/MSDS of pesticides being stored and shall be properly maintained, functional and available at all times for personnel handling and working with pesticides;
- (d) Pesticides shall be stored in such a manner that containment is provided;
- (e) A "Danger-Stored Pesticide" sign shall be posted at all entrances which is printed in block letters 5 centimetres or more in height;
- (f) Clean up procedures, material and equipment shall be available at all times to clean up spills or leakage;
- (g) Spill response materials sufficient to respond to an incident during mixing and loading operations shall be on site;
- (h) Pesticide products shall be locked in a secure leak-proof container at all times; and
- (i) Security shall be maintained on site for the duration of the program.

D7. The Department of Environment and Conservation reserves the right to amend the attachments of the terms and conditions of this licence at any time.

Feb. 18, 2013

ATTACHMENT F

PESTICIDE OPERATOR LICENCE

STRUCTURAL

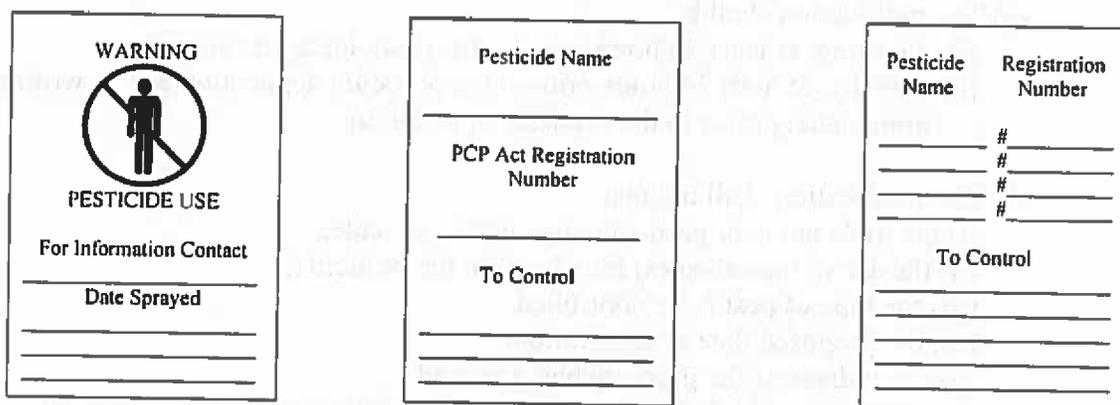

F1. Public notification (Exterior applications)

- (1) The Operator and/or his agent shall provide notice to all properties that are located within 15 meters of the proposed exterior application, excluding covered baits.
 - (a) The notification shall be:
 - (i) in writing, at least 24 hours prior to the pesticide application; or
 - (ii) verbally, at least 24 hours prior to the pesticide application and in writing immediately prior to the pesticide application.
 - (b) The notification shall include:
 - (i) the trade name or product name of the pesticide,
 - (ii) the active ingredient(s) found within the pesticide,
 - (iii) the type of pest to be controlled,
 - (iv) the proposed date of application,
 - (v) the address of the property being treated,
 - (vi) the name and telephone number of the operator doing the application.
- (2) If the pesticide spray activity cannot take place within 48 hours of the scheduled treatment, then the Operator and/or his agent shall "re-notify" all properties in the same manner indicated above.
- (3) Notification is not required for exterior applications of structural pesticides on or within 1 meter of a structure, unless that structure is located within 1 meter of the property boundary.

F2. Signage

- (1). For application of commercial or restricted class pesticides including but not limited to private, commercial and municipal properties, the following shall apply:
 - (i) The operator shall place a sign or signs on all properties that have had an exterior pesticide application, excluding covered baits.

- (ii) At the discretion of the operator, the sign or signs should be placed in a manner to ensure high visibility.
 - (iii) The operator shall inform each client that the pesticide spray sign must remain in place for a period of not less than forty-eight (48) hours but not more than ten (10) days after which time the client shall remove the sign.
 - (iv) The sign shall meet the minimum requirements as illustrated in subsection (3).
- (2) Signage is not required for exterior applications of structural pesticides on or within 1 meter of a structure, unless that structure is located within 1 meter of the property boundary.
- (3) The sign must meet the minimum requirements as follows:

Front

Back

Or

Back

For illustrative purposes only. Sign, pictogram and letters are not drawn to scale.

The sign and information contained on it must be weather resistant for at least forty-eight (48) hours.

The sign shall be at least twenty-eight (28) centimeters high and twenty-two (22) centimeters wide.

The front of each sign shall bear:

The words “WARNING” at the top in capital letters;

Below those words a pictogram showing a single, black silhouette of an adult person on a white background within a red circle crossed by an oblique red bar;

Below the pictogram the words "PESTICIDE USE" in capital letters;

Below those words the words "FOR INFORMATION CONTACT" in capital letters and the company name and telephone number. The Department of Environment and Conservation name and contact number (1-800-563-6181 - St. John's) must also be placed below the company contact information and identified accordingly;

Below the phone numbers the words "DATE SPRAYED" and the date the treatment begins;

The front of the sign may bear only words and markings that do not detract from the required information, occupying not more than the bottom 2.5 centimeters of the sign, that identify the employer of the person performing the treatment;

The words "WARNING" and "PESTICIDE USE" on the front of each sign shall be printed in red letters and shall be at least 2.5 centimeters high.

All other letters and numbers shall be printed in black and shall be at least 1.0 centimeter high.

The back of each sign shall bear:

The word "PESTICIDE" at the top left in capital letters followed by the name of the pesticide used or intended for use;

And Either:

Below those words the words "REGISTRATION NUMBER" in capital letters followed by the registration number assigned to the pesticide under the *Pest Control Products Act* (Canada);

Or:

The words "REGISTRATION NUMBER" at the top right in capital letters followed by the registration number assigned to the pesticide under the *Pest Control Products Act* (Canada);

And:

Below those words the words "TO CONTROL" in capital letters followed by the name of the pest to be controlled;

The outer edge of the red circle on the pictogram shall be at least 12.5 cm in diameter on each sign and the width of the circle shall be approximately one-tenth the size of the diameter.

- F3.** The Department of Environment and Conservation reserves the right to amend the attachments of the terms and conditions of this licence at any time.

Feb. 18, 2013
