**TOWN OF BISHOP'S FALLS
DEVELOPMENT REGULATIONS AMENDMENT No. 8, 2023**

BACKGROUND

The Town Council of Bishop's Falls wishes to amend its Development Regulations. The proposed amendment seeks to change the 2015-2025 Development Regulations text and Land Use Zoning Map. There are four separate topics in this Amendment, as follows:

1. Accessory buildings

The Town Council wishes to expand the size of accessory buildings to reflect the needs of the residents of Bishop's Falls.

2. Home business requirements for residential child care

Child care services are highly desired in the community. The current standards were developed about ten years ago and the provincial *Child Care Regulations, 2017* under the *Child Care Act* have been updated since the current Development Regulations came into effect. These provincial regulations provide standards on the size, capacity and use of a residential home for child care purposes that are consistent with the wishes of the Town Council. Therefore, the Town wishes to update the text of the Development Regulations to be consistent with the provincial regulation.

3. 551 Main Street

The purpose of this change in Development Regulations No. 8, 2023 is to re-zone an area of land from "Commercial Neighbourhood" to "Residential Medium Density" on the Land Use Zoning Map of the Development Regulations. See attached Town of Bishop's Falls Development Regulations Amendment No. 8, 2023 Map A. Council will also consider an associated amendment to the 2015-2025 Municipal Plan Generalized Future Land Use map. The former convenience store has not been in operation for about ten years and the owner of the land wishes to use the land for residential purposes which is consistent with the uses on either side of the property. There is no specific text in the Development Regulations which restricts this site from residential development; therefore, no text amendment is required.

4. Rezoning of 62 Main Street

The purpose of this change in Development Regulations No. 8, 2023 is to re-zone an area of land from "Industrial" to "General Commercial" on the Land Use Zoning Map of the Development Regulations. See attached Town of Bishop's Falls Development Regulations No. 8, 2023, Map B. This site is a successful gas bar and convenience station located within an Industrial zone. The owner wishes to expand and diversify the commercial offerings on the site and the Town Council may enable the continued success of this valuable commercial

activity in the community. As other such services have closed down over the years, the community needs to be able to facilitate and encourage the continuation of this business for the benefit of the town overall. There is no specific text in the Municipal Plan which restricts this site from general commercial use; therefore, no text amendment is required.

PUBLIC CONSULTATION

During the preparation of this proposed amendment, Council undertook the following initiatives so that individuals could provide input. A Notice was published in the Central Wire on March 22, 2023 and on the Town Facebook page on March 21, 2023.

No submissions were received by the Town Clerk.

Chilling out in those icy waters

Daily dips help "shock" enthusiasts into happier, healthier life

DESIRE ADITY

On a cold day, Drew Bebara gradually descends into a carbonated lake of water-cold water in his pond for a few minutes.

While it might seem "crazy to some," says Bebara, who is in his 40s, he swears that his daily ice dips have "immensely improved" his health, with water temperatures plummeting from 2 to 4 C.

Bebara has five expeditions and cold-water experiences in the Royal Canadian Navy, where he served for 24 years.

"I was a Special Forces Navy British Troop and served in several overseas areas from Helmand to Afghanistan," explains Bebara, from Holywood, N.L.

But in 2007, he retired from the military.

"My doctor said me, 'Drew, your bloodwork makes me look diabetic. You may have to consider lifestyle changes, and that's when, in October 2015, I watched a show that would change my life.'"

COLD EXPOSURE

Bebara watched an episode about a Dutch extreme athlete, Wim Hof, nicknamed 'The Iceman,' who broke several records related to cold exposure.

"After that episode, I took a bucket and broke open a single ice on my pond. I made my feet into the freezing water and my first reaction was that they felt like they were on fire."

Even though he had 24 years of experience being cold in the military, this was a new approach to cold exposure.

"But I knew of the fantastic health benefits of immersi-

on in the warmest system," he says. "I realized anxiety, depression, and Post Traumatic Stress Disorder (PTSD)."

Bebara decided to take a course in cold-water therapy and started his attention to helping others for a while. "I went to Amsterdam and found and became an instructor in this method for one year. After that, I did work shops about it for myself, my family, and my friends."

POSITIVE IMPACT ON HEALTH

Personally, he's seeing an impact, Bebara says. "Over the years, my health vastly improved. In addition,

my depression manages my PTSD and helps me in the military," he says.

"Without the daily ice dips, Bebara believes he would have been on psychiatric medication."

His experience prompted him to start a Facebook group called Newfoundland Winter Tribe, where like-minded people share their regular dips online.

"ON TOP OF THE WORLD"

From St. John's, N.L., Jenn a White says she does a high-altitude dip.

"It made me feel like you are on top of the world," she explains after climbing out from two minutes of submer-

sion. "Cold exposure has helped

me with my confidence, motivation and energy, even in the short time I've been doing this."

White says cold exposure has many benefits. "I am mostly doing this a dip to help my cognitive performance, stability, combat AD/HD, which I was diagnosed with two years ago. So, there has been a large amount of relief and improvement in my health in figuring out what I needed to succeed and the journey has not been easy," she says.

"I have always been an impulsive person, and when I get overwhelmed, I feel as though I can lose some control of my emotions. There have been a lot of ups and downs in my life, and I have

quite a bit more of experience at 33 years old. But I am to keep a positive attitude and push on."

White says her son, a supportive family, friends, hiking and cold exposure improved her overall health and happiness.

"Just my job at the beginning of the pandemic. As for that, I left an abusive relationship. Then, I was a single mom, and I could not visit my family because of the COVID-19 lockdown. I was a single mom, but after much hard work, I am now happy to go to work... I am studying with the practical nursing program in St. John's and I love the study and my calling," she said.

When asked what others thought about her wintery dips, White laughed.

"They all think I'm crazy, but you only have one life to live and these dips make me feel great."

TAKE PRECAUTIONS

But don't jump in just yet. "I have a lot of things to keep in mind before trying it."

"White offers some sage advice. "If you take a medication, please talk to your doctor first to see if cold exposure is safe."

Bebara, as well, warns there are precautions to take before trying ice dipping. "There is a risk in the water because of the danger," he warns.

"I never only go in water-cold water and then equal. And then I sit down to my car. It's a gradual approach. You don't need to be a tank like me. You could take a cold shower. But cold exposure should be gradual. It should be relaxing."
