(Notre Dame Junction)

Prepared by:

**Department of Environment, Climate Change and Municipalities
Local Governance and Land Use Planning Division**

January 2021

URBAN AND RURAL PLANNING ACT, 2000
RESOLUTION TO APPROVE
ROAD TO THE ISLES
PROTECTED ROAD ZONING PLAN
AMENDMENT NO. 5, 2020

Under the authority of section 16, section 17 and section 18 of the *Urban and Rural Planning Act 2000*, I, Mary Oley, as delegated by the Minister of Environment, Climate Change and Municipalities:

- a) adopted the Road to the Isles Protected Road Zoning Plan Amendment No. 5, 2020 on the 15th day of January, 2021.
- b) gave notice of the adoption of the Road to the Isles Protected Road Zoning Plan Amendment No. 5, 2020 by advertisement posted on the 15th day of January, 2021 on the Department of Environment, Climate Change and Municipalities' website and at the subject property.
- c) set the 19th day of February as the deadline for objections or submissions to be submitted for consideration by the commissioner.

Now under the authority of Section 23 of the *Urban and Rural Planning Act 2000*, I approve the Road to the Isles Protected Road Zoning Plan Amendment No. 5, 2020 as adopted.

Signed this 20 day of April, 2021.

MCIP:

ROAD TO THE ISLES PROTECTED ROAD ZONING PLAN
AMENDMENT NO. 5, 2020
NOTRE DAME JUNCTION

FORWARD

The Department of Environment, Climate Change and Municipalities proposes to amend the Road to the Isles Protected Road Zoning Plan (the “Plan”) by rezoning an area on the east side of the Road to the Isles (Route 340), north of the Trans-Canada highway at Notre Dame Junction. This amendment to the Plan is to accommodate a request to rezone privately owned land from “Rural Conservation” to “Cottage” to accommodate a proposed seasonal dwelling.

BACKGROUND

The Protected Road Zoning Regulations (“the Regulations”) are provincial regulations made under the *Urban and Rural Planning Act, 2000* (“the Act”) to control development within the building control lines of protected roads and to implement protected road zoning plans. Section 4 of the Regulations states that no one shall carry out development within the building control lines unless a permit has been issued. The building control lines are established in section 5 of the Regulations and extend 400 metres from the centreline of Route 340; except within a municipal boundary, where the building control line extends 100 metres from the highway centreline; or within a municipal planning area, where the building control line extends 150 metres from the highway centreline.

According to schedule B of the Regulations, the Road to the Isles (Route 340) is classified as a Class II Protected Road. Schedule B states that the Road to the Isles (Route 340), as existing or proposed extends:

- a) from its junction with the Trans Canada Highway (Route 1) to a point where the southern municipal planning boundary of the Town of Lewisporte, as defined, crosses the highway;
- b) from a point where the northern municipal planning boundary of the Town of Lewisporte, as defined, crosses the highway to a point where the southern municipal boundary of the Town of Campbellton, as defined, crosses the highway; and
- c) from a point where the northern municipal boundary of the Town of Campbellton, as defined, crosses the highway to a point where the eastern municipal boundary of the Town of Twillingate, as defined, crosses the highway.

A Class II protected road is defined by section 3(b) of the Regulations as:

... a highway which is designated as a secondary road by the Department of Works, Services and Transportation and whose prime purpose is a transportation link for large outlying areas of the Province.

The Department of Digital Government and Service NL (Government Service Centre) is the authority and responsible for administering the Regulations.

The Plan was prepared in 1983 with the goal of protecting Route 340 as a safe and convenient conveyor of traffic while ensuring that development occurs in an orderly manner. The plan was reviewed in 1993. An amendment was prepared and approved in 2019 which rezoned land on at Reach Run from 'Rural Conservation' to 'Cottage'. The Plan establishes land use policies and zones. The Regulations contain a list of uses permitted in each zone along conditions and development control standards.

PLANNING PROCESS

The Act specifies that plans, including a protected road zoning plan, are legally binding upon municipalities and councils within the area governed by a plan and anyone undertaking development. The Act outlines the process for bringing a protected road zoning plan or amendment into legal effect. In general terms, this process includes:

- Providing an opportunity for interested persons, community groups, municipalities, local service districts, other interested stakeholders and departments of government to provide input and receive information about the preparation of the plan or amendment;
- Statutory public hearing held by an independent commission to hear objections and submissions with respect to the plan or amendments.
- The statutory public hearing may be cancelled if no written submissions are received two days prior to the scheduled public hearing (this requirement is waived temporarily due to the Covid-19 pandemic);
- If the statutory public hearing proceeds, the commissioner must submit a report and recommendations to the Minister of Environment, Climate Change and Municipalities;
- If a review of the plan or amendment finds that it is not contrary to law or policy, the plan or amendment shall be registered;
- Once registered, a notice must be published in the *Newfoundland and Labrador Gazette* and a local newspaper;
- Upon publication of the notice of registration in the *Newfoundland and Labrador Gazette*, the plan or amendment comes into legal force.

No development can occur until a permit has been issued by Department of Digital Government and Service NL (Government Service Centre). The Government Service Centre has been delegated the authority to administer the Regulations. Once the Plan or amendment is in legal effect, all development must comply with the Plan and Regulations.

PUBLIC CONSULTATION/OBJECTIONS

In accordance with section 18 of the Act, the Department of Environment, Climate Change and Municipalities must undertake public consultation to consider objections and representations regarding the proposed plan or amendment.

A public hearing notice requesting objections or representation from individuals or groups, along with the proposed amendment and associated map identifying the site, was posted on the Department of Environment, Climate Change and Municipalities website (https://www.gov.nl.ca/eccm/consultations/prz_consultations/). This posting included a Google Earth link to the subject site.

Written representation are requested by Friday, February 19, 2021 at 4:00 pm.

ANALYSIS

The subject area is situated on the east side of Route 340 north of Route 1. The subject site is located within the protected road building control lines and is subject to the Plan and Regulations. The subject area is currently zoned "Rural Conservation". According to the Regulations, cottages/cabins are not a permitted use in the Rural Conservation zone.

Access to the site is yet to be determined. The Department of Transportation and Infrastructure has indicated that residential access may be accommodated subject to an access permit. Additionally, permits will be required from Service before any construction.

AMENDMENT NO. 5, 2020

The Road to the Isles Protected Road Zoning Plan Amendment No. 5, 2020 rezones land located on the east side of Route 340 (Road to the Isles), at Notre Dame Junction, from "Rural Conservation" to "Cottage" as shown on the attached map.
