

Winter Band by Kyle Barron

The snowflakes dance around me
The wind sings as it blows
The trees play the drums as the branches crack off
And the ice plays guitar as it cracks

I hear these sounds all winter long
They are a melody to my ears
Ill remember this music throughout all four seasons
As I yearn these days to come

Snowflakes, wind, trees, and ice
Are just normal winter scenes and sounds
But if you listen closer
Youll hear a band play along

This band is not a normal one
As its made from Mother Nature
And you only get to hear it
For one season, winter

The snowflakes dance around me
The wind sings as it blows
The trees play the drums as the branches crack off
And the ice plays guitar as it cracks
